## ***Proprietary Fund Types***

### ***Enterprise Funds***

Enterprise funds are used to account for any activity for which a fee is charged to external users for goods or services. Activities must be reported as enterprise funds if any one of the following criteria is met:

1. The activity is financed with debt that is secured solely by a pledge of the net revenue from fees and charges of the activity.
2. Laws or regulations require that the activity's costs of providing services including capital costs (such as depreciation or debt service), be recovered with fees and charges, rather than with taxes or similar revenue.

3. The pricing policies of the activity establish fees and charges designed to recover its costs, including capital costs.

The fund consists of transfers from the capital access fund in appropriated Fund 5106 and contributions made by the lenders and borrowers participating in the capital access program.

### ***Fiduciary Fund Types***

Fiduciary funds account for assets held by the State in a trustee capacity or as an agent for individuals, private organizations, other governmental units and/or other funds. With the implementation of GASB 84, Agency Funds are no longer reported in the AFR. Agency funds were reported in the FY 2020 AFR. The balances are included in Governmental Funds for FY 2021. The Comptroller has determined that the OOG does not have any funds which would qualify as Custodial Funds.

### ***Component Units***

The financial data of the individual component units are available from the component units' separately issued financial statements. Additional information about component units is disclosed in Note 19.

### ***Basis of Accounting***

The basis of accounting determines when revenue and expenditures or expenses are recognized in the accounts reported in the financial statements. The accounting and financial reporting treatment applied to a fund is determined by its measurement focus.

Governmental fund types that build the fund financial statements are accounted for using the modified accrual basis of accounting. Under the modified accrual basis, revenue is recognized in the period in which it becomes both measurable and available to finance operations of the fiscal year or liquidate liabilities existing at fiscal year-end. The State of Texas considers receivables collected within sixty days after year-end to be available and recognizes them as revenue of the current year for fund financial statements prepared on the modified accrual basis. Expenditures and other uses of financial resources are recognized when the related liability is incurred.

Governmental adjustment fund types that will build the government-wide financial statements are accounted for using the full accrual basis of accounting. The following activities are recognized in these fund types: capital assets, accumulated depreciation, unpaid employee compensable leave, unmatured debt service on general long-term liabilities, long-term capital leases, long-term claims and judgments, and full accrual revenue and expenses.

Proprietary funds are accounted for on the full accrual basis of accounting. Under the full accrual basis of accounting, revenue is recognized when earned and expenses are recognized at the time liabilities are incurred. Proprietary funds distinguish operating from non-operating items. Operating revenue and expenses result from providing services or producing and delivering goods in connection with the proprietary funds' principal ongoing operations. Operating expenses for proprietary funds include the cost of sales and services, administrative expenses and depreciation on capital assets.

Private-purpose trust funds are also accounted for on the full accrual basis of accounting. Private-purpose trust funds and other fiduciary activities are reported in separate statements of fiduciary net position and changes in fiduciary net position.

### ***Budget and Budgetary Accounting***

The budget is prepared biennially and represents appropriations authorized by the Legislature and not vetoed by the Governor (the General Appropriations Act). Unencumbered appropriations are generally subject to lapse 60 days after the end of the fiscal year for which they were appropriated.

## Assets, Liabilities, and Fund Balance / Net Position

---

### **Assets**

#### ***Cash and Cash Equivalents***

Short-term highly liquid investments with an original maturity of three months or less are considered cash equivalents.

#### ***Restricted Assets***

Restricted assets include monies or other resources restricted by legal or contractual requirements. These assets include proceeds of enterprise fund general obligation and revenue bonds and revenues set aside for statutory or contractual requirements.

#### ***Inventories and Prepaid Items***

Inventories include both merchandise inventories on hand for sale and consumable inventories. Inventories are valued at cost, generally using the last-in, first-out method. The consumption method of accounting is used to account for inventories and prepaid items that appear in the governmental and proprietary fund types. The cost of these items is expensed when the items are consumed or services received.

#### ***Loans, Contracts and Other Receivables***

Loans receivable reflects the outstanding amount of loans to outside entities which have been entered into by the Office as loans, convertible loans or as grant advances. Convertible loans held within the Texas Emerging Technology Fund (TETF) are acquired as consideration for awards made to private companies or public entities primarily for the purpose of economic development within Texas. Therefore, any impairment of these loans is recorded as gain / (loss) on other financial activity. Per GASB 33 requirements, loans receivable also reflects grant payments made through the Texas Enterprise fund which are given in advance of requirements being met. The grant advances will be reclassified as grant expenditures as requirements of the grant are met or when it has been determined that the grant requirements will not be met. Loan origination and non-refundable application fees and direct loan origination costs are not recognized as an adjustment to yield nor as part of the loan balances as these adjustments are immaterial. Grant termination agreements requiring a return of funds will reduce the balance in loans receivable when cash is received. Any remaining loan balance will be recorded as grant expense.

#### ***Equity Holdings for Economic Development***

Equity holdings held within the Texas Emerging Technology Fund (TETF) are acquired as consideration for awards made to private companies or public entities primarily for the purpose of economic development within Texas. Therefore, these holdings are recorded at cost less impairment as calculated by Texas Treasury Safekeeping Trust Company. Losses related to impairment are charged to gain / (loss) on other financial activity. Due to a change by the Comptroller this is reported as other revenue resulting in negative revenue on the financial statements.

#### ***Capital Assets***

Assets with an initial, individual cost of more than \$5,000 and an estimated useful life in excess of one year are capitalized. These assets are capitalized at cost or, if not purchased, at fair value as of the date of acquisition. Purchases of assets with governmental funds are reported as expenditures. Depreciation is reported on all "exhaustible" assets. Assets are depreciated over the estimated useful life of the asset using the straight-line method.

### **Liabilities**

#### ***Accounts Payable***

Accounts payable represents the liability for the value of assets or services received at the balance sheet date for which payment is pending.

#### ***Unearned Revenue***

Unearned revenue is revenue received but not yet earned at the end of the fiscal year.

#### ***Employees' Compensable Leave Balances***

Employees' compensable leave balances represents the liability that occurs due to relevant events such as resignations, retirements and uses of leave balances by covered employees. Liabilities are reported separately as either current or non-current in the statement of net assets. These obligations are normally paid from the same funding source from which each employee's salary or wage compensation was paid.

### ***Bonds Payable – General Obligation Bonds***

The unmatured principal of general obligation bonds is accounted for in the long-term liabilities adjustment column for governmental activities and in proprietary funds for business-type activities. These payables are reported as current long-term liabilities for amounts due within one year and noncurrent long-term liabilities for amounts due thereafter in the statement of net assets. The bonds are reported at par, net of unamortized premiums, discounts, issuance costs and gains / (losses) on bond refunding activities.

For governmental activities, bond proceeds are accounted for when received as an “other financing source” in the governmental fund receiving the proceeds. Payment of principal and interest is an expenditure recorded in the debt service fund. All bond transactions and balances for business-type activities are reported in proprietary funds.

### ***Bonds Payable – Revenue Bonds***

Revenue bonds are accounted for in proprietary funds for business-type activities and in the long-term liabilities adjustment column for governmental activities. These payables are reported as current long-term liabilities for amounts due within one year and noncurrent long-term liabilities for amounts due thereafter in the statement of net assets. The bonds are reported at par, net of unamortized premiums, discounts, issuance costs and gains/(losses) on bond refunding activities.

### ***Fund Balance / Net Position***

The difference between fund assets plus deferred outflows of resources and liabilities plus deferred inflows of resources is “net position” on the government-wide, proprietary and fiduciary fund statements, and the “fund balance” is the difference between fund assets plus deferred outflows of resources and liabilities plus deferred inflows of resources on the governmental fund statements.

### ***Fund Balance Components***

Fund balances for governmental funds are classified as nonspendable, restricted, committed, assigned or unassigned in the fund financial statements.

- 1) Nonspendable fund balance includes amounts not available to be spent because they are either (1) not in spendable form or (2) legally or contractually required to be maintained intact.
- 2) Restricted fund balance includes those resources that have constraints placed on their use through external parties or by law through constitutional provisions. Fund balances of the following funds not classified as nonspendable have been classified as restricted:
  - Federal fund balances which are accounted for in the Governor’s Office Federal Projects Fund 0224, the Criminal Justice Planning Fund 0421, and the Coronavirus Relief Fund 0325 have been classified as restricted.
  - Fund balances of the Small Business Incubator Fund 0588, the Texas Product Development Fund 0589 and the Texas Military Revolving Loan Fund 5114 have been classified as restricted since these funds were established in the Texas Constitution. The Small Business Incubator Fund and the Texas Product Development Fund were established in Article XVI and the Texas Military Revolving Loan Fund was established in Article III.
- 3) Committed fund balance can be used only for specific purposes pursuant to constraints imposed by a formal action of the Texas Legislature, the state’s highest level of decision making authority. Fund balances of the general revenue dedicated funds and the blended component units which are not classified as nonspendable or restricted have been classified as committed.
- 4) Assigned fund balance includes amounts constrained by the state’s intent to be used for specific purposes, but are neither restricted nor committed. Intent is expressed by (1) the Texas Legislature or (2) a body or official to which the governing body has delegated the authority to assign amounts to be used for specific purposes.
- 5) Unassigned fund balance is the residual classification for the general fund. This classification represents fund balance that was not assigned to other funds and was not restricted, committed or assigned to specific purposes within the general fund.

***Invested In Capital Assets, Net Of Related Debt***

Invested in capital assets, net of related debt consists of capital assets, net of accumulated depreciation and reduced by outstanding balances for bond, notes and other debt that are attributed to the acquisition, construction or improvement of those assets.

***Net Position Components***

Net position for proprietary funds are classified as restricted net position or unrestricted net position in the fund financial statements.

- 1) Restricted net position results when constraints placed on net resources are either externally imposed by creditors, grantors, contributors and the like or imposed by law through constitutional provisions or enabling legislation.
- 2) Unrestricted net position consists of net resources that do not meet the definition of the two preceding categories. Unrestricted net position often has constraints on resources that are imposed by management but can be removed or modified.

***Fiduciary Net Position Held in Trust***

Fiduciary net position held in trust consists of net resources held in a trustee or agency capacity for others.

**Interfund Activities and Balances**

---

The Office has the following types of transactions between funds and/or agencies:

- 1) Transfers: Legally required transfers that are reported when incurred as “transfers in” by the recipient fund and as “transfers out” by the disbursing fund.
- 2) Reimbursements: Reimbursements are repayments from funds responsible for expenditures or expenses to funds that made the actual payment. Reimbursements of expenditures made by one fund for another are recorded as expenditures in the reimbursing fund and as a reduction of expenditures in the reimbursed fund. Reimbursements are not displayed in the financial statements.
- 3) Interfund receivables and payables: Interfund loans are reported as interfund receivables and payables. If repayment is due during the current year or soon thereafter, the balance is classified as “current.” Balances for repayment due in two (or more) years are classified as “noncurrent.”

**NOTE 15: Contingencies and Commitments**

Federal Assistance

The Office has received several federal grants for specific purposes.

There are a variety of contingencies that may arise in the future as to these funds, but at this time, management does not anticipate that any of these contingencies will be material and any other impacts are unknown at this time.

Loan Loss Reserve Account

The Loan Loss Reserve Account is likely to experience losses from defaults on loans in the Capital Access (Cap Access) Program. Claims which are significant for the program have been filed by LiftFund. PeopleFund has not indicated it has any pending claims. The Cap Access program is managed by the Economic Development Bank. The balance in the Cap Access Loan Loss Reserve Account is less than \$500,000, so any claims would be insignificant in relation to the overall financial position of the Economic Development Bank.

Unpaid Claims and Lawsuits

The Governor of the State of Texas or staff of the Office are defendants in pending litigation. While plaintiffs may seek attorney fees and damages in these lawsuits, no liability is recorded because adverse rulings with attendant financial liability are purely speculative at this time.

Contingent Revenue

Future contingent revenues generated by the Emerging Technology Fund (5124) such as royalties and intellectual property rights will be recorded as revenue to the Governor's University Research Initiative (5161) when collected.
