# Effluent Exceedance Violations on the NPDES Noncompliance Report (NNCR)

---

March 2022

# Purpose

- Understand when effluent exceedance violations are generated
- Learn about the underlying rules supporting effluent exceedance violations on the quarterly NNCR
- Understand how to find more information

*This presentation is an advanced training and assumes you have attended the Quarterly NNCR training. If not, you can view a recorded training on the [ECHO Training](#) page.*

# Agenda

1. Violation generation
2. Effluent exceedance violation terminology
3. Violation detections (category I versus II)
4. Violation resolutions
5. Data refresh and quarterly report criteria
6. Accessing the quarterly NNCR
7. Next steps and questions

# What is an Effluent Exceedance Violation?

- NPDES permittees are required to periodically report their self-monitoring results on discharge monitoring reports (DMRs)
- Effluent exceedance violations are generated when a reported DMR value exceeds the limit value
  - Includes exceedances of base (permit) limits, permit modification limits, stay limits, and enforcement limits
  - Does not include DMRs where the reported value exceeds an alert or benchmark limit

# Effluent Exceedance Violation Code

There is one effluent exceedance violation code:

- E90: DMR, Limited - Numeric Violation

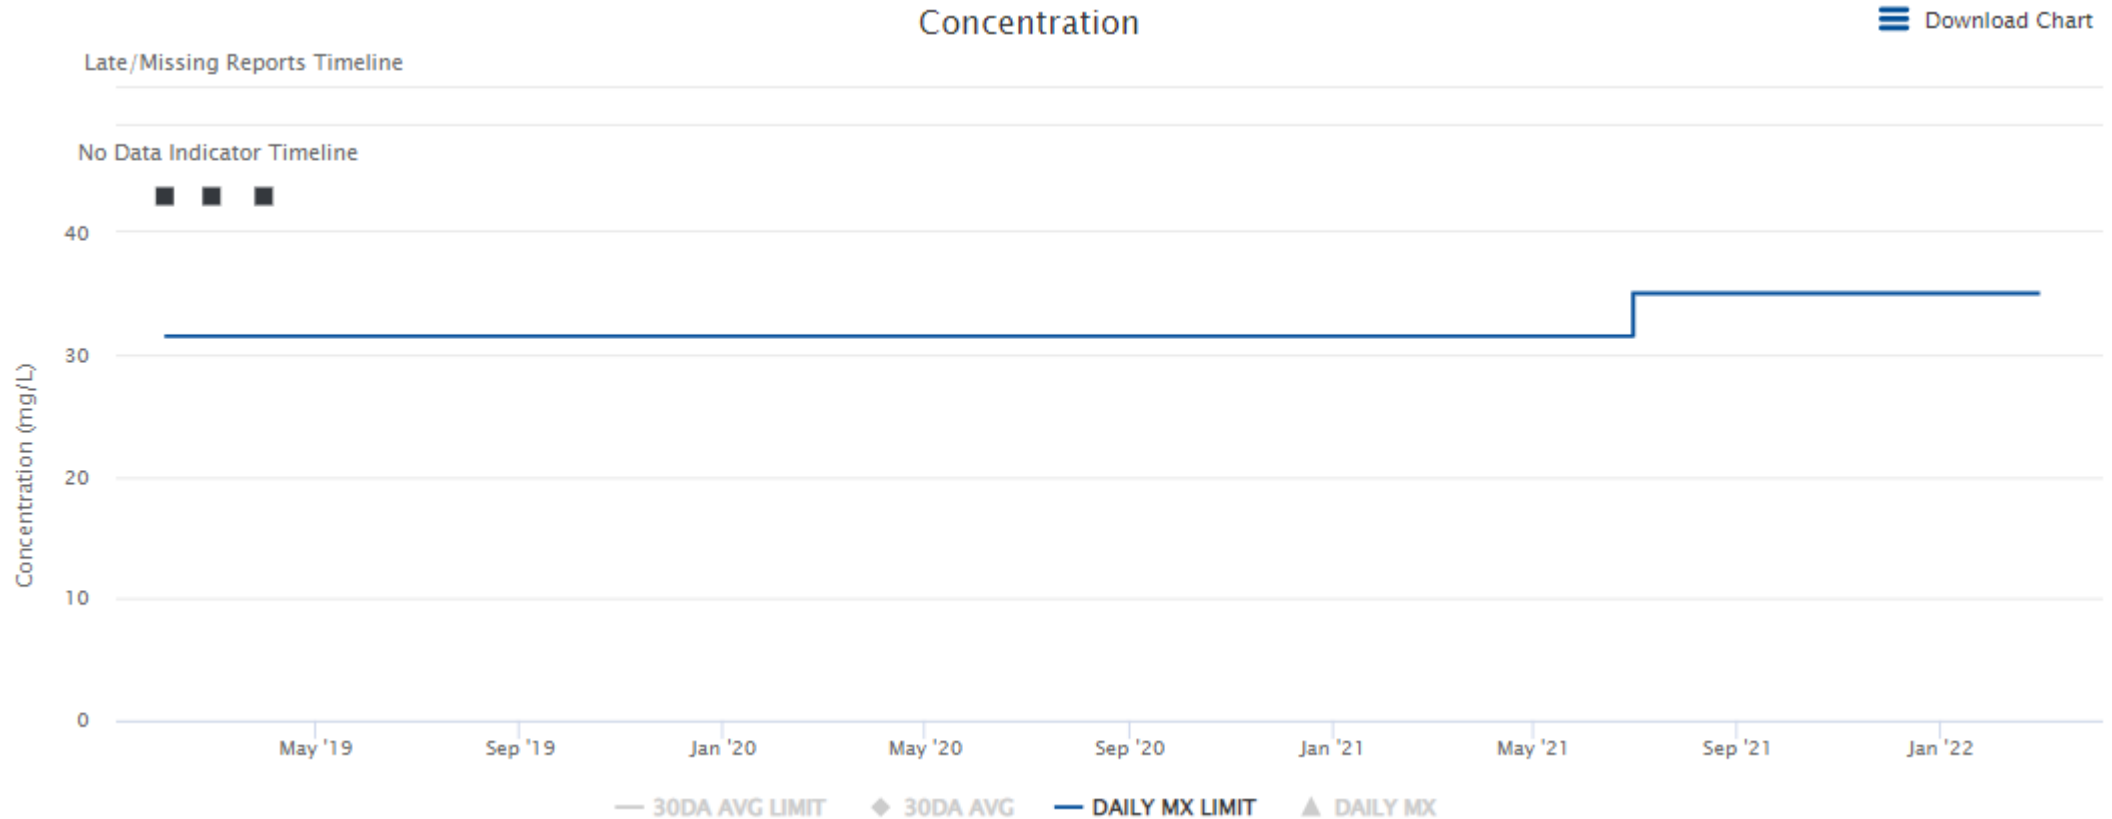

# Effluent Exceedance Violation Generation

Effluent exceedance violations are uniquely identified by the following set of data:

- NPDES ID
- Permitted Feature (outfall)
- Limit Set
- Monitoring Period End Date
- Parameter
- Monitoring Location
- Value Type (concentration or quantity)

Example from ICIS-NPDES: 00620 - Nitrogen, nitrate total [as N], Monitoring Location = 1, Season ID = 0

Limit Type	Start Date	End Date	Months	Units	C3	Statistical Base
Base Limit	11/1/2018	9/30/2023	All	mg/L	31.5	Daily Max
Enforcement Limit	6/1/2021	6/30/2024	All	mg/L	35.0	Daily Max

Enforcement Limit	6/1/2021	6/30/2024	All	mg/L	35.0	Daily Max

# Percent Exceedance

- The database calculates a percentage the DMR value exceeded the limit, rounded to the nearest whole number
- Effluent exceedance violations can have 0 percent exceedance
  - E.g., Limit value  $< 1$  and DMR value = 1
- There are percent exceedances in the database that are not the true values (e.g., 99,999 and 2,147,483,650) and the NNCR displays “Limit Violation” in place of the numeric value

# Pollutant Groups

## Group 1

- Oxygen Demand
- Solids
- Nutrients
- Detergents and Oils
- Minerals
- Metals
  - Aluminum
  - Cobalt
  - Iron
  - Vanadium

## Group 2

- Metals (all forms)
  - Other metals not specifically listed under Group 1
- Inorganic
  - Cyanide
  - Total Residual Chlorine
- Organics
  - All organics are Group 2 except those specifically listed under Group 1

# Statistical Base Types

1. Monthly Average
  - Inclusive of statistical base codes that include monthly or 30-day or daily, geometric or arithmetic, and average or mean in the description
2. Non-monthly Average
  - All maximum, total, and averages (other than monthly average) statistical base codes
3. Minimum

# Technical Review Criteria (TRC)

- Establishes a threshold for effluent exceedance violations that equal or exceed the limit by 20 or 40 percent in any two or more months in a 6-month period at the same permitted feature, monitoring location, parameter, and statistical base type.
  - Group I Pollutant TRC = 1.4
  - Group II Pollutants TRC = 1.2
- Parameters without a pollutant group and/or minimum limits are not evaluated for technical review criteria.
- Instead of using “TRC” in the NNCR, these violations include the description “magnitude.”

# Chronic Criteria

- Establishes a threshold for effluent exceedance violations that exceed the limit by any amount in any four or more months during a 6-month period at the same permitted feature, monitoring location, parameter, and statistical base type.
- Parameters without a pollutant group and/or minimum limits are not evaluated for chronic criteria.

# Category I versus II

---

# Violation Category

40 CFR §123.45 requires every violation to be designated as a Category I or II violation. The regulation includes specific criteria for Category I violations. All violations that do not meet Category I criteria must be designated Category II.

For effluent exceedance violations, there are four criteria for Category I:

- Any exceedance of an enforcement limit
- TRC exceedances of monthly average limits for group I and II pollutants
- Chronic exceedances of monthly average limits for group I and II pollutants
- Any violation or group of violations, which in the discretion of the State Director or EPA, are considered to be of concern

# Violation Detection

Effluent exceedances violations have 9 possible violation detections:

Detection Code	Detection Description	Violation Category
E1A	Effluent – Magnitude Monthly Average	1
E1B	Effluent – Chronic Monthly Average	1
E2C	Effluent – Monthly Average	2
E2D	Effluent – Magnitude Non-monthly Average	2
E2E	Effluent – Chronic Non-monthly Average	2
E2F	Effluent – Non-monthly Average	2
E2G	Effluent – Minimum	2
E1H	Effluent – Enforcement	1

# NNCR Interpretation

For effluent exceedance violations, there are four criteria for Category I:

- **Any exceedance of an enforcement limit**
- TRC exceedances of monthly average limits for group I and II pollutants
- Chronic exceedances of monthly average limits for group I and II pollutants
- Any violation or group of violations, which in the discretion of the Director or EPA, are considered to be of concern

Effluent exceedance violations that **do not** meet Category I criteria:

- Effluent violations of monthly average limits that do not meet TRC or chronic criteria
- Effluent violations of non-monthly averages
- **Effluent violations of minimum limits**

For each effluent exceedance limit violation for a NPDES ID, permitted feature, monitoring location, and parameter, follow the steps below to determine the violation's detection code and order the violations are evaluated:

Detection Code	Detection Description	Violation Category
E1A	Effluent – Magnitude Monthly Average	1
E1B	Effluent – Chronic Monthly Average	1
E2C	Effluent – Monthly Average	2
E2D	Effluent – Magnitude Non-monthly Average	2

# Violation Resolution

---

# Violation Resolution Hierarchy

- Each violation can only have 1 violation status
- There is a hierarchy of violation statuses:
  1. Resolved
  2. Resolved Pending
  3. Unresolved

The *first* resolution that applies to the highest status in the hierarchy is the resolution description and date associated with the violation.

# Violation Resolution Hierarchy

Effluent exceedance violations have 6 possible violation resolutions:

Resolution Code	Resolution Description	Violation Status
RP1	Formal Enforcement with Compliance Schedule	Resolved Pending
RP2	Resolved Pending - Manual	Resolved Pending
R2	Effluent - 3 Months Clean	Resolved
R3	Closure of Formal Enforcement	Resolved
R5	Resolved – Manual	Resolved
R6	Permit Terminated	Resolved

# Manual Resolutions

## Resolved Pending - Manual

- Violation Status = Resolved Pending
- Resolution Date = Manually entered by the regulatory authority

## Resolved - Manual

- Violation Status = Resolved
- Resolution Date = Manually entered by the regulatory authority

# Effluent - 3 Months Clean

- Violation Status = Resolved
- Resolution Date = 6-month window end date when the 3 months clean criteria first applies
- Applies when DMR data for the permitted feature, parameter, monitoring location, and statistical base type have not had any violations, effluent or DMR reporting, in the last three months of the 6-month review period and numeric DMR data or NODI B or Q was reported.
  - Caveat: if data is reported late and does not contain effluent exceedances, 3 months clean criteria can still apply
- This resolves violations from within and before the 6-month review period.

  - If the violation detection date is before the final order's issued/entered date, the resolution date = issued/entered date
  - If the violation detection date is after the final order's issued/entered date, the resolution date is set to the violation's detection date
- Applies when a effluent exceedance violation is linked to a
  - Formal enforcement action non-penalty final order or a state-issued Administrative Penalty Order with or without Injunctive Relief and a compliance schedule, and
  - The final order *does not have* a NPDES Closed Date

# Closure of Formal Enforcement

  - Formal enforcement action non-penalty final order or a state-issued Administrative Penalty Order with or without Injunctive Relief and a compliance schedule, and
  - The final order *has* a NPDES Closed Date

# Resolved Pending and Resolved Status Flow Chart

Code	Description
RP1	Formal Enforcement with Compliance Schedule
R3	Closure of Formal Enforcement

a - Final order must:  
 - Have at least 1 compliance schedule  
 - Cannot be a penalty order unless it is a state-issued "Administrative Penalty Order with or without Injunctive Relief"

b - Schedule event violation and SEV/other violation start date must be before the Final Order Issued/Entered Date for the violation to be able to link to the final order

c - DMR violation date must be before the NPDES Closed Date for the violation's status to change with the linkage to the enforcement action

# Permit Terminated

- Violation Status = Resolved
- Resolution Date = Permit Termination Date
- Violations resolved by a permit termination overrule manual resolutions, even if the manual resolution date is after the permit termination date.

*Note: violations with this status can still be included in enforcement actions*

# Data Refresh

---

# Data Refresh

- Each weekend, the effluent violations are evaluated in 6-month windows with monitoring period end dates from July 2020 to present, shifting the 6-month window forward one month at a time.
- Once a violation meets Category 1 criteria, it will not “downgrade” to a Category 2 in a subsequent 6-month window.
- Effluent violations within 6-month windows can fluctuate between a resolved and unresolved status with new data in subsequent 6-month windows.

# Effluent Violations by Quarter

Effluent exceedance violations will be included if it meets any of the following criteria:

- Violation end date is within the quarter (new violation)
- Violation has an unresolved status and the violation end date before the end of the quarter (ongoing violation)
- Violation has a resolved pending status and the violation end date is before the end of the quarter (resolved pending)
- Violation has a resolved status and a resolution date during the quarter (resolved)

# Quarterly NNCR Search Flow

1

Search Form

The search form is divided into three main sections:

- Report Timeframe:** Includes a dropdown for 'Quarterly Report' set to 'FY 2023 Q1' and a link for 'View Annual Report'.
- Geographic Location:** Features a dropdown for 'EPA Region (View EPA Regional Map)', a dropdown for 'State/Territory', and radio buttons for 'Facility Address' and 'Permitted Location'.
- Facility Characteristics:** Includes a text input for 'Facility Name', a dropdown for 'Find Facility Name(s) That:' set to 'Matches Exact Phrase', a text input for 'Facility ID Number', and radio buttons for 'EPA Registry ID' and 'Program System ID'. It also has radio buttons for 'Major Designation' (Any, Major, Non-Major) and 'Permitting Agency' (Any, State, U.S. EPA).

A blue 'Search' button is located at the bottom right of the form.

User-defined search criteria.

- If you have questions about the NNCR or have suggested recommendations for the workgroup to consider, please reach out to the [ECHO Help Desk](#).

The screenshot shows the top portion of the EPA ECHO website. At the top left is the EPA logo with the text "United States Environmental Protection Agency". Below this is a blue navigation bar with links for "Environmental Topics", "Laws & Regulations", "Report a Violation", and "About EPA". To the right of these links is a search bar labeled "Search EPA.gov" with a magnifying glass icon. Below the navigation bar is a secondary menu with links for "Search Options", "Analyze Trends", "Find EPA Cases", "Data Services", and "Help". On the left side, the "ECHO" logo is displayed, with the text "Enforcement and Compliance History Online" underneath. Below the logo is a breadcrumb trail: "You are here Home » Help » ECHO Training". On the right side, a "Contact Us" link is visible, with a teal arrow pointing to it from the text below.

“Contact Us” link is available at the top right of every ECHO page

Please enter your questions in the Q&A pod or raise your hand and we will unmute you to ask verbally.

# Thank you for attending today's training!

Slides and training recording will be posted on the ECHO Training (<https://echo.epa.gov/help/training>) page.

A short survey will appear on your screen momentarily, we would really appreciate your feedback.

**OMB Control Number: 2030-0051 Expiration Date: 5/31/24**

*(Pursuant to 5 CFR § 1320.12(b)(2); approval for the current collection is automatically extended on a monthly basis during OMB's review of its renewal.)*

**EPA Burden Statement:**

*"This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2010-0042). Responses to this collection of information are voluntary. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The public reporting and recordkeeping burden for this collection of information is estimated to be 4 minutes per response. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the Regulatory Support Division Director, U.S. Environmental Protection Agency (2821T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address."*
