Free your business to accelerate into change

HP Managed Print Services: Cloud Services
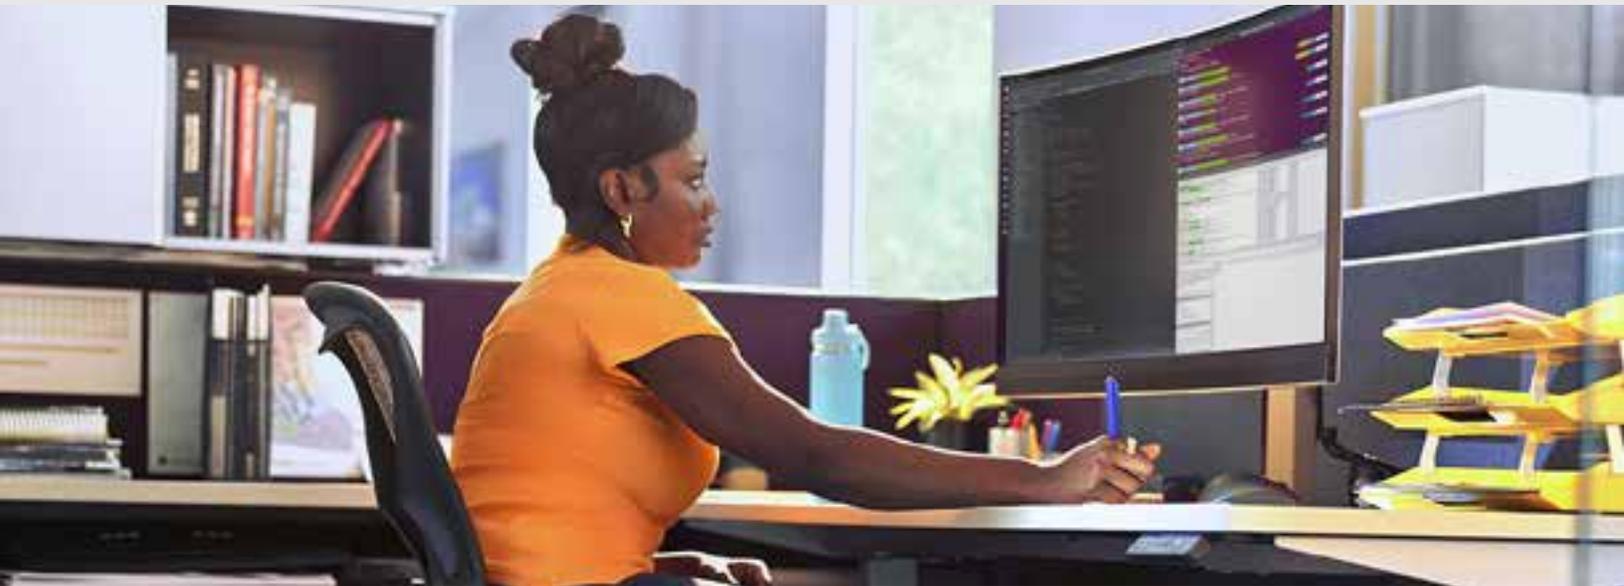

Securely elevate your print ecosystem to the cloud with a fully managed experience across home, office, public, and shared spaces

While organizations respond to urgent demands to transition to the cloud, they may overlook the print environment. Even if printing is on IT's radar, their time and resources are often barely enough to keep on top of day-to-day management tasks. There's little time and not enough people for all current and new projects.

HP Managed Print Cloud Services helps you implement a comprehensive transition to the cloud. Designed to align to your print environment, you can count on HP to provide the right fit for your organization.

FREE UP IT RESOURCES

HP Managed Print Cloud Services is globally managed and delivers an always-on print environment with layered HP Wolf Security.

With a pre-built stack of infrastructure services, Managed Print Cloud Services print application modules are developed, automated, cost-optimized, and tested for scalability and performance.

CONTINUOUS INNOVATION

With multiple deployment and application options, HP can help you to choose the right cloud strategy, while you retain the ability to scale and change as needed.

OUTCOME-ORIENTED, END-TO-END SERVICE

Managed Print Cloud Services is a comprehensive service, providing infrastructure installation and hosting, server and application management, and security services.

SECURE BY DESIGN

Count on HP's decades of experience designing quality print architectures. Managed Print Cloud Services is pre-tested and audited for security and privacy, failover, and rapid updates.

Make sure your cloud strategy includes print

Accelerate your solution deployment schedules and deliver more innovation and time-to-value to your business using a centrally managed, agile print solution.

From a Trusted or Zero Trust cloud environment, HP provisions all require virtual servers, storage, networking, software, and solutions to run and deliver the whole managed service with minimal need of your IT personnel.
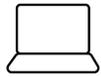

Elevate IT impact

Let HP manage your print environment so technical teams can focus on reinventing how the business works. HP can help optimize costs, maximize resources and personnel, and reduce the hassle of print management.

Managed Print Cloud Services provides global, managed services for secure, always-on printing that encompasses your firmware, solutions, and servers.

Proactive infrastructure and security monitoring with optimized upgrade strategies let you minimize downtime and service calls.

Help lower your technical debt

The key to game-changing digital transformation is pioneering, cloud-powered technology that lets you go further, faster.

Let HP manage ongoing maintenance, monitoring, security, and reporting. With a cloud template that can be designed once and deployed globally, you can dynamically adapt and scale to meet the changing needs of your business. That translates to the ability to quickly deploy your print applications and environment to different locations.

To help meet sustainability goals, migrating print solutions from on-premise data centers to the HP cloud can help keep your carbon footprint down.
