

Driving costs down and employee health up — all in one solution.

Collective Health is a technology and services company that's fundamentally making health benefits work better for everyone — starting with the 165M+ Americans covered by their employer.

We've created the leading health benefits platform that brings together medical, dental, vision, pharmacy, and program partners into an integrated solution that enables employees and their families to better understand, navigate, and pay for healthcare.

We've built a single, highly configurable platform that offers employers the flexibility to bring their health benefits strategy to life and a simple and engaging member experience that their employees want to use.

It all adds up to a better healthcare experience at a lower total cost of care.

“

From the beginning of implementation, it was clear that Collective Health wasn't just a vendor. They were going to be a true strategic partner.
