Here's what our easy-to-build dashboards deliver:

Holistic visibility

Combine multiple charts and views into one dashboard or use dashboard widgets like Project Portfolio Manager to gain instant insights.

Item grouping

Group tasks in a table by status, assignee, or other custom attributes for easy tracking and management.

Mobile accessibility

Stay on top of all your operations from the palm of your hand, even on the go!

Data-driven decision making

Predict risks, prevent bottlenecks, and make sound decisions rooted in data.

Democratized data

Access for everyone: no coding, data analyst skills, or complicated setup required.

Customise as you like

Simple drag-and-drop configuration lets you view and use the information you need.

Real-time sync

Lightning-fast insights, delivered live, that can inform, inspire, and incite action.

Public links and PDF creation

Enable secure sharing via links between Wrike and non-Wrike users.

Knowledge is power

Wrike's industry-leading data model, designed to capture fine details about how work is structured, planned, and delivered across an organization, surfaces insights in real time. This game-changing model has been used to process over 500 billion data points on the Wrike platform, learning, adapting, and performing even better with every action.

Get started quickly

We've taken the time-consuming admin work off your plate. Set up quick-build dashboards to show the critical information your team needs — fast. Within minutes, you'll be able to:
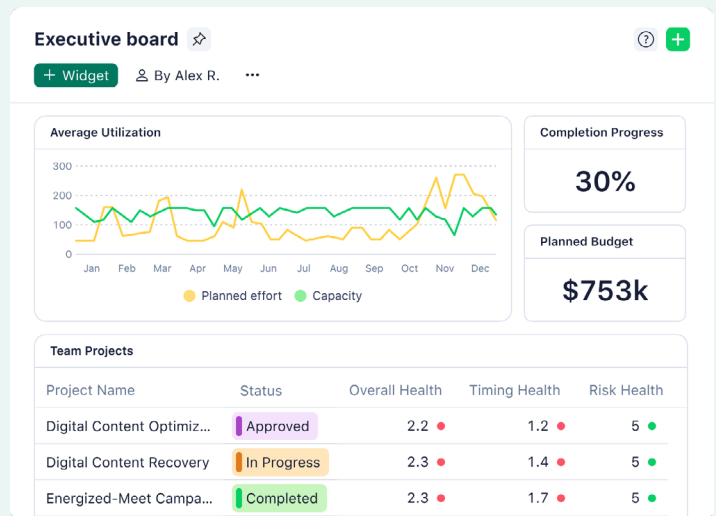

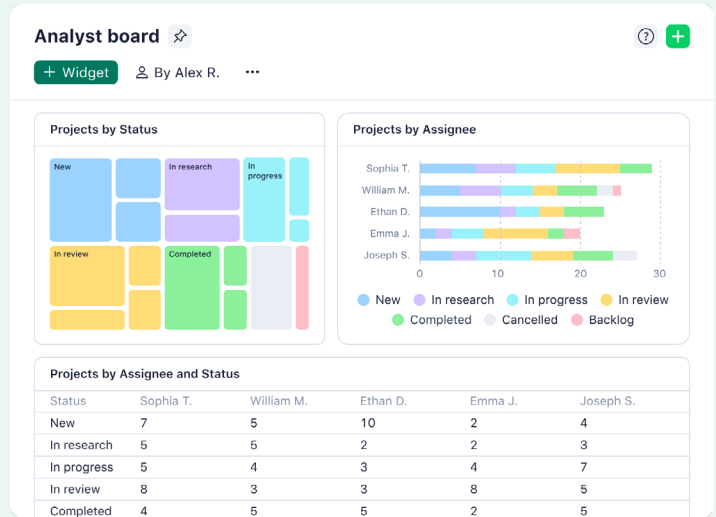

- Understand client and project profitability
- Monitor asset delivery
- See how long approvals take
- Compare different projects and dimensions in one report
- Compare time periods and see future projects and tasks
- Report ROI internally and externally

... plus much more!

Create personalized dashboards from scratch

How do dashboards work? Simply choose the widgets you need and proactively track key indicators. For example:

- **Chart widgets** enable you to visualize patterns and relationships in complex numerical data at a glance.

- The **calendar widget** allows you to view changes in task delivery and see how they impact the timeline.

- **Custom item types and custom fields** let you tailor your metrics to suit your unique way of working.

- **Pivot tables** help you explore and summarize data efficiently, showcasing exactly what you need.

- The **activity stream widget** shows updates in chronological order keeping your information current.
