

Download the free IFIS App!

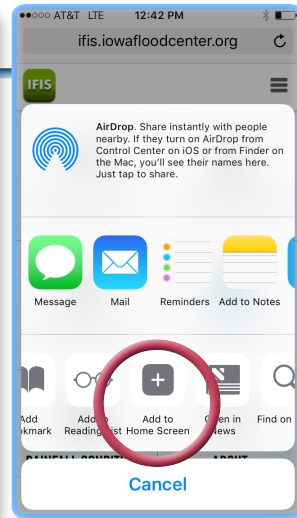

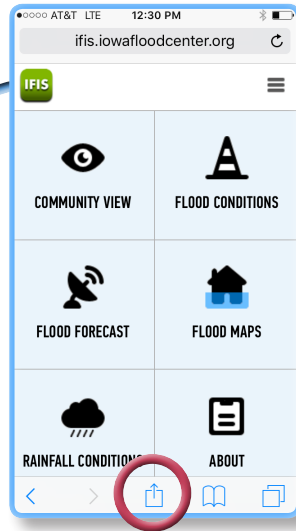

The Iowa Flood Information System (IFIS) has a new responsive design compatible with smartphones and tablets. Using a browser, preferably Chrome, download the IFIS App on your device for convenient use anytime, anywhere!

Using your smartphone or tablet, enter ifis.iowafloodcenter.org/ifis/mobile into your browser.

Then follow these easy, two-click download instructions.

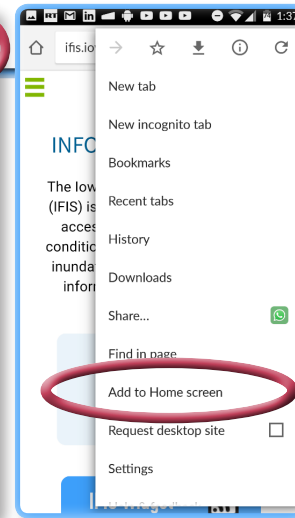

For **iPhone** users:

1. Click download icon
2. Click "Add to Home Screen"

For **Android** users:

1. Click menu button
2. Click "Add to Home screen"

Automated Alerts via IFIS!

A new Iowa Flood Information System (IFIS) service is changing how Iowans receive essential information about flooding. Automated alerts are sent via text message, phone call, or social media when sensors measure certain river levels.

You select an IFIS sensor, define alert criteria, and choose a corresponding action. For example, you could select a Cedar Rapids sensor and set 15 feet as the stage height that triggers alerts. If 15 feet is reached or exceeded, IFIS would send a customized message alerting you to flood warnings.

1. Enter ifis.iowafloodcenter.org/ifis/ in your browser and click on “Text Alerts.”

IOWA FLOOD INFORMATION SYSTEM

The Iowa Flood Information System (IFIS) is a one-stop web-platform to access community-based flood conditions, forecasts, visualizations, inundation maps and flood-related information, visualizations and applications
