
THE VIRGINIA REGISTER INFORMATION PAGE

THE VIRGINIA REGISTER is an official state publication issued every other week throughout the year. Indexes are published quarterly, and the last index of the year is cumulative. **THE VIRGINIA REGISTER** has several functions. The new and amended sections of regulations, both as proposed and as finally adopted, are required by law to be published in **THE VIRGINIA REGISTER OF REGULATIONS**. In addition, **THE VIRGINIA REGISTER** is a source of other information about state government, including all emergency regulations and executive orders issued by the Governor, the Virginia Tax Bulletin issued periodically by the Department of Taxation, and notices of public hearings and open meetings of state agencies.

ADOPTION, AMENDMENT, AND REPEAL OF REGULATIONS

An agency wishing to adopt, amend, or repeal regulations must first publish in the *Virginia Register* a notice of intended regulatory action; a basis, purpose, substance and issues statement; an economic impact analysis prepared by the Department of Planning and Budget; the agency's response to the economic impact analysis; a summary; a notice giving the public an opportunity to comment on the proposal; and the text of the proposed regulation.

Following publication of the proposal in the *Virginia Register*, the promulgating agency receives public comments for a minimum of 60 days. The Governor reviews the proposed regulation to determine if it is necessary to protect the public health, safety and welfare, and if it is clearly written and easily understandable. If the Governor chooses to comment on the proposed regulation, his comments must be transmitted to the agency and the Registrar no later than 15 days following the completion of the 60-day public comment period. The Governor's comments, if any, will be published in the *Virginia Register*. Not less than 15 days following the completion of the 60-day public comment period, the agency may adopt the proposed regulation.

The appropriate standing committee of each branch of the General Assembly may meet during the promulgation or final adoption process and file an objection with the Registrar and the promulgating agency. The objection will be published in the *Virginia Register*. Within 21 days after receipt by the agency of a legislative objection, the agency shall file a response with the Registrar, the objecting legislative committee, and the Governor.

When final action is taken, the agency again publishes the text of the regulation as adopted, highlighting all changes made to the proposed regulation and explaining any substantial changes made since publication of the proposal. A 30-day final adoption period begins upon final publication in the *Virginia Register*.

The Governor may review the final regulation during this time and, if he objects, forward his objection to the Registrar and the agency. In addition to or in lieu of filing a formal objection, the Governor may suspend the effective date of a portion or all of a regulation until the end of the next regular General Assembly session by issuing a directive signed by a majority of the members of the appropriate standing committees and the Governor. The Governor's objection or suspension of the regulation, or both, will be published in the *Virginia Register*. If the Governor finds that changes made to the proposed regulation have substantial impact, he may require the agency to provide an additional 30-day public comment period on the changes. Notice of the additional public comment period required by the Governor will be published in the *Virginia Register*.

The agency shall suspend the regulatory process for 30 days when it receives requests from 25 or more individuals to solicit additional public comment, unless the agency determines that the changes have minor or inconsequential impact.

A regulation becomes effective at the conclusion of the 30-day final adoption period, or at any other later date specified by the promulgating agency, unless (i) a legislative objection has been filed, in which event the regulation, unless withdrawn, becomes effective on the date specified, which shall be after the expiration of the 21-day extension

period; (ii) the Governor exercises his authority to require the agency to provide for additional public comment, in which event the regulation, unless withdrawn, becomes effective on the date specified, which shall be after the expiration of the period for which the Governor has provided for additional public comment; (iii) the Governor and the General Assembly exercise their authority to suspend the effective date of a regulation until the end of the next regular legislative session; or (iv) the agency suspends the regulatory process, in which event the regulation, unless withdrawn, becomes effective on the date specified, which shall be after the expiration of the 30-day public comment period.

Proposed regulatory action may be withdrawn by the promulgating agency at any time before the regulation becomes final.

EMERGENCY REGULATIONS

If an agency demonstrates that (i) there is an immediate threat to the public's health or safety; or (ii) Virginia statutory law, the appropriation act, federal law, or federal regulation requires a regulation to take effect no later than (a) 280 days from the enactment in the case of Virginia or federal law or the appropriation act, or (b) 280 days from the effective date of a federal regulation, it then requests the Governor's approval to adopt an emergency regulation. The emergency regulation becomes operative upon its adoption and filing with the Registrar of Regulations, unless a later date is specified. Emergency regulations are limited to addressing specifically defined situations and may not exceed 12 months in duration. Emergency regulations are published as soon as possible in the *Register*.

During the time the emergency status is in effect, the agency may proceed with the adoption of permanent regulations through the usual procedures. To begin promulgating the replacement regulation, the agency must (i) file the Notice of Intended Regulatory Action with the Registrar within 60 days of the effective date of the emergency regulation; and (ii) file the proposed regulation with the Registrar within 180 days of the effective date of the emergency regulation. If the agency chooses not to adopt the regulations, the emergency status ends when the prescribed time limit expires.

STATEMENT

The foregoing constitutes a generalized statement of the procedures to be followed. For specific statutory language, it is suggested that Article 2 (§ 9-6.14:7.1 et seq.) of Chapter 1.1:1 of the Code of Virginia be examined carefully.

CITATION TO THE VIRGINIA REGISTER

The *Virginia Register* is cited by volume, issue, page number, and date. **12:8 VA.R. 1096-1106 January 8, 1996**, refers to Volume 12, Issue 8, pages 1096 through 1106 of the *Virginia Register* issued on January 8, 1996.

"THE VIRGINIA REGISTER OF REGULATIONS" (USPS-001831) is published bi-weekly, with quarterly cumulative indices published in January, April, July and October, for \$100 per year by the Virginia Code Commission, General Assembly Building, Capitol Square, Richmond, Virginia 23219. Telephone (804) 786-3591. Periodical Postage Rates Paid at Richmond, Virginia. **POSTMASTER:** Send address changes to **THE VIRGINIA REGISTER OF REGULATIONS, 910 CAPITOL STREET, 2ND FLOOR, RICHMOND, VIRGINIA 23219.**

The Virginia Register of Regulations is published pursuant to Article 7 (§ 9-6.14:22 et seq.) of Chapter 1.1:1 of Title 9 of the Code of Virginia. Individual copies, if available, may be purchased for \$4.00 each from the Registrar of Regulations.

Members of the Virginia Code Commission: **Joseph V. Gartlan, Jr.**, Chairman; **W. Tayloe Murphy, Jr.**, Vice Chairman; **Robert L. Calhoun;** **Bernard S. Cohen;** **Jay W. DeBoer;** **Frank S. Ferguson;** **J. Randy Forbes;** **James E. Kulp;** **E.M. Miller, Jr.;** **James B. Wilkinson.**

Staff of the Virginia Register: **Jane D. Chaffin**, Registrar of Regulations.

CUMULATIVE TABLE OF VIRGINIA ADMINISTRATIVE CODE SECTIONS ADOPTED, AMENDED, OR REPEALED

The table printed below lists regulation sections, by Virginia Administrative Code (VAC) title, that have been amended, added or repealed in the *Virginia Register* since the regulations were originally published or last supplemented in VAC (the Fall 1998 VAC Supplement includes final regulations published through *Virginia Register* Volume 14, Issue 25, dated August 31, 1998). Emergency regulations, if any, are listed, followed by the designation "emer," and errata pertaining to final regulations are listed. Proposed regulations are not listed here. The table lists the sections in numerical order and shows action taken, the volume, issue and page number where the section appeared, and the effective date of the section.

SECTION NUMBER	ACTION	CITE	EFFECTIVE DATE
Title 1. Administration			
1 VAC 30-130-10	Amended	15:1 VA.R. 44 (4390)	9/15/98
1 VAC 30-140-10	Amended	15:7 VA.R. 978	12/1/98
Title 2. Agriculture			
2 VAC 20-50-10 et seq.	Repealed	15:11 VA.R. 1692	3/17/99
2 VAC 20-51-10 through 2 VAC 20-51-210	Added	15:11 VA.R. 1693-1700	3/17/99
Title 4. Conservation and Natural Resources			
4 VAC 15-320-20	Amended	15:5 VA.R. 574	1/1/99
4 VAC 15-320-30	Amended	15:5 VA.R. 575	1/1/99
4 VAC 15-320-100	Amended	15:5 VA.R. 575	1/1/99
4 VAC 15-320-120	Amended	15:5 VA.R. 576	1/1/99
4 VAC 15-320-160	Added	15:5 VA.R. 576	1/1/99

TITLE 9. ENVIRONMENT

VIRGINIA WASTE MANAGEMENT BOARD

Notice of Intended Regulatory Action

Notice is hereby given in accordance with § 9-6.14:7.1 of the Code of Virginia that the Virginia Waste Management Board intends to consider amending regulations entitled: **9 VAC 20-60-12 et seq. Virginia Hazardous Waste Management Regulations (Amendment 15)**. The purpose of the proposed action is to update the regulations regarding transportation, treatment, storage, and disposal of hazardous waste so as to protect the public health, natural resources and environment; maintain consistency with federal requirements; and maintain authorization. By maintaining the equivalence of its regulations with those issued by the United States Environmental Protection Agency (USEPA) under the Resource Conservation and Recovery Act of 1976 (RCRA) and the Hazardous and Solid Waste Amendments of 1984 (HSWA), the Commonwealth remains eligible to carry out its own hazardous waste management program and be an authorized state under the federal acts.

Amendment 15 will consider incorporation of changes in the federal regulations in Title 40 of the Code of Federal Regulations occurring since Amendment 14 through July 1, 1998, including amendments promulgated in the Federal Register on, at least, the following dates: January 3, 1995, December 6, 1994, January 13, 1995, February 9, 1995, April 17, 1995, May 12, 1995, April 4, 1995, May 19, 1995, June 29, 1995, July 11, 1995, September 29, 1995, October 30, 1995, December 11, 1995, February 9, 1996, March 26, 1996, April 8, 1996 (2), April 30, 1996, June 28, 1996, July 10, 1996, August 26, 1996, February 17, 1997, April 12, 1996, July 1, 1996, December 6, 1994, May 19, 1995, September 29, 1995, November 13, 1995, February 9, 1996, June 5, 1996, November 23, 1996, January 14, 1997, February 12, 1997, May 12, 1997, June 13, 1997, June 17, 1997, July 14, 1997, August 28, 1997, December 5, 1997, December 8, 1997, April 15, 1998, May 4, 1998, June 29, 1998, May 6, 1998, July 14, 1998, May 26, 1998, June 8, 1998, and June 19, 1998. These amendments of the federal regulations address, at least, the following items:

1. Revisions of the Universal Treatment Standards regarding land disposal restrictions or related changes;
2. Revisions to listings and exemptions of certain carbamate chemicals production wastes (U and K listings);
3. Housekeeping changes related to adoption errors and obsolete provisions;

4. Adoption of additional test methods related to rules that prohibit liquids in landfills;

5. New rules about the public participation process in the permitting of storage, treatment and disposal facilities and for test burns at incinerators and combustion facilities;

6. Correction of adoption errors in the exclusion rules for recovered oil which is recycled;

7. Addition of rules related to Phase III of the land disposal restriction and treatment standards concerning carbamate pesticide production wastes, primary aluminum production wastes, characteristic wastes, listed wastes, and wastes that are diluted;

8. Identification of import and export wastes subject to the graduated system of controls under the Organization for Economic Cooperation and Development;

9. Revisions of rules for disposal of wastes from conditionally exempt small quantity generators;

10. Adoption of additional air standards for the control of organic emissions from tanks, surface impoundments, containers and miscellaneous units, including during accumulation of waste on-site;

11. Extensions of the national capacity variance (under Phase III of the Land Disposal Restrictions) for spent potliners for primary aluminum production;

12. Adoption of Military Munitions Rule, which identifies when conventional and chemical military munitions become a hazardous waste, provides rules for the safe storage and transport of such waste, changes rules regarding emergency responses involving munitions and explosives, and exempts generators and transporters from manifest requirements on right-of-ways that are on or along the border of contiguous properties under the control of the same person;

13. Adoption of land disposal restrictions - Phase IV, which establishes treatment standards under the land disposal restrictions for waste from wood preserving operations, revises record keeping related to land disposal restrictions, regulates polymerizations as a treatment alternative, clarifies de minimis amounts exemption of characteristic wastewaters, and excludes processed circuit boards and scrap metal from regulation as hazardous wastes;

14. Update the incorporation by reference citation of SW-846, Third Edition, "Test Methods for Evaluation Solid Waste, Physical/Chemical Methods," to include changes through January 13, 1997 (through Update III);

15. Revisions and withdrawals of certain rules related to listing of carbamate wastes;

Notices of Intended Regulatory Action

16. Extension of alternate treatment standard for carbamate under the land disposal restrictions (Aug. 26, 1997, to Aug. 26, 1998);

17. Clarifications of the rules for authorization of variances from the treatment standards of the land disposal restriction regulations, and incorporation of rules requiring public participation in site specific variance considerations;

18. Amendments and clarifications of the air standards for the control of organic emissions from tanks, surface impoundments, and container;

19. Exclusions from regulation as hazardous waste of the condensates derived from the overhead gases from kraft mill steam strippers under specified conditions;

20. Additions of specific organobromine production wastes to the list of hazardous wastes and listings of land disposal treatment standards for those wastes;

21. Correction and adoption of rules related to the management standards of used oil contaminated with PCB's and other used oil;

22. Adoption of treatment standards under the land disposal restrictions for metal wastes, mineral processing waste and 12 metal constituents; adoption of land disposal prohibition and treatment standards for mineral processing waste that are ignitable, corrosive or reactive; amendment of the definition of when secondary materials being recycled are solid waste so as to exclude certain mineral processing waste; amendment of the definition of which wastes fall under the Bevill exemption; adoption of treatment standards under the land disposal restrictions for contaminated soils as waste; and adoption of corrections and clarifying provisions to the land disposal restrictions;

23. Exclusion from regulation as solid waste those fuels produced from a hazardous waste which is comparable to some currently used fossil fuels, and addition of provisions to make it easier for existing facilities to make changes to their existing permit.

In addition to the promulgated amendments of federal regulations, Amendment 15 may consider the following items:

1. Errors and omissions resulting from previous amendments of the regulations, including the change in the format of the regulations effected by Amendment 14;

2. Several amendments to the requirements for the transportation of hazardous waste, including insurance requirements; financial assurance requirements for hazardous waste management facilities; and documentation demonstrating compliance with financial assurance requirements which were recommended by commenters regarding Amendment 14, but which could not be addressed in Amendment 14 for procedural reasons;

3. Revision of the schedule of permit application fees to reflect increased cost of permit reviews;

4. Further use or expansion of the format of incorporation by reference of federal regulations;

5. Inclusion of additional waste streams as listed Universal Wastes;

6. Alterations or clarifications of the regulations concerning transfer stations and the definition of transfer stations to prevent inappropriate siting of the transfer station and abusive practices; and

7. Alterations or clarifications of the regulations concerning receipt of waste from conditionally exempt small quantity generators to prevent threats caused by amassing such waste from several generators in an inappropriate manner.

A technical advisory committee will advise the Department of Environmental Quality on what amended regulatory text to recommend to the board as proposed regulations. This panel will advise the department on less intrusive and less burdensome alternatives, where such exist, and during the public participation process, the general public will also be asked to suggest less intrusive and burdensome alternatives. The vast majority of changes to be considered will be the direct result of incorporation of federal regulatory text into Commonwealth regulations, and consistency with federal regulations is required by the Act and necessary for authorization of the Commonwealth's program by USEPA. Many of the changes to federal regulations that would be incorporated are themselves a reduction in intrusion and burden on the regulated community from prior federal requirement currently incorporated into the Commonwealth regulations. The agency intends to hold a public hearing on the proposed regulation after publication.

Statutory Authority: § 10.1-1402 of the Code of Virginia.

Public comments may be submitted until June 1, 1999.

Notice of Intended Regulatory Action

Notice is hereby given in accordance with § 9-6.14:7.1 of the Code of Virginia that the Board of Licensed Professional Counselors, Marriage and Family Therapists and Substance Abuse Treatment Professionals intends to consider amending regulations entitled: **18 VAC 115-30-10 et seq. Regulations Governing the Certification of Substance Abuse Counselors.** The purpose of the proposed action is to consider an increase in certain fees for practitioners regulated by the Board of Licensed Professional Counselors, Marriage and Family Therapists and Substance Abuse Treatment Professionals in order to comply with statutory requirements for revenues to be sufficient to cover the expenditures of the board. The agency intends to hold a public hearing on the proposed regulation after publication.

Statutory Authority: §§ 54.1-113 and 54.1-2400 of the Code of Virginia.

Public comments may be submitted until May 12, 1999.

Contact: Evelyn B. Brown, Executive Director, Board of Licensed Professional Counselors, Marriage and Family Therapists and Substance Abuse Treatment Professionals, 6606 W. Broad St., 4th Floor, Richmond, VA 23230-1717, telephone (804) 662-9933 or FAX (804) 662-9943.

Notice of Intended Regulatory Action

Notice is hereby given in accordance with § 9-6.14:7.1 of the Code of Virginia that the Board of Licensed Professional Counselors, Marriage and Family Therapists and Substance Abuse Treatment Professionals intends to consider amending regulations entitled: **18 VAC 115-40-10 et seq. Regulations Governing the Certification of Rehabilitation Providers.** The purpose of the proposed action is to consider an increase in certain fees for practitioners regulated by the Board of Licensed Professional Counselors, Marriage and Family Therapists and Substance Abuse Treatment Professionals in order to comply with statutory requirements for revenues to be sufficient to cover the expenditures of the board. The agency intends to hold a public hearing on the proposed regulation after publication.

Statutory Authority: §§ 54.1-113 and 54.1-2400 of the Code of Virginia.

Public comments may be submitted until May 12, 1999.

Roman type indicates existing text of regulations. *Italic type* indicates new text. Language which has been stricken indicates text to be deleted. [Bracketed language] indicates a change from the proposed text of the regulation.

TITLE 9. ENVIRONMENT

STATE WATER CONTROL BOARD

REGISTRAR'S NOTICE: The State Water Control Board is claiming an exemption from the Administrative Process Act for the following regulatory action. Section 9-6.14:4.1 C 12 of the Code of Virginia excludes from Article 2 of the Administrative Process Act general permits issued by the State Water Control Board pursuant to the State Water Control Law (§ 62.1-44.2 et seq.), Chapter 24 (§ 62.1-242 et seq.), and Chapter 25 (§ 62.1-254 et seq.) of Title 62.1 of the Code of Virginia if the board proceeds under the following conditions: (i) provides a Notice of Intended Regulatory Action (NOIRA) in conformance with the provisions of § 9-6.14:7.1 B; (ii) forms a technical advisory committee composed of relevant stakeholders, including potentially affected citizens groups, to assist in the development of the general permit; (iii) provides notice and receives oral and written comment as provided in § 9-6.14:7.1 F; and (iv) conducts at least one public hearing on the proposed general permit. The State Water Control Board will receive, consider and respond to petitions by any interested person at any time with respect to reconsideration or revision.

Title of Regulation: 9 VAC 25-190-10 et seq. Virginia Pollutant Discharge Elimination System (VPDES) General Permit Regulation for Nonmetallic Mineral Mining (amending 9 VAC 25-190-10, 9 VAC 25-190-20, 9 VAC 25-190-50, 9 VAC 25-190-60, and 9 VAC 25-190-70; repealing 9 VAC 25-190-30 and 9 VAC 25-190-40).

Statutory Authority: § 62.1-44.15(10) of the Code of Virginia.

Effective Date: June 30, 1999.

Summary:

The State Water Control Board adopted amendments to this general permit regulation in order to continue authorization of the discharge of wastewater and storm water from nonmetallic mineral mining facilities. This regulatory action reissues the general permit for an additional five years beyond the current expiration date of June 30, 1999. Owners covered under the expiring general permit who wish to continue to discharge under a general permit must register for coverage under the new general permit.

The general permit regulation, as amended, sets forth guidelines for the permitting of discharges from nonmetallic mineral mining operations. The general permit covers storm water discharges from all nonmetallic mineral mining activities in Standard Industrial Classification (SIC) Major Group 14, and

discharges of storm water and process wastewater from facilities classified under SIC Codes 1411, 1422, 1423, 1429, 1442, 1455, 1459 (except bentonite and magnesite mining) and 1499 (except gypsum, graphite, asbestos, diatomite, jade, tripoli and asphaltic mineral mining). The general permit reissuance consists of limitations and/or quarterly monitoring requirements on discharges of commingled storm water, mine pit dewatering and process wastewater to surface waters. There are also yearly monitoring requirements on discharges of storm waters that do not combine with other wastewaters. The requirements for storm water pollution prevention through storm water management and development of a storm water pollution prevention plan are carried over with some modifications. Minimum information requirements for all requests for coverage under the general permit are included in the regulation.

Substantial changes to the regulation amendment since it was last published are (i) a revised definition of "industrial activity" to include all SIC Major Group 14 mining activities and a reworded narrative of the purpose at 9 VAC 25-190-20 in order to allow for storm water only coverage for all Major Group 14 facilities; (ii) added language addressing filing of new registration statements by those presently covered under the nonmetallic mineral mining general permit; (iii) elimination of the second paragraph of the permit cover page; (iv) reworded Permit Part II E storm water pollution prevention plan deadline language; and (v) added storm water visual examination language in the Permit Part II H 3 d that allows identical outfalls to be sampled by representative outfalls and that allows sampling waivers. Several minor changes have been made for clarification.

Summary of Public Comments and Agency's Response: A summary of comments made by the public and the agency's response may be obtained from the promulgating agency or viewed at the office of the Registrar of Regulations.

Agency Contact: Michael B. Gregory, Department of Environmental Quality, P.O. Box 10009, Richmond, VA 23240, telephone (804) 698-4065.

9 VAC 25-190-10. Definitions.

The words and terms used in this chapter shall have the meanings defined in the State Water Control Law (§ 62.1-44.2 et seq. of the Code of Virginia), and ~~9 VAC 25-30-10~~ (the Virginia Pollutant Discharge Elimination System (VPDES) Permit Regulation (9 VAC 25-31-10 et seq.) unless the context clearly indicates otherwise, ~~except that~~. Additionally, for the purposes of this chapter:

"Co-located facility" means an industrial activity other than mineral mining operating on a site where the primary

industrial activity is mineral mining. Such an activity must have wastewater characteristics similar to those of the mineral mine and be located within the permitted mining area. The term refers to activities that are commonly found at mining sites such as manufacturing of ready-mix concrete (SIC Code 3273), concrete block and pipe (SIC Codes 3271 and 3272), and asphalt paving materials (SIC Code 2951). It does not include asphalt emulsion manufacturing or any other activity specifically excluded from this permit.

"Department" means the Virginia Department of Environmental Quality.

"Director" means the Director of the Virginia Department of Environmental Quality, or his designee or an authorized representative.

"Industrial activity" means the [facilities] where the primary purpose is [classified] as [under Standard Industrial Classification (SIC)] Code [Codes 1411, 1422, 1423, 1429, 1442, 1446, 1455, 1459, and 1499 (Office of Management and Budget (OMB) SIC Manual, 1987)]- [activity associated with mineral mining facilities generally identified by SIC Major Group 14] including active or inactive mining operations that discharge storm water that has come into contact with any overburden, raw material, intermediate products, finished products, by-products or waste products located on the site of such operations. (Inactive mining operations are mining sites that are not being actively mined, but which have an identifiable owner/operator; inactive mining sites do not include sites where mining claims are being maintained prior to disturbances associated with the extraction, beneficiation, or processing of mined materials, nor sites where minimal activities are undertaken for the sole purpose of maintaining a mining claim.) Industrial activity also includes facilities classified under other SIC codes that may be colocated within the mineral mine permit area, unless they are expressly excluded by this general permit.

"Permittee" means the owner of a nonmetallic mineral mine covered under this general permit.

"Process wastewater" means water used in the process of washing stone, noncontact cooling water, [wastewater from vehicle/equipment washing activities] and miscellaneous plant cleanup wastewaters.

"Run-off coefficient" means the fraction of total rainfall that will appear at the conveyance as run-off.

["SIC" means the Standard Industrial Classification Code or Industrial Grouping from the U.S. Office of Management and Budget Standard Industrial Classification Manual, 1987 Edition.]

"Significant materials" includes, but is not limited to, raw materials; fuels; materials such as solvents, detergents, and plastic pellets; finished materials such as metallic products; raw materials used in food processing or production; hazardous substances designated under Section 101(14) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA) (42 USC § 9601 et seq.); any chemical the owner is required to report pursuant to

Section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA) ~~Section 313~~ (42 USC § 11001 et seq.); fertilizers; pesticides; and waste products such as ashes, slag and sludge (including pond sediments) that have the potential to be released with storm water discharges.

"Storm water" means storm water run-off, snow melt run-off, and surface run-off and drainage.

"Storm water discharge associated with industrial activity" means the discharge from any conveyance which is used for collecting and conveying storm water and which is directly related to manufacturing, processing or raw materials storage areas at an industrial plant. The term does not include discharges from facilities or activities excluded from the VPDES program under ~~9 VAC 25-30-10~~ 9 VAC 25-31-10 et seq. For the categories of industries identified in the "industrial activity" definition, the term includes, but is not limited to, storm water discharges from industrial plant yards; immediate access roads and rail lines used or traveled by carriers of raw materials, manufactured products, waste material, or by-products used or created by the mineral mine; material handling sites; refuse sites; sites used for the application or disposal of process wastewaters; sites used for the storage and maintenance of material handling equipment; sites used for residual treatment, storage, or disposal; shipping and receiving areas; manufacturing buildings; storage area areas (including tank farms) for raw materials, and intermediate and finished products; and areas where industrial activity has taken place in the past and significant materials remain and are exposed to storm water. For the purposes of this paragraph, material handling activities include the storage, loading and unloading, transportation, or conveyance of any raw material, intermediate product, finished product, by-product or waste product. The term excludes areas located on plant lands separate from the plant's industrial activities, such as office buildings and accompanying parking lots as long as the drainage from the excluded areas is not mixed with storm water drained from the above described areas.

9 VAC 25-190-20. Purpose; delegation of authority; effective date of permit.

A. [The purpose of this regulation is to establish General Permit Number VAG84 to govern wastewater discharge from nonmetallic mineral mines as follows:

1. For active and inactive nonmetallic mineral mining facilities in SIC Major Group 14 the General Permit covers discharges composed entirely of storm water associated with industrial activity, except as specified in subdivision 2 of this subsection.

2.] This general permit [regulation governs authorizes] the discharge of mine pit dewatering [, and] process wastewater [and as well as] storm water associated with industrial activity from active and inactive mineral mines classified [as under] Standard Industrial Classification Codes 1411, 1422, 1423, 1429, 1442, ~~1446~~, 1455, 1459 [excluding bentonite and magnesite mines], and 1499 [, except as specified in this section.

~~The following activities shall not have coverage under this general permit: bentonite, magnesite, excluding] gypsum, graphite, asbestos, [diatomite diatomite], jade, tripoli or asphaltic mineral [mining operations, coal mines.]~~

~~[3. Coal] mining, metal mining, mineral mines which have asphalt operations located within the mineral mine permit area, and oil and gas extraction [are not covered by this general permit].~~

9 VAC 25-190-30. Delegation of authority.

~~B. The director, or his designee an authorized representative, may perform any act of the board provided under this chapter, except as limited by § 62.1-44.14 of the Code of Virginia.~~

9 VAC 25-190-40. Effective date of the permit.

~~C. This general permit will become effective on June 30, 1994. This general permit 1999, and will expire five years from after [June 30, 1994 1999 the effective date]. For any covered owner, this general permit is effective as to any covered owner upon compliance with all the provisions of 9 VAC 25-190-50 and the receipt of this general permit.~~

9 VAC 25-190-50. Authorization to discharge.

A. Any owner governed by this general permit is authorized by this to discharge to surface waters of the Commonwealth of Virginia provided that the owner files and receives acceptance by the ~~director~~ board of the registration statement of 9 VAC 25-190-60, files the required permit fee, complies with the effluent limitations and other requirements of 9 VAC 25-190-70, and provided that:

1. The owner shall not have been required to obtain an individual permit as may be required in the VPDES permit regulation (9 VAC 25-31-10 et seq.);
2. The owner shall not be authorized by this general permit to discharge to state waters ~~where specifically named in other board regulations or policies which prohibit such discharges; and~~
3. ~~The owner shall obtain the notification from the governing body of the county, city or town required by § 62.1-44.15:3 of the Code of Virginia.~~ 4. The owner shall have a mineral mining permit for the operation to be covered by this general permit which has been approved by the Virginia Department of Mines, Minerals and Energy, Division of Mineral Mining (or associated waived program, locality or state agency) under provisions and requirements of Title 45.1 of the Code of Virginia. Mineral mines owned and operated by governmental bodies not subject to the provisions and requirements of Title 45.1 of the Code of Virginia are exempt from this requirement.; and
4. The owner shall implement pollution control measures necessary to comply with the conditions and limitations of this general permit including, but not limited to, the

installation, operation and maintenance of sediment control structures.

B. The ~~director~~ board shall deny coverage under this general permit to any owner whose ~~with discharge to state waters may adversely affect a threatened or endangered species listed or proposed to be listed under the Virginia Water Quality Standards Regulation, 9 VAC 25-310-10 et seq., or Section 4 of the Endangered Species Act or if the discharge is likely to adversely affect its critical habitat or storm water discharge-related activities which the board determines cause, may reasonably be expected to cause, or may be contributing to a violation of water quality standards, including discharges or discharge-related activities that are likely to adversely affect aquatic life.~~

C. Receipt of this general permit does not relieve any owner of the responsibility to comply with any other federal, state or local statute, ordinance or regulation.

9 VAC 25-190-60. Registration statement and notice of termination.

A. The owner shall file a complete general VPDES permit registration statement, which will serve as a notice of intent for coverage under the general permit for nonmetallic mineral mining. Any owner proposing a new discharge shall file the registration statement at least ~~60~~ 30 days prior to the date planned for ~~commencing construction or~~ operation of the mineral mine. Any owner of an existing mineral mine covered by an individual VPDES permit who is proposing to be covered by this general permit shall file the registration statement at least ~~120~~ 180 days prior to the expiration date of the individual VPDES permit. [Any owner of an existing mineral mine covered by the general VPDES permit for nonmetallic mineral mining that became effective on June 30, 1994, who wishes to remain covered by this general permit shall file a new registration statement by June 1, 1999, in order to avoid a lapse in coverage.] Any owner of an existing mineral mine not currently covered by a VPDES permit who is proposing to be covered by this general permit shall file the registration statement ~~within 30 days of the effective date of the general permit.~~ The required registration statement shall be in the following form contain the following information:

VIRGINIA POLLUTANT DISCHARGE ELIMINATION SYSTEM
GENERAL PERMIT REGISTRATION STATEMENT
FOR NONMETALLIC MINERAL MINING

1. Name of owner: _____
(please print or type)
2. Mailing address: _____

3. Telephone number: _____
4. Fax number: _____
5. Project name: _____

Final Regulations

6. Description of mining activity (mineral mined):

7. Primary standard industrial classification (SIC) code:

Secondary SIC codes: _____

8. County: _____

9. Location: _____

10. Name of streams receiving discharges (e.g., Clear Creek or unnamed tributary to Clear Creek)

10. Discharge Information:

OUTFALL NO.	OUTFALL TYPE	SOURCE OF DISCHARGE [*]	RECEIVING STREAM	LATITUDE/ LONGITUDE

[*Include indication of any outfalls that receive discharges of process wastewater from vehicle/equipment washing facilities or activities.]

Attach additional sheets if necessary.

11. Does this mine currently have a VPDES permit?

Yes _____ No _____

(If yes, give permit number). _____

12. Description of wastewater treatment or reuse/recycle systems, or both: _____

13. List any chemicals added to water that could be discharged: _____

14. Indicate any co-located facilities:

15. Is this facility a hazardous waste treatment, storage, or disposal facility?

Yes _____ No _____

16. Attach to this registration statement a schematic drawing showing the sources of water used on the property, the industrial operations contributing to, or using water, and the conceptual design of the methods of treatment and disposal of wastewater and solids.

17. Attach to this registration statement an aerial photo or scale map which clearly shows the property boundaries, plant site, drainage areas associated with each outfall,

locations of all mine pit dewatering, existing, significant sources of materials exposed to precipitation, storm water or process wastewater discharges outfalls and the receiving streams.

~~16. The owner of any proposed discharge into or adjacent to state waters or the owner of any discharge into or adjacent to state waters which has not previously been covered by a valid VPDES permit must attach to this registration statement notification from the governing body of the county, city or town in which the discharge is to take place that the location and operation of the discharging facility is consistent with all ordinances adopted pursuant to Chapter 11 (§ 15.1-427 et seq.) of Title 15.1 of the Code of Virginia.~~

18. Attach to this registration statement evidence that the operation to be covered by this general permit has a mining permit which has been approved by the Virginia Department of Mines, Minerals and Energy, Division of Mineral Mining (or associated waived program) under the provisions and requirements of Title 45.1 of the Code of Virginia. Mineral mines owned and operated by governmental bodies not subject to the provisions and requirements of Title 45.1 of the Code of Virginia are exempt from this requirement.

9 VAC 25-190-70. General permit.

Any owner whose registration statement is accepted by the director board will receive the following permit and shall comply with the requirements in it and be subject to all requirements of the VPDES permit regulation, 9 VAC 25-31-10 et seq.

General Permit No.: VAG84

Effective date: [June 30, 1999]

Expiration date: [June 30, 2004]

GENERAL PERMIT FOR NONMETALLIC MINERAL MINING
AUTHORIZATION TO DISCHARGE UNDER THE VIRGINIA
POLLUTANT DISCHARGE ELIMINATION SYSTEM AND
THE
VIRGINIA STATE WATER CONTROL LAW

In compliance with the provisions of the Clean Water Act, as amended, and pursuant to the State Water Control Law and regulations adopted pursuant to it, owners of nonmetallic mineral mines are authorized to discharge to surface waters within the boundaries of the Commonwealth of Virginia, except those where specifically named in board regulations or policies which prohibit such discharges.

[This general permit covers all owners or operators of point source discharges associated with activities within Standard Industrial Classifications 1411, 1422, 1423, 1429, 1442, 1446, 1455, 1459, and 1499, except as specified below. Coverage includes active or inactive mineral mines that discharge: (i) storm water associated with industrial activity; (ii) mine pit dewatering; or (iii) process wastewaters. Covered operations shall have a mineral mining permit approved by the Virginia Department of Mines, Minerals and Energy, Division of Mineral Mining, (or associated waived program, locality or state agency) under the provisions and requirements of Title 45.1 of the Code of Virginia. Mineral mines owned and operated by governmental bodies not subject to the provisions and requirements of Title 45.1 of

Final Regulations

~~the Code of Virginia are exempt from this requirement. The following activities shall not have coverage under this general permit: bentonite, magnesite, gypsum, graphite, asbestos, diatomite, jade, tripoli or asphaltic mineral mining operations, coal mining, metal mining, mineral mines which have asphalt operations located within the mineral mine permit area, and oil and gas extraction.]~~

The authorized discharge shall be in accordance with this cover page, Part I - Effluent Limitations and Monitoring Requirements, Part II - Storm Water Pollution Prevention Plans, Part III - Monitoring and Reporting, and Part IV - Management Requirements Management, and Part III - Conditions Applicable to All VPDES Permits, as set forth [here herein].

Part I. EFFLUENT LIMITATIONS AND MONITORING REQUIREMENTS.

A. Effluent limitations and monitoring requirements.

~~1. During the period beginning on the permit's effective date with the permittee's coverage under this general permit and lasting until the permit's expiration date, the permittee is authorized to discharge process wastewater, effluent from mine pit dewatering and commingled storm water associated with industrial activity. Samples taken in compliance with the monitoring requirements specified below shall be taken at the following locations: at the point of discharge, prior to entering state waters from outfall(s).~~

Such discharges shall be limited and monitored by the permittee as specified below:

EFFLUENT CHARACTERISTICS	DISCHARGE LIMITATIONS			MONITORING REQUIREMENTS	
	Average	Minimum	Maximum	Frequency	Sample Type
Flow (MGD)	NL	NL NA	NA NL	1/3 Months	Estimate
Total Suspended Solids (mg/l)	30 mg/l	60 mg/l NA	NA 60	1/3 Months	Grab
pH (standard units)	NA	9-9 6.0*	6-9 9.0*	1/3 Months	Grab
Total Petroleum Hydrocarbons (mg/l)**	NA	NA	NL	1/3 Months	Grab

NL = No Limitation, monitoring required
NA = Not applicable

~~2. Use of any additive chemical will require the discharger to obtain prior written approval from the director.~~ 3. There shall be no discharge of floating solids or visible foam in other than trace amounts.

* Where the Water Quality Standards (9 VAC 25-260-10 et seq.) establish alternate standards for pH, ~~these standards shall be the maximum and minimum effluent limitations pH effluent limits may be adjusted within the 6 to 9 S.U. range.~~

** Monitoring for Total Petroleum Hydrocarbons is only required for outfalls that receive discharges of process wastewater from vehicle/equipment washing facilities or activities.

~~4. 3. During the period beginning on the permit's effective date with the permittee's coverage under the general permit and lasting until the permit's expiration date, the permittee is authorized to discharge storm water associated with industrial activity which does not combine with other wastewaters prior to discharge. Samples taken in compliance with the monitoring requirements specified below shall be taken at the following locations: at the point of discharge, prior to entering state waters from outfall(s).~~

Such discharges shall be limited and monitored by the permittee as specified below:

EFFLUENT CHARACTERISTICS	DISCHARGE LIMITATIONS			MONITORING REQUIREMENTS	
	Average	Minimum	Maximum	Frequency	Sample Type
Flow (MGD)	NA	NL NA	NA NL	1/Year	Estimate*
Total Suspended Solids (mg/l)	NA	NL NA	NA NL	1/Year	Grab**
pH (standard units)	NA	NL	NL	1/Year	Grab**
Total Petroleum Hydrocarbons (mg/l)	NA	NA	NL	1/Year	Grab

NL = No Limitation, monitoring required
NA = Not applicable

~~5. 4. All samples taken to meet the monitoring requirements specified above in A 3 shall be collected from the discharge resulting from a storm event that is greater than 0.1 inches in magnitude and that occurs at least 72 hours from the previously measurable (greater than 0.1 inch rainfall) storm event. The grab sample shall be taken during the first 30 minutes of the discharge. If the collection of a grab sample during the first 30 minutes is impracticable, a grab sample can~~

be taken during the first hour of the discharge, and the permittee shall submit with the monitoring report a description of why a grab sample during the first 30 minutes was impracticable.

* Estimate of the total volume of the discharge during the storm event.

~~** The grab sample shall be taken within the first three hours of the discharge.~~

B. Special conditions.

1. Vehicles and equipment utilized during the industrial activity on a site must be operated and maintained in such a manner as to prevent the potential or actual point source pollution of the surface or groundwaters of the state. Fuels, lubricants, coolants, and hydraulic fluids, or any other petroleum products, shall not be disposed of by discharging on the ground or into surface waters. Spent fluids shall be disposed of in a manner so as not to enter the surface or groundwaters of the state and in accordance with the applicable state and federal disposal regulations. Any spilled fluids shall be cleaned up to the maximum extent practicable and disposed of in a manner so as not to allow their entry into the surface or groundwaters of the state.

2. No sewage shall be discharged from this mineral mining activity except under the provisions of another VPDES permit specifically issued ~~therefore~~ for that purpose.

3. There shall be no chemicals added to the discharge, other than those listed on the owner's approved registration statement, unless prior approval is granted by the director.

~~4. The permittee shall submit a notice of termination in situations where all discharges associated with industrial activity authorized by this general permit are eliminated, when the mineral mining permit approved by the Virginia Department of Mines, Minerals and Energy, Division of Mineral Mining (or associated waived program) expires following mine close out and final bond release or where all discharges associated with industrial activity have been covered by an individual VPDES permit. The terms and conditions of this permit shall remain in effect until a completed notice of termination is submitted and approved by the director. The notice of termination shall be signed in accordance with Part III G.~~

4. The permittee shall submit a new registration statement if the [mineral] mining permit [approved by the Division of Mineral Mining (or associated waived program)] is modified or reissued in any way that would affect the outfall location or the characteristics of a discharge covered by this general permit. Government owned and operated mines without mining permits shall submit the registration statement whenever outfall location or characteristics are altered. The new registration statement shall be filed within 30 days of the outfall relocation or change in the characteristics of the discharge.

5. *The permittee shall notify the department as soon as they know or have reason to believe:*

a. *That any activity has occurred or will occur which would result in the discharge, on a routine or frequent basis, of any toxic pollutant which is not limited in this permit, if that discharge will exceed the highest of the following notification levels:*

(1) *One hundred micrograms per liter (100 µg/l);*

(2) *Two hundred micrograms per liter (200 µg/l) for acrolein and acrylonitrile; five hundred micrograms per liter (500 µg/l) for 2,4-dinitrophenol and for 2-methyl-4,6-dinitrophenol; and one milligram per liter (1 mg/l) for antimony;*

(3) *Five times the maximum concentration value reported for that pollutant in the permit application;*
or

(4) *The level established by the board.*

b. *That any activity has occurred or will occur which would result in any discharge, on a nonroutine or infrequent basis, of a toxic pollutant which is not limited in this permit, if that discharge will exceed the highest of the following notification levels:*

(1) *Five hundred micrograms per liter (500 µg/l);*

(2) *One milligram per liter (1 mg/l) for antimony;*

(3) *Ten times the maximum concentration value reported for that pollutant in the permit application;*
or

(4) *The level established by the board.*

6. This permit shall be modified, or alternatively revoked and reissued, to comply with any applicable effluent standard or limitation issued or approved under Sections 301(b) (2) (C), (D), and (E), 304 (b) (2) (3) (4), and or prohibition for a pollutant which is promulgated or approved under § 307 (a) (2) of the federal Clean Water Act, if the effluent standard or limitation so issued or approved:

a. ~~Contains different conditions or is otherwise more stringent than any effluent limitation~~ *Is more stringent than any effluent limitation on the pollutant already in the permit; or*

b. ~~Controls any pollutant not limited in the permit. The permit as modified or reissued under this paragraph shall also contain any other requirements of the Clean Water Act then applicable.~~

7. Except as expressly authorized by this permit, no product, materials, industrial wastes, or other wastes resulting from the purchase, sale, mining, extraction, transport, preparation, or storage of raw or intermediate

materials, final product, by-product or wastes, shall be handled, disposed of, or stored so as to permit a discharge of such product, materials, industrial wastes, or other wastes to state waters.

8. *There shall be no discharge of process wastewater pollutants from co-located asphalt [paving materials] operations. For the purposes of this special condition, process wastewater pollutants are any pollutants present in water used in asphalt [~~product~~ paving materials] manufacturing which [~~comes~~ come] into direct contact with any raw materials, intermediate product, by-product or product related to the asphalt [~~product~~ paving materials] manufacturing process.*

Part II. STORM WATER MANAGEMENT.

A. Recording of results.

1. *Additional information.* In addition to any reporting requirements of Part III, for each measurement or sample taken pursuant to the storm event monitoring requirements of this permit, the permittee shall record and report with the discharge monitoring report the following information:

- ~~1-~~ a. The date and duration (in hours) of the storm events sampled;
- ~~2-~~ b. The rainfall measurements or estimates (in inches) of the storm event which generated the sampled discharge; and
- ~~3-~~ c. The duration between the storm event sampled and the end of the previous measurable (greater than 0.1 inch rainfall) storm event.

2. *Additional reporting.* *In addition to filing copies of discharge monitoring reports in accordance with Part III, permittees with at least one storm water discharge associated with industrial activity through a large or medium municipal separate storm sewer system (systems serving a population of 100,000 or more) or a municipal system designated by the [~~director~~ board] must submit signed copies of discharge monitoring reports to the operator of the municipal separate storm sewer system at the same time.*

B. *Representative discharge.* When a facility has two or more exclusively storm water outfalls that, based on a consideration of industrial activity, significant materials, and management practices and activities within the area drained by the outfall, the permittee reasonably believes discharge substantially identical effluents, the permittee may test the effluent of one of such outfalls and include with the discharge monitoring report an explanation that the quantitative data also applies to the substantially identical outfalls provided that the permittee includes a description of the location of the outfalls and explains in detail why the outfalls are expected to discharge substantially identical effluents. In addition, for each exclusively storm water outfall that the permittee believes is representative, an estimate of the size of the drainage area (in square feet) and an estimate of the run-off coefficient of the drainage area (e.g., low (under 40%),

medium (40% to 65%) or high (above 65%)) shall be provided.

C. Sampling waiver.

1. *Adverse conditions.* When a permittee is unable to collect samples ~~for the storm event monitoring requirements within a specified sampling period~~ due to adverse climatic conditions, the permittee ~~must submit with the discharge monitoring report a description of why samples could not be collected, including available documentation of the event~~ shall collect a substitute sample from a separate qualifying event in the next period and submit these data along with the data for the routine sampling in that period. Adverse weather conditions ~~which~~ that may prohibit the collection of samples include weather conditions that create dangerous conditions for personnel (such as local flooding, high winds, hurricane, tornadoes, electrical storms, etc.) or otherwise make the collection of a sample impracticable (drought, extended frozen conditions, etc.). ~~Permittees are precluded from exercising this waiver more than once for each outfall during the permit term.~~

2. *Inactive and unstaffed facilities.* *When a permittee is unable to conduct the storm water sampling required at an inactive and unstaffed facility, the permittee may exercise a waiver of the monitoring requirements as long as the facility remains inactive and unstaffed. The permittee must submit to the [~~director~~ department], in lieu of monitoring data, a certification statement on the discharge monitoring report stating that the facility is inactive and unstaffed so that collecting a sample during a qualifying event is not possible.*

D. *Storm water pollution prevention plans.* A storm water pollution prevention plan shall be developed for each facility covered by this permit. Storm water pollution prevention plans shall be prepared in accordance with good engineering practices. The plan shall identify potential sources of pollution which may reasonably be expected to affect the quality of storm water discharges associated with industrial activity from the facility. In addition, the plan shall describe and ensure the implementation of practices which are to be used to reduce the pollutants in storm water discharges associated with industrial activity at the facility and to assure compliance with the terms and conditions of this permit. Facilities must implement the provisions of the storm water pollution prevention plan required under this part as a condition of this permit.

The storm water pollution prevention plan requirements of this general permit may be fulfilled by incorporating by reference other plans or documents such as an erosion and sediment control plan, a mine drainage plan as required by the Virginia Division of Mineral Mining, a spill prevention control and countermeasure (SPCC) plan developed for the facility under § 311 of the federal Clean Water Act or best management practices (BMP) programs otherwise required for the facility provided that the incorporated plan meets or exceeds the plan requirements of Part II H. If an erosion and

Final Regulations

sediment control plan is being incorporated by reference, it shall have been approved by the locality in which the activity is to occur or by another appropriate plan-approving authority authorized under the Virginia Erosion and Sediment Control Regulations, 4 VAC 50-30-10 et seq. All plans incorporated by reference into the storm water pollution prevention plan become enforceable under this permit.

E. Deadlines for plan preparation and compliance.

~~1. [For a facilities previously covered by this general permit operating under storm water pollution prevention plans in need of updating to meet any new requirements in this reissuance, or for any other storm water discharge associated with industrial activity that is existing on or before the effective date of this permit, the storm water pollution prevention plan shall:~~

~~a. Be prepared within 180 days after the date of coverage under this permit; and~~

~~b. Provide for implementation and compliance with the terms of the plan within 365 days after the date of coverage under this permit. Existing facilities and new facilities that begin operation on or before June 30, 1999, shall prepare and implement a plan incorporating the storm water pollution prevention plan requirements of this permit, if not included in an existing plan, as expeditiously as practicable, but not later than June 1, 2000. Existing storm water pollution prevention plans being implemented as of June 30, 1999, shall continue to be implemented until a new plan is developed and implemented.]~~

~~2. [The plan for any facility where industrial activity commences on or after the date of coverage under this permit, and except as provided elsewhere in this permit, shall be prepared and provide for compliance with the terms of the plan and this permit on or before the date of submission of a registration statement to be covered under this permit. Facilities that begin operation after June 30, 1999, shall prepare and implement a plan incorporating the requirements of this permit prior to submitting the registration statement.]~~

3. Upon a showing of good cause, the director may establish a later date in writing for preparing and compliance with a plan for a storm water discharge associated with industrial activity [~~that submits a registration statement in accordance with the registration requirements~~].

F. Signature and plan review.

1. The plan shall be signed in accordance with Part III ~~G~~ K (signatory requirements), and be retained on-site at the facility covered by this permit in accordance with Part III ~~G~~ B (retention of records) of this permit. When there are no on-site buildings or offices in which to store the plan, it shall be kept at the nearest company office.

2. The permittee shall make ~~plans~~ the storm water pollution prevention plan, annual site compliance

inspection report, or other information available to the department upon request.

3. The director, or an authorized representative, may notify the permittee at any time that the plan does not meet one or more of the minimum requirements of this part. Such notification shall identify those provisions of the permit which are not being met by the plan, and identify which provisions of the plan require modifications in order to meet the minimum requirements of this part. Within ~~30~~ 60 days of such notification from the director, or as otherwise provided by the director, or an authorized representative, the permittee shall make the required changes to the plan and shall submit to the department a written certification that the requested changes have been made.

G. Keeping plans current. The permittee shall amend the plan whenever there is a change in design, construction, operation, or maintenance, which has a significant effect on the potential for the discharge of pollutants to surface waters of the state or if the storm water pollution prevention plan proves to be ineffective in eliminating or significantly minimizing pollutants from sources identified under Part II H 2 (description of potential pollutant sources) of this permit, or in otherwise achieving the general objectives of controlling pollutants in storm water discharges associated with industrial activity. New owners shall review the existing plan and make appropriate changes. Amendments to the plan may be reviewed by the department in the same manner as described in Part II F.

H. Contents of plan. The plan shall include, at a minimum, the following items:

1. Pollution prevention team. Each plan shall identify a specific individual or individuals within the facility organization as members of a storm water pollution prevention team that are responsible for developing the storm water pollution prevention plan and assisting the facility or plant manager in its implementation, maintenance, and revision. The plan shall clearly identify the responsibilities of each team member. The activities and responsibilities of the team shall address all aspects of the facility's storm water pollution prevention plan.

2. Description of potential pollutant sources. Each plan shall provide a description of potential sources which may reasonably be expected to add significant amounts of pollutants to storm water discharges or which may result in the discharge of pollutants during dry weather from separate storm sewers draining the facility. Each plan shall identify all activities and significant materials which may potentially be significant pollutant sources. Each plan shall include, at a minimum:

a. Drainage.

(1) A site map indicating an outline of the portions of the drainage area of each storm water outfall that are within the facility boundaries, each existing structural control measure to reduce pollutants in

storm water run-off, surface water bodies, locations where significant materials are exposed to precipitation, locations where major spills or leaks identified under Part II H 2 c (spills and leaks) of this permit have occurred, and the locations of the following activities *where such activities are exposed to precipitation*: fueling stations, vehicle and equipment maintenance, ~~vehicle and equipment~~ and/or cleaning areas, loading/unloading areas, locations used for the treatment, storage or disposal of wastes *and wastewaters*, liquid storage tanks, processing areas and storage areas. *The map must indicate all outfall locations. The types of discharges contained in the drainage areas of the outfalls must be indicated either on the map or in an attached narrative.*

(2) For each area of the facility that generates storm water discharges associated with industrial activity with a reasonable potential for containing significant amounts of pollutants, a prediction of the direction of flow, and an identification of the types of pollutants which are likely to be present in storm water discharges associated with industrial activity. Factors to consider include the toxicity of the chemicals; quantity of chemicals used, produced or discharged; the likelihood of contact with storm water; and history of significant leaks or spills of toxic or hazardous pollutants. Flows with a significant potential for causing erosion shall be identified.

b. Inventory of exposed materials. An inventory of the types of materials handled at the site that potentially may be exposed to precipitation. Such inventory shall include a narrative description of significant materials that have been handled, treated, stored or disposed in a manner to allow exposure to storm water between the time of three years prior to the date of coverage under this general permit and the present; method and location of on-site storage or disposal; materials management practices employed to minimize contact of materials with storm water run-off between the time of three years prior to the date of coverage under this general permit and the present; the location and a description of existing structural and non-structural control measures to reduce pollutants in storm water run-off; and a description of any treatment the storm water receives.

c. Spills and leaks. A list of significant spills and significant leaks of toxic or hazardous pollutants that occurred at areas that are exposed to precipitation or that otherwise drain to a storm water conveyance at the facility after the date of three years prior to the date of coverage under this general permit. Such list shall be updated as appropriate during the term of the permit.

d. Sampling data. A summary of existing discharge sampling data describing pollutants in storm water

discharges from the facility, including a summary of sampling data collected during the term of this permit.

e. Risk identification and summary of potential pollutant sources. A narrative description of the potential pollutant sources from the following activities: loading and unloading operations; outdoor storage activities; outdoor manufacturing or processing activities; significant dust or particulate generating processes; and on-site waste disposal practices. The description shall specifically list any significant potential source of pollutants at the site and for each potential source, any pollutant or pollutant parameter (e.g., biochemical oxygen demand, etc.) of concern shall be identified.

3. Measures and controls. Each facility covered by this permit shall develop a description of storm water management controls appropriate for the facility, and implement such controls. The appropriateness and priorities of controls in a plan shall reflect identified potential sources of pollutants at the facility. The description of storm water management controls shall address the following minimum components, including a schedule for implementing such controls:

a. Good housekeeping. Good housekeeping requires the maintenance of areas which may contribute pollutants to storm ~~waters~~ water discharges in a clean, orderly manner. *The plan shall describe procedures performed to minimize contact of materials with storm water run-off. Particular attention should be paid to areas where raw materials are stockpiled, material handling areas, storage areas, liquid storage tanks, and loading/unloading areas.*

b. Preventive maintenance. A preventive maintenance program shall involve timely inspection and maintenance of storm water management devices (e.g., cleaning oil/water separators, catch basins) as well as inspecting and testing facility equipment and systems to uncover conditions that could cause breakdowns or failures resulting in discharges of pollutants to surface waters, and ensuring appropriate maintenance of such equipment and systems. *The maintenance program shall require periodic removal of debris from discharge diversions and conveyance systems. Permittees using settling basins to control their effluents must provide maintenance schedules for such basins in the pollution prevention plan.*

c. Spill prevention and response procedures. Areas where potential spills which can contribute pollutants to storm water discharges can occur, and their accompanying drainage points shall be identified clearly in the storm water pollution prevention plan. Where appropriate, specifying material handling procedures, storage requirements, and use of equipment such as diversion valves in the plan should be considered. Procedures for cleaning up spills shall be identified in the plan and made available to the appropriate personnel. The necessary equipment to

Final Regulations

implement a clean up should be available to personnel.

d. Inspections. ~~In addition to or as part of the comprehensive site compliance evaluation required under Part II H 4 of this permit, [Qualified facility personnel~~ *Facility personnel who are familiar with the mining activity, the best management practices and the storm water pollution prevention plan] shall be identified to inspect material storage and handling areas, liquid storage tanks, hoppers or silos, vehicle and equipment maintenance areas, cleaning and fueling areas, material handling vehicles and designated equipment and processing areas of the facility at appropriate intervals specified in the plan; to inspect best management practices; and to conduct visual examinations of storm water associated with industrial activity. The inspection frequency shall be specified in the plan based upon a consideration of the level of industrial activity at the facility, but shall be a minimum of quarterly. [Visual] Inspections of best management practices shall include inspection of storm water discharge diversions, conveyance systems, sediment control and collection systems, containment structures, vegetation, serrated slopes, and benched slopes to determine their effectiveness, the integrity of control structures, if soil erosion has occurred, or if there is evidence of actual or potential discharge of contaminated storm water. Visual examinations of storm water discharges associated with industrial activity shall include examination of storm water samples representative of storm event discharges from the facility and observation of color, odor, clarity, floating solids, settled solids, suspended solids, foam, oil sheen, and other obvious indicators of storm water pollution. Site inspection, best management practices inspection and visual examination results must be documented and maintained on-site with the facility pollution prevention plan. Documentation for visual examinations of storm water shall include the examination date and time, examination personnel, outfall location, the nature of the discharge, visual quality of the storm water discharge and probable sources of any observed storm water contamination. [Part II B regarding representative discharges and Part II C regarding sampling waivers shall apply to the taking of samples for visual examination except that (i) the documentation required by these sections shall be retained with the storm water pollution prevention plan visual examination records rather than submitted to the department, and (ii) substitute sampling for waived sampling is not required if the proper documentation is maintained.] A set of tracking or followup procedures shall be used to ensure that appropriate actions are taken in response to the inspections. ~~Records of inspections shall be maintained.~~*

e. Employee training. Employee training programs shall inform personnel responsible for implementing activities identified in the storm water pollution prevention plan or otherwise responsible for storm water management at all levels of responsibility of the components and goals of the storm water pollution prevention plan. Training should address topics such as spill response, good housekeeping and material management practices. A pollution prevention plan shall identify periodic dates for such training.

f. Recordkeeping and internal reporting procedures. A description of incidents such as spills, or other discharges, along with other information describing the quality and quantity of storm water discharges shall be included in the plan required under this part. Inspections and maintenance activities shall be documented and records of such activities shall be incorporated into the plan. *Ineffective best management practices must be recorded and the date of their corrective action noted.*

g. Sediment and erosion control. The plan shall identify areas which, due to topography, activities, or other factors, have a high potential for significant soil erosion, and identify structural, vegetative, or stabilization measures to be used to limit erosion. *Permittees must indicate the location and design for proposed best management practices to be implemented prior to land disturbance activities. For sites already disturbed but without best management practices, the permittee must indicate the location and design of best management practices that will be implemented. The permittee is required to indicate plans for grading, contouring, stabilization, and establishment of vegetative cover for all disturbed areas, including road banks.*

h. Management of run-off. The plan shall contain a narrative consideration of the appropriateness of traditional storm water management practices (practices other than those which control the generation or sources of pollutants) used to divert, infiltrate, reuse, or otherwise manage storm water run-off in a manner that reduces pollutants in storm water discharges from the site. The plan shall provide that measures that the permittee determines to be reasonable and appropriate shall be implemented and maintained. The potential of various sources at the facility to contribute pollutants to storm water discharges associated with industrial activity (see Part II H 2 (description of potential pollutant sources) of this permit) shall be considered when determining reasonable and appropriate measures. Appropriate measures may include: vegetative swales and practices, reuse of collected storm water (such as for a process or as an irrigation source), inlet controls (such as oil/water separators), snow management activities, infiltration devices, and wet detention/retention devices.

4. Comprehensive site compliance evaluation. [~~Qualified personnel~~ Facility personnel who are familiar with the mining activity, the best management practices and the storm water pollution prevention plan] shall conduct site compliance evaluations at appropriate intervals specified in the plan, but in no case less than once a year for active sites. When annual compliance evaluations are shown in the plan to be impractical for inactive mining sites due to remote location and inaccessibility, site evaluations must be conducted at least once every three years. Such evaluations shall ~~provide~~ include the following:

a. Areas contributing to a storm water discharge associated with industrial activity, including material storage and handling areas; liquid storage tanks; hoppers or silos; vehicle and equipment maintenance, cleaning, and fueling areas; material handling vehicles; equipment and processing areas; and areas where aggregate is stockpiled outdoors, shall be visually inspected for evidence of, or the potential for, pollutants entering the drainage system. Measures to reduce pollutant loadings shall be evaluated to determine whether they are adequate and properly implemented in accordance with the terms of the permit or whether additional control measures are needed. Structural storm water management measures, sediment and erosion control measures, and other structural pollution prevention measures identified in the plan shall be observed to ensure that they are operating correctly. A visual inspection of equipment needed to implement the plan, such as spill response equipment, shall be made.

b. Based on the results of the ~~inspection~~ evaluation, the description of potential pollutant sources identified in the plan in accordance with Part II H 2 (description of potential pollutant sources) of this permit and pollution prevention measures and controls identified in the plan in accordance with Part II H 3 (measures and controls) of this permit shall be revised as appropriate within 14 days of such inspection and shall provide for implementation of any changes to the plan in a timely manner, but in no case more than 90 days after the inspection.

c. A report summarizing the scope of the inspection, personnel making the inspection, the dates of the inspection, major observations relating to the implementation of the storm water pollution prevention plan, and actions taken in accordance with Part II H 4 b of this permit shall be made and retained as part of the storm water pollution prevention plan as required in Part III G B (records). The report shall identify any incidents of noncompliance. Where a report does not identify any incidents of noncompliance, the report shall contain a certification that the facility is in compliance with the storm water pollution prevention plan and this permit. The report shall be signed in accordance with Part III G K

(signatory requirements) of this permit and retained as required in Part III G B.

d. Where compliance evaluation schedules overlap with inspections required under Part II H 3 d (inspections), the compliance evaluation may be conducted in place of one such inspection.

~~5. Consistency with other plans. Storm water pollution prevention plans may reflect requirements for Spill Prevention Control and Countermeasure (SPCC) plans developed for the facility under Section 311 of the Clean Water Act, Best Management Practices (BMP) Programs otherwise required by a VPDES permit for the facility or any other plans required by the board's regulations as long as such requirement is incorporated into the storm water pollution prevention plan.~~

5. Additional requirements for storm water discharges associated with industrial activity that discharge into or through municipal separate storm sewer systems serving a population of 100,000 or more.

a. In addition to the applicable requirements of this permit, facilities covered by this permit must comply with applicable requirements in municipal storm water management programs developed under VPDES permits issued for the discharge of the municipal separate storm sewer system that receives the facility's discharge, provided the permittee has been notified of such conditions.

b. Permittees that discharge storm water associated with industrial activity through a municipal separate storm sewer system serving a population of 100,000 or more, or a municipal system designated by the director, shall make plans available to the municipal operator of the system upon request.

Part III. MONITORING AND REPORTING.

A. ~~Sampling and analysis methods.~~

~~1. Samples and measurements taken as required by this permit shall be representative of the volume and nature of the monitored activity.~~

~~2. Unless otherwise specified in this permit all sample preservation methods, maximum holding times and analysis methods for pollutants shall comply with requirements set forth in Guidelines Establishing Test Procedures for the Analysis of Pollutants promulgated at 40 CFR 136.~~

~~3. The sampling and analysis program to demonstrate compliance with the permit shall at a minimum, conform to Part I of this permit.~~

~~4. The permittee shall periodically calibrate and perform maintenance procedures on all monitoring and analytical instrumentation at intervals that will insure accuracy of measurements.~~

Final Regulations

~~B. Recording of results. For each measurement or sample taken pursuant to the requirements of this permit, the permittee shall record the following information:~~

- ~~1. The date, exact place and time of sampling or measurements;~~
- ~~2. The persons who performed the sampling or measurements;~~
- ~~3. The dates analyses were performed;~~
- ~~4. The persons who performed each analysis;~~
- ~~5. The analytical techniques or methods used;~~
- ~~6. The results of such analyses and measurements.~~

~~C. Records retention. All records and information resulting from the monitoring activities required by this permit, including all records of analyses performed and calibration and maintenance of instrumentation and recording from continuous monitoring instrumentation, shall be made a part of the pollution prevention plan and shall be retained for three years from the date of the sample, measurement or report or until at least one year after coverage under this general permit terminates, whichever is later. This period of retention shall be extended automatically during the course of any unresolved litigation regarding the regulated activity or regarding control standards applicable to the permittee, or as requested by the director.~~

~~D. Additional monitoring by permittee. If the permittee monitors any pollutant at the locations designated here more frequently than required by this permit, using approved analytical methods as specified above, the results of such monitoring shall be included in the calculation and reporting of the values required in the monitoring report. Such increased frequency shall also be reported.~~

~~E. Water quality monitoring. The director may require every permittee to furnish such plans, specifications, or other pertinent information as may be necessary to determine the effect of the pollutants on the water quality or to ensure pollution of state waters does not occur or such information as may be necessary to accomplish the purposes of the Virginia State Water Control Law, Clean Water Act or the board's regulations.~~

~~The permittee shall obtain and report such information if requested by the director. Such information shall be subject to inspection by authorized state and federal representatives and shall be submitted with such frequency and in such detail as requested by the director.~~

~~F. Reporting requirements.~~

- ~~1. The permittee shall submit original monitoring reports of each quarter's performance to the department once per year, on or before January 10.~~
- ~~2. If, for any reason, the permittee does not comply with one or more limitations, standards, monitoring or management requirements specified in this permit, the permittee shall submit to the department with the monitoring report at least the following information:~~

~~a. A description and cause of noncompliance;~~

~~b. The period of noncompliance, including exact dates and times or the anticipated time when the noncompliance will cease; and~~

~~c. Actions taken or to be taken to reduce, eliminate, and prevent recurrence of the noncompliance.~~

~~Whenever such noncompliance may adversely affect state waters or may endanger public health, the permittee shall submit the above required information by oral report within 24 hours from the time the permittee becomes aware of the circumstances and by written report within five days. The director may waive the written report requirement on a case-by-case basis if the oral report has been received within 24 hours and no adverse impact on state waters has been reported.~~

~~3. The permittee shall report any unpermitted, unusual or extraordinary discharge which enters or could be expected to enter state waters. The permittee shall provide information specified in Part III F 2 a-c regarding each such discharge immediately, that is as quickly as possible upon discovery; however, in no case later than 24 hours. A written submission covering these points shall be provided within five days of the time the permittee becomes aware of the circumstances covered by this paragraph.~~

~~Unusual or extraordinary discharge would include but not be limited to (i) unplanned bypasses, (ii) upsets, (iii) spillage of materials resulting directly or indirectly from processing operations, (iv) breakdown of processing or accessory equipment, (v) failure of or taking out of service, sewage or industrial waste treatment facilities, auxiliary facilities, or (vi) flooding or other acts of nature.~~

~~If the department's regional office cannot be reached, the department maintains a 24-hour telephone service in Richmond (804) 527-5200 to which the report required above is to be made.~~

~~G. Signatory requirements. Any registration statement, report, or certification required by this permit shall be signed as follows:~~

~~1. Registration statement.~~

~~a. For a corporation: by a responsible corporate official. For purposes of this section, a responsible corporate official means (i) a president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation, or (ii) the manager of one or more manufacturing, production, or operating facilities employing more than 250 persons or having gross annual sales or expenditures exceeding \$25,000,000 (in second quarter 1980 dollars), if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures.~~

b. For a municipality, state, federal or other public agency by either a principal executive officer or ranking elected official. (A principal executive officer of a federal, municipal, or state agency includes the chief executive officer of the agency or head executive officer having responsibility for the overall operation of a principal geographic unit of the agency).

c. For a partnership or sole proprietorship, by a general partner or proprietor respectively.

2. Reports. All reports required by permits and other information requested by the director shall be signed by:

a. One of the persons described in subdivision 1 a, b, or c of this subsection; or

b. A duly authorized representative of that person. A person is a duly authorized representative only if:

(1) The authorization is made in writing by a person described in subdivision 1 a, b, or c of this subsection; and

(2) The authorization specifies either an individual or a position having responsibility for the overall operation of the regulated facility or activity, such as the position of plant manager, operator of a well or a well field, superintendent, or position of equivalent responsibility. (A duly authorized representative may thus be either a named individual or any individual occupying a named position.)

(3) If an authorization is no longer accurate because a different individual or position has responsibility for the overall operation of the facility, a new authorization must be submitted to the department prior to or together with any separate information, or registration statement to be signed by an authorized representative.

3. Certification. Any person signing a document under subdivision 1 or 2 of this subsection shall make the following certification: "I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system or those persons directly responsible for gathering the information, the information submitted is to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false information including the possibility of fine and imprisonment for knowing violations."

H. Releases in excess of reportable quantities.

1. This permit does not relieve the permittee of the reporting requirements of 40 CFR 117 and 40 CFR 302. The discharge of hazardous substances or oil in the storm water discharges from a facility shall be prevented or minimized in accordance with the applicable storm water pollution prevention plan for the facility. Where a

release containing a hazardous substance in an amount equal to or in excess of a reporting quantity established under either 40 CFR 117 or 40 CFR 302 occurs during a 24-hour period, the storm water pollution prevention plan must be modified within 14 calendar days of knowledge of the release. The modification shall provide a description of the release, the circumstances leading to the release, and the date of the release. In addition, the plan must be reviewed to identify measures to prevent the reoccurrence of such releases and to respond to such releases, and the plan must be modified where appropriate.

2. Spills. This permit does not authorize the discharge of hazardous substances or oil resulting from an on-site spill.

Part IV. MANAGEMENT REQUIREMENTS.

A. Change in discharge of pollutants.

1. Any permittee proposing a new discharge shall submit a registration statement at least 60 days prior to commencing erection, construction, or expansion or employment of new processes at any facility. There shall be no construction or operation of said facilities prior to the issuance of a permit.

2. All discharges authorized by this permit shall be made in accordance with the terms and conditions of the permit. The permittee shall submit a new registration statement 30 days prior to all expansions, production increases, or process modifications, that will result in the discharge of new or increased pollutants. The discharge of any pollutant more frequently than, or at a level greater than that identified and authorized by this permit, shall constitute a violation of the terms and conditions of this permit.

3. The permittee shall promptly provide written notice of the following:

a. Any new introduction of pollutants, into treatment works which represents a significant increase in the discharge of pollutants which may interfere with, pass through, or otherwise be incompatible with such works, from an establishment, treatment works, or discharges, if such establishment, treatment works, or discharges were discharging or has the potential to discharge pollutants to state waters;

b. Any substantial change, whether permanent or temporary, in the volume or character of pollutants being introduced into such treatment works by an establishment, treatment works, or discharges that was introducing pollutants into such treatment works at the time of issuance of the permit;

c. Any reason to believe that any activity has occurred or will occur which would result in the discharge on a routine or frequent basis of any toxic pollutant which is not limited in the permit, if that discharge will exceed the highest of the following "notification levels":

Final Regulations

- (1) One hundred micrograms per liter (100 ug/l);
- (2) Two hundred micrograms per liter (200 ug/l) for acrolein and acrylonitrile; five hundred micrograms per liter (500 ug/l) for 2, 4 dinitrophenol and for 2-methyl-4, 6-dinitrophenol; and one milligram per liter (1 mg/l) for antimony;
- (3) Five times the maximum concentration value reported for the pollutant in the registration statement; or
- (4) The level established in accordance with regulation under Section 307(a) of the Clean Water Act and accepted by the director;

d. Any activity has occurred or will occur which would result in any discharge on a nonroutine or infrequent basis of a toxic pollutant which is not limited in the permit if that discharge will exceed the highest of the following "notification levels":

- (1) Five hundred micrograms per liter (500 ug/l);
- (2) One milligram per liter (1 mg/l) for antimony;
- (3) Ten times the maximum concentration value reported for that pollutant in the registration statement; or
- (4) The level established by the director.

Such notice shall include information on: (i) the characteristics and quantity of pollutants to be introduced into or from such treatment works; (ii) any anticipated impact of such change in the quantity and characteristics of the pollutants to be discharged from such treatment works; and (iii) any additional information that may be required by the director.

B. Treatment works operation and quality control.

1. Design and operation of facilities or treatment works and disposal of all wastes shall be in accordance with the registration statement filed with the department and in conformity with the conceptual design, or the plans, specifications, or other supporting data accepted by the director. The acceptance of the treatment works conceptual design or the plans and specifications does not relieve the permittee of the responsibility of designing and operating the facility in a reliable and consistent manner to meet the facility performance requirements in the permit. If facility deficiencies, design or operational, are identified in the future which could affect the facility performance or reliability, it is the responsibility of the permittee to correct such deficiencies.

2. All waste collection, control, treatment, and disposal facilities shall be operated in a manner consistent with the following:

- a. At all times, all facilities shall be operated in a prudent and workmanlike manner so as to minimize upsets and discharges of excessive pollutants to state waters;

b. The permittee shall provide an adequate operating staff which is duly qualified to carry out the operation, maintenance and testing functions required to insure compliance with the conditions of this permit;

c. Maintenance of treatment facilities shall be carried out in such a manner that the monitoring and limitation requirements are not violated; and

d. Collected solids shall be stored and disposed of in such a manner as to prevent entry of those wastes, or runoff from the wastes, into state waters.

C. Adverse impact. The permittee shall take all feasible steps to minimize any adverse impact to state waters resulting from noncompliance with any limitations or conditions specified in this permit, and shall perform and report such accelerated or additional monitoring as is necessary to determine the nature and impact of the noncomplying limitations or conditions.

D. Duty to halt, reduce activity or to mitigate.

1. It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.

2. The permittee shall take all reasonable steps to minimize, correct or prevent any discharge in violation of this permit which has a reasonable likelihood of adversely affecting human health or the environment.

E. Structural stability. The structural stability of any of the units or parts of the facilities here permitted is the sole responsibility of the permittee and the failure of such structural units or parts shall not relieve the permittee of the responsibility of complying with all terms and conditions of this permit.

F. Bypassing. Any bypass ("Bypass means intentional diversion of waste streams from any portion of a treatment works") of the treatment works here permitted is prohibited unless:

1. Anticipated bypass. If the permittee knows in advance of the need for a bypass, the permittee shall notify the department promptly at least 10 days prior to the bypass. After considering its adverse effects the director may approve an anticipated bypass if:

a. The bypass is unavoidable to prevent a loss of life, personal injury, or severe property damage ("Severe property damage" means substantial physical damage to property, damage to the treatment facilities which causes them to become inoperable, or substantial and permanent loss of natural resources which can reasonably be expected to occur in the absence of a bypass. Severe property damage does not mean economic loss caused by delays in production.); and

b. There are no feasible alternatives to bypass, such as the use of auxiliary treatment facilities, retention of untreated waste, or maintenance during normal periods of equipment down-time. However, if a bypass

~~occurs during normal periods of equipment down-time, or preventive maintenance and in the exercise of reasonable engineering judgment the permittee could have installed adequate backup equipment to prevent such bypass, this exclusion shall not apply as a defense.~~

~~2. Unplanned bypass. If an unplanned bypass occurs, the permittee shall notify the department as soon as possible, but in no case later than 24 hours, and shall take steps to halt the bypass as early as possible. This notification will be a condition for defense to an enforcement action that an unplanned bypass met the conditions in Part IV F 1 above and in light of the information reasonably available to the permittee at the time of the bypass.~~

~~G. Conditions necessary to demonstrate an upset. A permittee may claim an upset as an affirmative defense to an action brought for noncompliance for only technology-based effluent limitations. In order to establish an affirmative defense of upset, the permittee shall present properly signed, contemporaneous operating logs or other relevant evidence that shows:~~

- ~~1. That an upset occurred and that the cause can be identified;~~
- ~~2. The facility permitted here was at the time being operated efficiently and in compliance with proper operation and maintenance procedures;~~
- ~~3. The permittee submitted a notification of noncompliance as required by Part III F; and~~
- ~~4. The permittee took all reasonable steps to minimize or correct any adverse impact to state waters resulting from noncompliance with the permit.~~

~~H. Compliance with state and federal law. Compliance with this permit during its term constitutes compliance with the State Water Control Law and the Clean Water Act except for any toxic standard imposed under Section 307(a) of the Clean Water Act.~~

~~Nothing in this permit shall be construed to preclude the institution of any legal action under, or relieve the permittee from any responsibilities, liabilities, or penalties established pursuant to any other state law or regulation or under authority preserved by Section 510 of the Clean Water Act.~~

~~I. Property rights. The issuance of this permit does not convey any property rights in either real or personal property, or any exclusive privileges, nor does it authorize any injury to private property or any invasion of personal rights, nor any infringement of federal, state, or local laws or regulations.~~

~~J. Severability. The provisions of this permit are severable.~~

~~K. Duty to reregister. If the permittee wishes to continue to discharge under a general permit after the expiration date of this permit, the permittee must submit a new registration statement at least 120 days prior to the expiration date of this permit.~~

~~L. Right of entry. The permittee shall allow, or secure necessary authority to allow, authorized state and federal representatives, upon the presentation of credentials:~~

- ~~1. To enter upon the permittee's premises on which the establishment, treatment works, or discharges are located or in which any records are required to be kept under the terms and conditions of this permit;~~
- ~~2. To have access to inspect and copy at reasonable times any records required to be kept under the terms and conditions of this permit;~~
- ~~3. To inspect at reasonable times any monitoring equipment or monitoring method required in this permit;~~
- ~~4. To sample at reasonable times any waste stream, discharge, process stream, raw material or by product; and~~
- ~~5. To inspect at reasonable times any collection, treatment, or discharge facilities required under this permit.~~

~~For purposes of this section, the time for inspection shall be deemed reasonable during regular business hours, and whenever the facility is discharging. Nothing contained herein shall make an inspection time unreasonable during an emergency.~~

~~M. Transferability of permits. This permit may be transferred to another person by a permittee if:~~

- ~~1. The current permittee notifies the department 30 days in advance of the proposed transfer of the title to the facility or property;~~
- ~~2. The notice to the department includes a written agreement between the existing and proposed new permittee containing a specific date of transfer of permit responsibility, coverage and liability between them; and~~
- ~~3. The department does not within the 30-day time period notify the existing permittee and the proposed permittee of the board's intent to modify or revoke and reissue the permit.~~

~~Such a transferred permit shall, as of the date of the transfer, be as fully effective as if it had been issued directly to the new permittee.~~

~~N. Public access to information. Any secret formulae, secret processes, or secret methods other than effluent data submitted to the department may be claimed as confidential by the submitter pursuant to § 62.1-44.21 of the Code of Virginia. Any such claim must be asserted at the time of submission in the manner prescribed on the application form or instructions or, in the case of other submissions, by stamping the words "secret formulae, secret processes or secret methods" on each page containing such information. If no claim is made at the time of submission, the department may make the information available to the public without further notice. If a claim is asserted, the information will be treated in accordance with the procedures in the Virginia Freedom of Information Act (§§ 2.1-340 et seq. and 62.1-44.21 of the Code of Virginia).~~

Final Regulations

Claims of confidentiality for the following information will be denied:

1. The name and address of any permit applicant or permittee; and
2. Registration statements, permits, and effluent data.

Information required by the registration statement may not be claimed confidential. This includes information submitted on the forms themselves and any attachments used to supply information required by the forms.

~~Q. Permit modification. The permit may be modified when any of the following developments occur:~~

1. When a change is made in the promulgated standards or regulations on which the permit was based;
2. When an effluent standard or prohibition for a toxic pollutant must be incorporated in the permit in accordance with provisions of Section 307(a) of the Clean Water Act (33 USC §§ 1251 et seq.); or
3. When the level of discharge of a pollutant not limited in the permit exceeds applicable water quality standards or the level which can be achieved by technology-based treatment requirements appropriate to the permittee.

~~P. Permit termination. After public notice and opportunity for a hearing, the general permit may be terminated for cause.~~

~~Q. When an individual permit may be required. The director may require any permittee authorized to discharge under this permit to apply for and obtain an individual permit. Cases where an individual permit may be required include, but are not limited to, the following:~~

1. The discharger(s) is a significant contributor of pollution;
2. Conditions at the operating facility change altering the constituents or characteristics of the discharge such that the discharge no longer qualifies for a general permit;
3. The discharge violates the terms or conditions of this permit;
4. A change has occurred in the availability of demonstrated technology or practices for the control or abatement of pollutants applicable to the point source;
5. Effluent limitation guidelines are promulgated for the point sources covered by this permit; or
6. A water quality management plan containing requirements applicable to such point sources is approved after the issuance of this permit.

~~This permit may be terminated as to an individual permittee for any of the reasons set forth above after appropriate notice and an opportunity for a hearing.~~

~~R. When an individual permit may be requested. Any permittee operating under this permit may request to be excluded from the coverage of this permit by applying for an individual permit. When an individual permit is issued to a~~

~~permittee the applicability of this general permit to the individual permittee is automatically terminated on the effective date of the individual permit. When a general permit is issued which applies to a permittee already covered by an individual permit, such permittee may request exclusion from the provisions of the general permit and subsequent coverage under an individual permit.~~

~~S. Civil and criminal liability. Except as provided in permit conditions on "bypassing" (Part IV-F), and "upset" (Part IV-G) nothing in this permit shall be construed to relieve the permittee from civil and criminal penalties for noncompliance with the terms of this permit.~~

~~T. Oil and hazardous substance liability. Nothing in this permit shall be construed to preclude the institution of any legal action or relieve the permittee from any responsibilities, liabilities, or penalties to which the permittee is or may be subject under Section 311 of the Clean Water Act (33 USC § 1321) or §§ 62.1-44.34:14 through 62.1-44.34:23 of the Code of Virginia.~~

~~U. Unauthorized discharge of pollutants. Except in compliance with this permit, it shall be unlawful for any permittee to:~~

1. Discharge into state waters sewage, industrial wastes, other wastes or any noxious or deleterious substances; or
2. Otherwise alter the physical, chemical or biological properties of such state waters and make them detrimental to the public health, or to animal or aquatic life, or to the uses of such waters for domestic or industrial consumption, or for recreation, or for other uses.

Part III. CONDITIONS APPLICABLE TO ALL VPDES PERMITS.

A. Monitoring.

1. Samples and measurements taken as required by this permit shall be representative of the monitored activity.
2. Monitoring shall be conducted according to procedures approved under 40 CFR Part 136 or alternative methods approved by the U.S. Environmental Protection Agency, unless other procedures have been specified in this permit.
3. The permittee shall periodically calibrate and perform maintenance procedures on all monitoring and analytical instrumentation at intervals that will ensure accuracy of measurements.

B. Records.

1. Records of monitoring information shall include:
 - a. The date, exact place, and time of sampling or measurements;
 - b. The individual(s) who performed the sampling or measurements;

- c. The date(s) and time(s) analyses were performed;
- d. The individual(s) who performed the analyses;
- e. The analytical techniques or methods used; and
- f. The results of such analyses.

2. Except for records of monitoring information required by this permit related to the permittee's sewage sludge use and disposal activities, which shall be retained for a period of at least five years, the permittee shall retain records of all monitoring information, including all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation, copies of all reports required by this permit, and records of all data used to complete the registration statement for this permit, for a period of at least three years from the date of the sample, measurement, report or request for coverage. This period of retention shall be extended automatically during the course of any unresolved litigation regarding the regulated activity or regarding control standards applicable to the permittee, or as requested by the board.

C. Reporting monitoring results.

1. The permittee shall submit the results of the monitoring required by this permit not later than the 10th day of the month after monitoring takes place, unless another reporting schedule is specified elsewhere in this permit. Monitoring results shall be submitted to the department's regional office.

2. Monitoring results shall be reported on a Discharge Monitoring Report (DMR) or on forms provided, approved or specified by the department.

3. If the permittee monitors any pollutant specifically addressed by this permit more frequently than required by this permit using test procedures approved under 40 CFR Part 136 or using other test procedures approved by the U.S. Environmental Protection Agency or using procedures specified in this permit, the results of this monitoring shall be included in the calculation and reporting of the data submitted in the DMR or reporting form specified by the department.

4. Calculations for all limitations which require averaging of measurements shall utilize an arithmetic mean unless otherwise specified in this permit.

D. Duty to provide information. The permittee shall furnish to the department, within a reasonable time, any information which the board may request to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit or to determine compliance with this permit. The board may require the permittee to furnish, upon request, such plans, specifications, and other pertinent information as may be necessary to determine the effect of the wastes from his discharge on the quality of state waters, or such other information as may be necessary to accomplish the purposes of the State Water Control Law. The permittee shall also

furnish to the department, upon request, copies of records required to be kept by this permit.

E. Compliance schedule reports. Reports of compliance or noncompliance with, or any progress reports on, interim and final requirements contained in any compliance schedule of this permit shall be submitted no later than 14 days following each schedule date.

F. Unauthorized discharges. Except in compliance with this permit or another permit issued by the board, it shall be unlawful for any person to:

1. Discharge into state waters sewage, industrial wastes, other wastes, or any noxious or deleterious substances; or
2. Otherwise alter the physical, chemical or biological properties of such state waters and make them detrimental to the public health, or to animal or aquatic life, or to the use of such waters for domestic or industrial consumption, or for recreation, or for other uses.

G. Reports of unauthorized discharges. Any permittee who discharges or causes or allows a discharge of sewage, industrial waste, other wastes or any noxious or deleterious substance into or upon state waters in violation of Part III F (unauthorized discharges); or who discharges or causes or allows a discharge that may reasonably be expected to enter state waters in violation of Part III F, shall notify the department of the discharge immediately upon discovery of the discharge, but in no case later than 24 hours after said discovery. A written report of the unauthorized discharge shall be submitted to the department within five days of discovery of the discharge. The written report shall contain:

1. A description of the nature and location of the discharge;
2. The cause of the discharge;
3. The date on which the discharge occurred;
4. The length of time that the discharge continued;
5. The volume of the discharge;
6. If the discharge is continuing, how long it is expected to continue;
7. If the discharge is continuing, what the expected total volume of the discharge will be; and
8. Any steps planned or taken to reduce, eliminate and prevent a recurrence of the present discharge or any future discharges not authorized by this permit.

Discharges reportable to the department under the immediate reporting requirements of other regulations are exempted from this requirement.

H. Reports of unusual or extraordinary discharges. If any unusual or extraordinary discharge including a bypass or upset should occur from a treatment works and the discharge enters or could be expected to enter state waters,

Final Regulations

the permittee shall promptly notify, in no case later than 24 hours, the department by telephone after the discovery of the discharge. This notification shall provide all available details of the incident, including any adverse effects on aquatic life and the known number of fish killed. The permittee shall reduce the report to writing and shall submit it to the department within five days of discovery of the discharge in accordance with Part III I 2. Unusual and extraordinary discharges include but are not limited to any discharge resulting from:

1. Unusual spillage of materials resulting directly or indirectly from processing operations;
2. Breakdown of processing or accessory equipment;
3. Failure or taking out of service some or all of the treatment works; and
4. Flooding or other acts of nature.

I. Reports of noncompliance. The permittee shall report any noncompliance which may adversely affect state waters or may endanger public health.

1. An oral report shall be provided within 24 hours from the time the permittee becomes aware of the circumstances. The following shall be included as information which shall be reported within 24 hours under this subdivision:

- a. Any unanticipated bypass; and
- b. Any upset which causes a discharge to surface waters.

2. A written report shall be submitted within 5 days and shall contain:

- a. A description of the noncompliance and its cause;
- b. The period of noncompliance, including exact dates and times, and if the noncompliance has not been corrected, the anticipated time it is expected to continue; and
- c. Steps taken or planned to reduce, eliminate, and prevent reoccurrence of the noncompliance.

The board may waive the written report on a case-by-case basis for reports of noncompliance under Part III I if the oral report has been received within 24 hours and no adverse impact on state waters has been reported.

3. The permittee shall report all instances of noncompliance not reported under Parts III I 1 or 2, in writing, at the time the next monitoring reports are submitted. The reports shall contain the information listed in Part III I 2.

NOTE: The immediate (within 24 hours) reports required in Parts III G, H and I may be made to the department's regional office. Reports may be made by telephone or by fax. For reports outside normal working hours, leave a message and this shall fulfill the immediate reporting

requirement. For emergencies, the Virginia Department of Emergency Services maintains a 24-hour telephone service at 1-800-468-8892.

J. Notice of planned changes.

1. The permittee shall give notice to the department as soon as possible of any planned physical alterations or additions to the permitted facility. Notice is required only when:

a. The permittee plans alteration or addition to any building, structure, facility, or installation from which there is or may be a discharge of pollutants, the construction of which commenced:

(1) After promulgation of standards of performance under § 306 of the federal Clean Water Act which are applicable to such source; or

(2) After proposal of standards of performance in accordance with § 306 of the federal Clean Water Act which are applicable to such source, but only if the standards are promulgated in accordance with § 306 within 120 days of their proposal;

b. The alteration or addition could significantly change the nature or increase the quantity of pollutants discharged. This notification applies to pollutants which are subject neither to effluent limitations nor to notification requirements specified elsewhere in this permit; or

c. The alteration or addition results in a significant change in the permittee's sludge use or disposal practices and such alteration, addition, or change may justify the application of permit conditions that are different from or absent in the existing permit, including notification of additional use or disposal sites not reported during the permit application process or not reported pursuant to an approved land application plan.

2. The permittee shall give advance notice to the department of any planned changes in the permitted facility or activity which may result in noncompliance with permit requirements.

K. Signatory requirements.

1. Registration statement. All registration statements shall be signed as follows:

a. For a corporation: by a responsible corporate officer. For the purposes of this section, a responsible corporate officer means: (i) a president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy- or decision-making functions for the corporation, or (ii) the manager of one or more manufacturing, production, or operating facilities employing more than 250 persons or having gross annual sales or expenditures exceeding \$25 million (in second-quarter

1980 dollars), if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures;

b. For a partnership or sole proprietorship: by a general partner or the proprietor, respectively; or

c. For a municipality, state, federal, or other public agency: by either a principal executive officer or ranking elected official. For purposes of this section, a principal executive officer of a public agency includes: (i) the chief executive officer of the agency or (ii) a senior executive officer having responsibility for the overall operations of a principal geographic unit of the agency.

2. Reports, etc. All reports required by permits, and other information requested by the board, shall be signed by a person described in Part III K 1 or by a duly authorized representative of that person. A person is a duly authorized representative only if:

a. The authorization is made in writing by a person described in Part III K 1;

b. The authorization specifies either an individual or a position having responsibility for the overall operation of the regulated facility or activity such as the position of plant manager, operator of a well or a well field, superintendent, position of equivalent responsibility, or an individual or position having overall responsibility for environmental matters for the company. A duly authorized representative may thus be either a named individual or any individual occupying a named position; and

c. The written authorization is submitted to the department.

3. Changes to authorization. If an authorization under Part III K 2 is no longer accurate because a different individual or position has responsibility for the overall operation of the facility, a new authorization satisfying the requirements of Part III K 2 shall be submitted to the department prior to or together with any reports or information to be signed by an authorized representative.

4. Certification. Any person signing a document under Parts III K 1 or 2 shall make the following certification:

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

L. Duty to comply. The permittee shall comply with all conditions of this permit. Any permit noncompliance constitutes a violation of the State Water Control Law and the federal Clean Water Act, except that noncompliance with certain provisions of this permit may constitute a violation of the State Water Control Law but not the federal Clean Water Act. Permit noncompliance is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or denial of a permit renewal application.

The permittee shall comply with effluent standards or prohibitions established under § 307(a) of the federal Clean Water Act for toxic pollutants and with standards for sewage sludge use or disposal established under § 405(d) of the federal Clean Water Act within the time provided in the regulations that establish these standards or prohibitions or standards for sewage sludge use or disposal, even if this permit has not yet been modified to incorporate the requirement.

M. Duty to reapply. If the permittee wishes to continue an activity regulated by this permit after the expiration date of this permit, the permittee shall submit a new registration statement at least 180 days before the expiration date of the existing permit, unless permission for a later date has been granted by the board. The board shall not grant permission for registration statements to be submitted later than the expiration date of the existing permit.

N. Effect of a permit. This permit does not convey any property rights in either real or personal property or any exclusive privileges, nor does it authorize any injury to private property or invasion of personal rights or any infringement of federal, state or local laws or regulations.

O. State law. Nothing in this permit shall be construed to preclude the institution of any legal action under, or relieve the permittee from any responsibilities, liabilities, or penalties established pursuant to, any other state law or regulation or under authority preserved by § 510 of the federal Clean Water Act. Except as provided in permit conditions on "bypass" (Part III U), and "upset" (Part III V) nothing in this permit shall be construed to relieve the permittee from civil and criminal penalties for noncompliance.

P. Oil and hazardous substance liability. Nothing in this permit shall be construed to preclude the institution of any legal action or relieve the permittee from any responsibilities, liabilities, or penalties to which the permittee is or may be subject under §§ 62.1-44.34:14 through 62.1-44.34:23 of the State Water Control Law.

Q. Proper operation and maintenance. The permittee shall at all times properly operate and maintain all facilities and systems of treatment and control (and related appurtenances) which are installed or used by the permittee to achieve compliance with the conditions of this permit. Proper operation and maintenance also includes effective plant performance, adequate funding, adequate staffing, and adequate laboratory and process controls, including appropriate quality assurance procedures. This provision requires the operation of back-up or auxiliary facilities or

Final Regulations

similar systems which are installed by the permittee only when the operation is necessary to achieve compliance with the conditions of this permit.

R. *Disposal of solids or sludges.* Solids, sludges or other pollutants removed in the course of treatment or management of pollutants shall be disposed of in a manner so as to prevent any pollutant from such materials from entering state waters.

S. *Duty to mitigate.* The permittee shall take all reasonable steps to minimize or prevent any discharge or sludge use or disposal in violation of this permit which has a reasonable likelihood of adversely affecting human health or the environment.

T. *Need to halt or reduce activity not a defense.* It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.

U. Bypass.

1. "Bypass" means the intentional diversion of waste streams from any portion of a treatment facility. The permittee may allow any bypass to occur which does not cause effluent limitations to be exceeded, but only if it also is for essential maintenance to ensure efficient operation. These bypasses are not subject to the provisions of Parts III U 2 and U 3.

2. Notice.

a. *Anticipated bypass.* If the permittee knows in advance of the need for a bypass, prior notice shall be submitted if possible at least 10 days before the date of the bypass.

b. *Unanticipated bypass.* The permittee shall submit notice of an unanticipated bypass as required in Part III I (reports of noncompliance).

3. Prohibition of bypass.

a. *Bypass is prohibited, and the board may take enforcement action against a permittee for bypass, unless:*

(1) *Bypass was unavoidable to prevent loss of life, personal injury, or severe property damage;*

(2) *There were no feasible alternatives to the bypass, such as the use of auxiliary treatment facilities, retention of untreated wastes, or maintenance during normal periods of equipment downtime. This condition is not satisfied if adequate back-up equipment should have been installed in the exercise of reasonable engineering judgment to prevent a bypass which occurred during normal periods of equipment downtime or preventive maintenance; and*

(3) *The permittee submitted notices as required under Part III U 2.*

b. *The board may approve an anticipated bypass, after considering its adverse effects, if the board determines that it will meet the three conditions listed in Part III U 3 a.*

V. Upset.

1. *An upset constitutes an affirmative defense to an action brought for noncompliance with technology-based permit effluent limitations if the requirements of Part III V 2 are met. A determination made during administrative review of claims that noncompliance was caused by upset, and before an action for noncompliance, is not a final administrative action subject to judicial review.*

2. *A permittee who wishes to establish the affirmative defense of upset shall demonstrate, through properly signed, contemporaneous operating logs or other relevant evidence that:*

a. *An upset occurred and that the permittee can identify the cause(s) of the upset;*

b. *The permitted facility was at the time being properly operated;*

c. *The permittee submitted notice of the upset as required in Part III I; and*

d. *The permittee complied with any remedial measures required under Part III S.*

3. *In any enforcement proceeding, the permittee seeking to establish the occurrence of an upset has the burden of proof.*

W. *Inspection and entry.* The permittee shall allow the director or an authorized representative, upon presentation of credentials and other documents as may be required by law, to:

1. *Enter upon the permittee's premises where a regulated facility or activity is located or conducted or where records must be kept under the conditions of this permit;*

2. *Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit;*

3. *Inspect at reasonable times any facilities, equipment (including monitoring and control equipment), practices, or operations regulated or required under this permit; and*

4. *Sample or monitor at reasonable times, for the purposes of ensuring permit compliance or as otherwise authorized by the federal Clean Water Act and the State Water Control Law, any substances or parameters at any location.*

For purposes of this section, the time for inspection shall be deemed reasonable during regular business hours and whenever the facility is discharging. Nothing contained

herein shall make an inspection unreasonable during an emergency.

Virginia Pollutant Discharge Elimination System General Permit Notice of Termination for Nonmetallic Mineral Mining.

X. *Permit actions.* Permits may be modified, revoked and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or a notification of planned changes or anticipated noncompliance does not stay any permit condition.

Y. *Transfer of permits.*

1. Permits are not transferable to any person except after notice to the department. Except as provided in Part III Y 2, a permit may be transferred by the permittee to a new owner or operator only if the permit has been modified or revoked and reissued, or a minor modification made, to identify the new permittee and incorporate such other requirements as may be necessary under the State Water Control Law and the federal Clean Water Act.

2. As an alternative to transfers under Part III Y 1, this permit may be automatically transferred to a new permittee if:

a. The current permittee notifies the department at least 30 days in advance of the proposed transfer of the title to the facility or property;

b. The notice includes a written agreement between the existing and new permittees containing a specific date for transfer of permit responsibility, coverage, and liability between them; and

c. The board does not notify the existing permittee and the proposed new permittee of its intent to modify or revoke and reissue the permit. If this notice is not received, the transfer is effective on the date specified in the agreement mentioned in Part III Y 2 b.

Z. *Severability.* The provisions of this permit are severable, and if any provision of this permit or the application of any provision of this permit to any circumstance is held invalid, the application of such provision to other circumstances and the remainder of this permit shall not be affected thereby.

NOTICE: The forms used in administering 9 VAC 25-190-10 et seq., Virginia Pollutant Discharge Elimination System (VPDES) General Permit Regulation for Nonmetallic Mineral Mining, are listed below. Any amended or added forms are reflected in the listing and are published following the listing.

DEPARTMENT OF ENVIRONMENTAL QUALITY
WATER DIVISION
PERMIT APPLICATION FEE

INSTRUCTIONS

Applicants for individual Virginia Pollutant Discharge Elimination System (VPDES), Virginia Pollution Abatement (VPA), Virginia Water Protection (VWP), Surface Water Withdrawal (SWW), and Ground Water Withdrawal (GWW) Permits are required to pay permit application fees except farming operations engaged in production for the market. Fees are also required for registration for coverage under General Permits except for the general permits for sewage treatment systems with discharges of 1,000 gallons per day (GPD) or less and for Corrective Action Plans for leaking underground storage tanks. Except for VWP permits, fees must be paid when applications for permit issuance, reissuance or modification are submitted. Applicants for VWP permits will be notified by the DEQ of the fee due. Applications will be considered incomplete if the proper fee is not paid and will not be processed until the fee is received.

The permit fee schedule can be found on the back of this form. Fees for permit issuance or reissuance and for permit modification are included. Once you have determined the fee for the type of application you are submitting, complete this form. The white and yellow copies of the form and your check or money order payable to "Commonwealth of Virginia-DEQ" should be mailed to the Department of Environmental Quality, Receipts Control, P.O. Box 10150, Richmond, VA 23240. The pink copy of the form and a copy of your check or money order should accompany the permit application. The gold copy is for your records. Please direct any questions regarding this form or fee payment to the DEQ Office to which you are submitting your application.

FEE SCHEDULE-APPLICATIONS FOR INDIVIDUAL PERMITS EXCEPT FOR VIRGINIA WATER PROTECTION PERMITS (DUE WITH SUBMISSION OF APPLICATION)

TYPE OF PERMIT	ISSUANCE/ REISSUANCE	MODIFICATION
VPDES Industrial Major	\$8,000	\$4,000
VPDES Municipal Major	\$7,100	\$3,550
VPDES Municipal Storm Water	\$7,100	\$3,550
VPDES Industrial Minor, No Standard Limits	\$3,400	\$1,700
VPDES Industrial Minor, Standard Limits	\$2,200	\$1,100
VPDES Industrial Storm Water	\$2,400	\$1,200
VPDES Municipal Minor, 100,000 GPD or More	\$2,500	\$1,250
VPDES Municipal Minor, More than 10,000 GPD but Less than 100,000 GPD	\$2,000	\$1,000
VPDES Municipal Minor, More than 1,000 GPD but 10,000 GPD or Less	\$1,800	\$ 900
VPDES Municipal Minor, 1,000 GPD or Less	\$1,400	\$ 700
VPA Industrial Wastewater Operation	\$3,500	\$1,750
VPA Industrial Sludge Operation	\$2,500	\$1,250
VPA Municipal Wastewater Operation	\$4,500	\$2,250
VPA Municipal Sludge Operation	\$2,500	\$1,250
GWW Initial Permit for an Existing Withdrawal	\$ 400	\$ 200
GWW Permit for a New or Expanded Withdrawal	\$2,000	\$1,000
SWW Certificate for an Existing Withdrawal	\$2,000	\$1,000
SWW Permit for a New or Expanded Withdrawal	\$3,000	\$1,500

FEE SCHEDULE-APPLICATIONS FOR INDIVIDUAL VIRGINIA WATER PROTECTION PERMITS (APPLICANT WILL BE NOTIFIED OF FEE DUE BY DEQ)

TYPE OF PERMIT	ISSUANCE/ REISSUANCE	MODIFICATION
VWP Category I Project	\$3,000	\$1,500
VWP Category II Project	\$2,100	\$1,050
VWP Category III Project	\$ 800	\$ 400
VWP Waiver	\$ 300	\$ 150

FEE SCHEDULE-REGISTRATION FOR GENERAL PERMIT COVERAGE

The maximum fee for registration for general permit coverage is \$200. The specific amount of the fee depends on the amount of time the general permit will remain in effect. Please contact the DEQ Office to which registration materials are to be submitted for assistance in determining the amount of the fee due.

GENERAL NOTICES/ERRATA

STATE CORPORATION COMMISSION

EDITOR'S NOTICE: Appendices A and B referenced in the following order are not being published. However, these appendices are available for public inspection at the State Corporation Commission, Document Control Center, Tyler Building, 1st Floor, 1300 East Main Street, Richmond, Virginia, from 8:15 a.m. to 5 p.m., Monday through Friday.

AT RICHMOND, MARCH 19, 1999

COMMONWEALTH OF VIRGINIA, ex rel.

STATE CORPORATION COMMISSION

CASE NO. PUC970113

Ex Parte: Investigation of the termination of local exchange for failure to pay for long distance services

ORDER GRANTING PETITIONS FOR RECONSIDERATION

On March 17, 1999, the Virginia Telecommunications Industry Association ("VTIA") filed its Petition for Reconsideration of the Commission's Final Order of February 26, 1999. On March 17, 1999, Central Telephone Company of Virginia and United Telephone-Southeast, Inc. ("Centel/United") filed their Joint Petition for Reconsideration and Clarification. On March 18, 1999, AT&T Communications of Virginia, Inc. ("AT&T") also filed a Petition for Reconsideration.

Pursuant to the terms of the Commission's Rule of Practice and Procedure 8:9, the Commission has determined that the Petitions for Reconsideration should be granted in order to allow the Commission to retain jurisdiction over this matter while the issues raised by VTIA, Centel/United, and AT&T are reviewed. All parties are invited to respond to issues raised in the Petitions for Reconsideration on or before April 2, 1999. Accordingly,

IT IS THEREFORE ORDERED THAT:

- (1) The Petitions for Reconsideration filed by VTIA on March 17, 1999, Centel/United on March 17, 1999, and by AT&T on March 18, 1999, are hereby granted.
- (2) All parties may respond to the issues raised in the Petitions for Reconsideration on or before April 2, 1999.
- (3) Pending the Commission's reconsideration, no provision of the order of February 26, 1999, is suspended or altered and this matter is continued generally until further order of the Commission.

AN ATTESTED COPY hereof shall be sent by the Clerk of the Commission to each local exchange company subject to the jurisdiction of the Commission as set out in Appendix A attached hereto; each interexchange carrier certificated in Virginia as set out in Appendix B attached hereto; Division of Consumer Counsel, Office of the Attorney General, 900 East Main Street, Second Floor, Richmond, Virginia 23219; Cox Virginia Telecom, Inc., Edward L. Petrini, Esquire, and

John D. Sharer, Esquire, Christian & Barton, L.L.P., 909 East Main Street, Suite 1200, Richmond, Virginia 23219-3095; Warner F. Brundage, Jr., Esquire, Vice President, General Counsel and Secretary, Bell Atlantic-Virginia, Inc., 600 East Main Street, 11th Floor, Richmond, Virginia 23219; Wilma R. McCarey, Esquire, AT&T Communications of Virginia, Inc., 3033 Chainbridge Road, Room 3-D, Oakton, Virginia 22185-0001; Virginia Telecommunications Industry Association, Michelle K. Walsh, Esquire, and Richard D. Gary, Esquire, Hunton & Williams, Riverfront Plaza, East Tower, 951 East Byrd Street, Richmond, Virginia 23219-4074; Stephen C. Spencer, Regional Director-External Affairs, GTE South Incorporated, Three James Center, Suite 1200, 1051 East Cary Street, Richmond, Virginia 23219; MCI Telecommunications WorldCom, James R.J. Lipman, Esquire, and Jean L. Kiddoo, Esquire, Swidler & Berlin, 3000 K Street, N.W., Washington, D.C. 20007-5116; Operator Service Providers, Mr. Paul Gamberg, 6611 Valjean Avenue, #201, Van Nuys, California 91406; Lois Hash, 3328 Williamson Road, Roanoke, Virginia 24012; David Altizer, 301 Memorial Boulevard, Narrows, Virginia 24124; Hilda Isaacs, 4601 Mayflower Road, Apartment 4K, Norfolk, Virginia 23508; Louise Gwaltney, 100 Tricia Lane, Apartment 1A, Newport News, Virginia 23601; W. Charles Cox, 4612 Sanders Drive, Roanoke, Virginia 24019-5836; Janelle K. Hamric, 5034 Sugar Grove Highway, Sugar Grove, Virginia 24375-3160; Mr. and Mrs. James C. Eure, 1916 Redgate Drive, Portsmouth, Virginia 23702; Horace and Arline McClellan, 480 Wassona Drive, Marion, Virginia 24354; Elizabeth D. Prater, 4885 Sugar Grove Highway, Sugar Grove, Virginia 24375-3166; Perry A. Rivkind, 11164 Park Place, Smithfield, Virginia 23430; Ann M. Hills, Worthington Hanon, Ltd., 469 South Five Fork Road, Monroe, Virginia 24574-2753; David F. Johnston, Sr., President, Antique Properties, Inc., P.O. Box 1265, Bowling Green, Virginia 22427; Carol L. Baynes, 1105-D North Hamilton Street, Richmond, Virginia 23221; Elizabeth R. Price, 13060 Northridge Road, Abingdon, Virginia 24210; the Commission's Office of General Counsel and the

Commission's Divisions of Communications, Public Utility Accounting, and Economics and Finance.

DEPARTMENT OF ENVIRONMENTAL QUALITY

Notice of Public Comment Muddy Creek TMDL

The Department of Environmental Quality and the Department of Conservation and Recreation seek written comment from interested persons on the draft Total Maximum Daily Load (TMDL) for fecal coliform bacteria on a 10.36 mile segment of Muddy Creek. This impaired segment is located in Rockingham County and extends from the headwaters of Muddy Creek to the confluence with Dry River. Muddy Creek is identified in Virginia's 1998 303(d) TMDL Priority List and Report as impaired due to violations of the state's water quality standard for fecal coliform bacteria.

Section 303(d) of the federal Clean Water Act and § 62.1-44.19:7 C of the Code of Virginia require the development and implementation of TMDLs for pollutants responsible for each impaired water contained in Virginia's 303(d) TMDL Priority List and Report.

The public comment period will end on Wednesday, May 26, 1999. A copy of the revised draft TMDL for fecal coliform bacteria on Muddy Creek is available upon request. Questions or information requests should be addressed to the person listed below. Written comments should include the name, address, and telephone number of the person submitting the comments and should be sent to Mr. Charles Martin, Department of Environmental Quality, P.O. Box 10009, Richmond, Virginia 23240-0009, telephone (804) 698-4462, Fax (804) 698-4136, or e-mail chmartin@deq.state.va.us.

GENERAL ASSEMBLY OF VIRGINIA 1999 SESSION

House Joint Resolution No. 741

Expressing the sense of the General Assembly of Virginia that state agencies and institutions avoid certain dates for the implementation of new programs or procedures as they prepare for the Year 2000.

Agreed to by the House of Delegates, February 8, 1999
Agreed to by the Senate, February 18, 1999

WHEREAS, the transition to the new millennium on January 1, 2000, is an exciting event and much is being done, and will continue to be done, to ensure that computers, software programs, databases, networks, information systems, firmware, and other devices make a smooth transition to the new millennium; and

WHEREAS, in addition to the date of January 1, 2000, other dates have been identified that may be affected by "the millennium bug"; and

WHEREAS, included among those dates are April 1, 1999, the first day of fiscal year 2000 for some government and corporate entities; April 9, 1999, the 99th day of 1999, read as "9999" on a Julian calendar, and used by many programmers as a "holding date"; July 1, 1999, the first day of fiscal year 2000 for 46 of 50 states, including Virginia; September 9, 1999, read as "9999" on the more common Gregorian calendar; October 1, 1999, the first day of fiscal year 2000 for the federal government; December 31, 1999, the last day of the 20th century, which is used by many programmers as a "holding date"; February 29, 2000, a leap year date; March 1, 2000, a potential problem if the date of February 29, 2000, is not properly processed; December 31, 2000, the 366th day of 2000 and another potential problem if the date of February 29, 2000, is not properly processed; and January 1, 2001, for computers based on cycles starting from 1901 instead of 1900, the year 2001 will appear as "00" in the date field; and

WHEREAS, to date, the Commonwealth has made a significant investment in money and personnel to ensure that its computers, software programs, databases, networks, information systems, firmware, and other devices are compliant with the Year 2000 date change; and

WHEREAS, state employees and other personnel will continue to work on repairing, renovating, modifying, converting, and testing computers, software programs, databases, networks, information systems, firmware, and other devices through 1998 and 1999 and well into the Year 2000; and

WHEREAS, as the new millennium approaches, it is expected that more and more financial and human resources will be expended to ensure Year 2000 readiness; and

WHEREAS, whenever any organization implements a new program or procedure, it is time consuming and resource intensive; and

WHEREAS, implementation of a new program or procedure on or around January 1, 2000, or the other dates that may be affected by "the millennium bug" could detract from the financial or personnel resources that should be expended on the Year 2000 effort or, conversely, could detract from the financial or personnel resources that should be expended on the new program or procedure; and

WHEREAS, if problems or difficulties are encountered in implementing a new program or procedure on or about January 1, 2000, or the other dates that may be affected by "the millennium bug," it would be difficult to determine whether the problems or difficulties were related to the new program or procedure itself or a lack of Year 2000 readiness; and

WHEREAS, in recognition of these realities, the National Association of Insurance Commissioners, the organization representing state insurance regulators, voted in September 1998 to refrain from adopting or recommending model laws or regulations that would hinder insurance companies' efforts to achieve Year 2000 compliance; and

General Notices/Errata

WHEREAS, the National Coalition of Insurance Legislators and the National Conference of State Legislators endorsed this moratorium, which is in effect from July 1, 1999, to June 30, 2000; and

WHEREAS, the action of the National Association of Insurance Commissioners was an example of prudent policy making and recognizes that organizations, such as insurance companies, need to expend their financial and personnel resources on Year 2000 readiness without the distractions of new programs or procedures; now, therefore, be it

RESOLVED by the House of Delegates, the Senate concurring, That state agencies and institutions be encouraged to avoid certain dates for the implementation of new programs or procedures as they prepare for the Year 2000. Such dates are those on or about April 1, 1999; April 9, 1999; July 1, 1999; September 9, 1999; October 1, 1999; December 31, 1999; January 1, 2000; February 29, 2000; March 1, 2000; December 31, 2000; and January 1, 2001; and, be it

RESOLVED FURTHER, That the Clerk of the House of Delegates transmit copies of this resolution to His Excellency, the Governor of the Commonwealth, and the Secretaries of Administration, Commerce and Trade, Education, Finance, Health and Human Resources, Natural Resources, Public Safety, Technology, and Transportation, requesting that they further disseminate copies of this resolution to the respective agency heads and information technology personnel at the agencies so that they may be apprised of the sense of the General Assembly of Virginia in this matter.

DEPARTMENT OF HEALTH

Drinking Water State Revolving Fund Program

Drinking Water Funding

Several opportunities for drinking water funding are made available by the Department of Health's Drinking Water State Revolving Fund Program. Funds for items 1 and 2 are available now by submitting applications available from the contact person listed below.

1. Planning & Design Grants – (Gray application) Must be postmarked by May 27, 1999.

Private and public owners of community waterworks are eligible to apply for these grant funds. Grants can be up to \$25,000 per project, especially for small, rural, financially stressed, community waterworks serving fewer than 3,300 persons. Eligible projects may include preliminary engineering planning, design of plans and specifications, performance of source water quality and quantity studies, drilling test wells to determine source feasibility, or other similar technical assistance projects. These funds could assist the waterworks owner in future submittals for construction funds.

2. 1452(k) Source Water Protection Initiatives - (a) Land or Conservation Easement Loans or (b) Voluntary Incentive-based Protection Measures Loans – (Yellow application) Must be postmarked by May 27, 1999.

This provision allows VDH to loan money for activities to protect important drinking water resources. Loan funds are available to: (1) community and nonprofit noncommunity waterworks to acquire land/conservation easements and (2) community waterworks, only, to establish local, voluntary incentive-based protection measures.

Funds for items 3 and 4 should be available January 2000 and will come from federal appropriations in FY 2000 for items authorized by the Safe Drinking Water Act Amendments of 1996. Our FY 2000 Intended Use Plan will be developed using your input on these issues.

3. FY 2000 Construction Funds – (Cream application) Must be postmarked by June 15, 1999.

Private and public owners of community waterworks and nonprofit noncommunity waterworks are eligible to apply for construction funds. VDH makes selections based on criteria described in the Program Design Manual, such as existing public health problems, noncompliance, affordability, regionalization, the availability of matching funds, etc. Readiness to proceed with construction is a key element.

4. FY 2000 Set-Aside Suggestion Forms – (White form) Must be postmarked by June 15, 1999.

The FY 2000 funds bring anyone the opportunity to suggest new or continuing set-aside (nonconstruction) activities such as items 1 and 2 above, small system technical assistance, viability enhancements, operator programs and general technical assistance. Set-aside funds help VDH assist waterworks owners to prepare for future drinking water challenges and assure the sustainability of safe drinking water.

The VDH's Program Design Manual describes the features of the above opportunities for funding. After receiving the aforementioned public input, VDH will develop a draft Intended Use Plan for public review and comment. When developed in August 1999, the draft Intended Use Plan will describe specific details for use of the FY 2000 funds. A public meeting will be planned for the fall of 1999 and written comments will also be accepted before we submit a final version to the USEPA for approval.

Agency contact: The applications, set-aside suggestion form, Program Design Manual and information may be obtained from Thomas B. Gray, P.E., Special Projects Manager, Department of Health, 1500 East Main Street, Room 109, Richmond, VA 23219, telephone (804) 786-1768, FAX (804) 786-5567 or (804) 786-1089/TTY ☎.

STATE WATER CONTROL BOARD

Proposed Consent Special Order Canaan Valley Estates

The State Water Control Board proposes to enter into a consent special order with Canaan Valley Estates (Canaan) to resolve violations of the State Water Control Law and regulations at the Canaan sewage treatment plant. Canaan discharges treated wastewater into Linkswiler Branch in Rockbridge County under authority of a VPDES Permit. Since approximately April 1997 the Canaan sewage treatment plant has experienced difficulty complying with biochemical oxygen demand (BOD) and total suspended solids (TSS) permit effluent limitations.

The proposed consent special order settles outstanding Notices of Violation and incorporates a schedule of compliance to upgrade the sewage treatment plant in order to gain consistent compliance with all the permit requirements.

The board will receive written comments relating to the proposed consent special order until May 26, 1999. Comments should be addressed to Steven W. Hetrick, Department of Environmental Quality, Post Office Box 1129, Harrisonburg, Virginia 22801, and should refer to the consent special order.

The proposed order may be examined at the Department of Environmental Quality, Valley Regional Office, 4411 Early Road, Harrisonburg, Virginia 22801. A copy of the order may be obtained in person or by mail from this office.

Proposed Consent Special Order Holtzman Oil Company

The State Water Control Board proposes to enter into a consent special order with Holtzman Oil Company (Holtzman) to resolve violations of the State Water Control Law and regulations at the Berryville Chevron (Red Apple) service station. Holtzman discharged petroleum contaminated groundwater to Dog Run in the Town of Berryville and failed to report a suspected release of petroleum at this site.

The proposed consent special order settles an outstanding Notice of Violation and incorporates a schedule of compliance requiring Holtzman to develop and institute proper procedures for de-watering underground storage tank basins, ensure proper inventory recordkeeping at its facilities, address outstanding compliance issues, and pay a civil charge.

The board will receive written comments relating to the proposed consent special order until May 26, 1999. Comments should be addressed to Steven W. Hetrick, Department of Environmental Quality, Post Office Box 1129, Harrisonburg, Virginia 22801, and should refer to the consent special order.

The proposed order may be examined at the Department of Environmental Quality, Valley Regional Office, 4411 Early Road, Harrisonburg, Virginia 22801. A copy of the order may be obtained in person or by mail from this office.

Proposed Consent Special Order Massanutten Public Service Corporation

The State Water Control Board proposes to enter into a consent special order with Massanutten Public Service Corporation (Massanutten PSC) to resolve violations of the State Water Control Law and regulations at Massanutten PSC's sewage treatment plant in Rockingham County. Massanutten PSC discharges treated wastewater into Quail Run under authority of a VPDES permit. DEQ has conducted a biological stream survey of Quail Run below Massanutten PSC's outfall which indicated that Quail Run appeared to be adversely impacted downstream of the Massanutten PSC's discharge in violation of the board's Water Quality Standards regulations. Also, Massanutten PSC has experienced biochemical oxygen demand effluent limitation violations.

The proposed consent special order settles the outstanding Notices of Violation and incorporates a schedule of compliance to evaluate the facility's performance, conduct a stream model to assist in the determination of whether the permit limitations are appropriately set, and provide for identification and elimination of any component of the Massanutten PSC discharge or its treatment scheme that may be causing a toxicity problem. The order also includes a civil charge.

The board will receive written comments relating to the proposed consent special order until May 26, 1999. Comments should be addressed to Steven W. Hetrick, Department of Environmental Quality, Post Office Box 1129, Harrisonburg, Virginia 22801, and should refer to the consent special order.

The proposed order may be examined at the Department of Environmental Quality, Valley Regional Office, 4411 Early Road, Harrisonburg, Virginia 22801. A copy of the order may be obtained in person or by mail from this office.

VIRGINIA CODE COMMISSION

Notice to State Agencies

Mailing Address: Virginia Code Commission, 910 Capitol Street, General Assembly Building, 2nd Floor, Richmond, VA 23219. You may FAX in your notice; however, we ask that you FAX two copies and do not follow up with a mailed copy. Our FAX number is: (804) 692-0625.

NOTICE

Only those meetings which are filed with the Registrar of Regulations by the filing deadline noted at the beginning of this publication are listed. Since some meetings are called on short notice, please be aware that this listing of meetings may be incomplete. Also, all meetings are subject to cancellation and the *Virginia Register* deadline may preclude a notice of such cancellation.

For additional information on open meetings and public hearings held by the standing committees of the legislature during the interim, please call Legislative Information at (804) 698-1500 or Senate Information and Constituent Services at (804) 698-7410 or (804) 698-7419/TTY☎, or visit the General Assembly web site's Legislative Information System (<http://leg1.state.va.us/lis.htm>) and select "Meetings."

VIRGINIA CODE COMMISSION

† **May 25, 1999 - 7 p.m.** – Public Hearing
Patrick Henry High School, 2102 Grandin Road, S.W., Roanoke, Virginia.

† **May 25, 1999 - 7 p.m.** – Public Hearing
Robert E. Lee High School, 1200 North Coalter Street, Staunton, Virginia.

The Board of Education announces its intention to develop measures addressing school accountability. As a part of the process, the board will conduct a series of public hearings to receive public comment on key education issues including rewards and consequences for schools which achieve, or fail to achieve, accreditation under Virginia's new Regulations

Establishing Standards for Accrediting Public Schools in Virginia (8 VAC 20-131-10 et seq.). Following this initial round of public hearings, the board will initiate the process to amend its accreditation regulations pursuant to the Administrative Process Act and applicable executive orders. The board will hold an extensive second round of public hearings after its draft proposals are published in the *Virginia Register*.

Contact: Dr. Margaret N. Roberts, Executive Assistant for Board Relations, Department of Education, Monroe Bldg., 101 N. 14th St., P.O. Box 2120, Richmond, VA 23218-2120, telephone (804) 225-2540, FAX (804) 225-2524 or toll-free 1-800-292-3820.

STATE EMERGENCY MEDICAL SERVICES ADVISORY BOARD

May 7, 1999 - 1 p.m. – Open Meeting
Embassy Suites Hotel, 2925 Emerywood Parkway,
Richmond, Virginia. 

A quarterly meeting.

Contact: Irene Hamilton, Executive Secretary Senior, Office of Emergency Medical Services, Department of Health, 1583 E. Parham Rd., Richmond, VA 23230, telephone (804) 371-3500, FAX (804) 371-3543 or toll-free 1-800-523-6019.

DEPARTMENT OF ENVIRONMENTAL QUALITY

† April 28, 1999 - 10 a.m. – Open Meeting
Department of Environmental Quality, 629 East Main Street,
Training Room, Richmond, Virginia.

A meeting of the Citizens Wetlands Advisory Committee to review, revise and develop a wetlands strategy for the Commonwealth which addresses the administration's commitment to a net-gain in wetland acreage. The committee will address questions related to meeting the commitment and wetlands protection and restoration goals of the Chesapeake Executive Council Directive No. 97-2. There will be an opportunity for public comment at the end of the meeting. Additional meetings are scheduled for May 26, June 30, July 28, August 25 and September 29, 1999. These dates and locations are subject to change and persons interested in attending should confirm with William K. Norris.

Contact: William K. Norris, Department of Environmental Quality, P.O. Box 10009, Richmond, VA 23240, telephone (804) 698-4022 or FAX (804) 698-4019.

† May 6, 1999 - 7 p.m. – Public Hearing
1 County Complex Court, Occoquan Room, Prince William,
Virginia.

A public hearing to receive comments on the proposed modification of the Prince William County Sanitary Landfill Permit #29. The facility is located on State Route 234, 0.4 miles east of the junction of State Route 646 and 234 near Independent Hill in Prince William

County. The proposal includes modifications to the liner design, the relocation of two ground water monitoring wells, and the establishment of ground water protection standards.

Contact: Michael J. Dieter, Department of Environmental Quality, Office of Waste Permitting, P.O. Box 10009, Richmond, VA 23240, telephone (804) 698-4146.

† May 12, 1999 - 7 p.m. – Public Hearing
Liberty High School, 6300 Independence Avenue,
Auditorium, Bealeton, Virginia.

A public hearing to receive comments on an application from Virginia Electric and Power Company to construct and operate a simple cycle combustion turbine station located off Route 655, approximately two miles northeast of Remington in Fauquier County, Virginia.

Contact: Terry Darton, Department of Environmental Quality, Fredericksburg Satellite Office, 806 Westwood Office Park, Fredericksburg, VA 22401, telephone (540) 899-4600.

Virginia Ground Water Protection Steering Committee

BOARD OF GAME AND INLAND FISHERIES

May 6, 1999 - 9 a.m. – Open Meeting

May 7, 1999 - 9 a.m. – Open Meeting

Department of Game and Inland Fisheries, 4000 West Broad Street, Richmond, Virginia.  (Interpreter for the deaf provided upon request)

The board will meet to consider for final adoption wildlife regulations to be effective from July 1999 through June 2001. Under board procedures, regulatory actions occur over two sequential board meetings. At the May 6, 1999, meeting, the board will determine whether the amendments to regulations for game wildlife, hunting and trapping, including the length of seasons, bag limits and methods of take for game, which were proposed at its March 4, 1999, board meeting, will be adopted as final regulations. The board will solicit comments from the public during the public hearing portion of the meeting on May 6, at which time any interested citizen present shall be heard. The board reserves the right to adopt final amendments which may be more liberal than, or more stringent than, the regulations currently in effect or the regulation amendments proposed at the March 4, 1999, board meeting, as necessary for the proper management of wildlife resources.

Additional information on this review of regulations, including a list of the specific regulations subject to review and additional details on opportunities for public involvement, was published in a separate announcement in the "General Notices" section of the February 15, 1999, *Virginia Register*.

The board may discuss general and administrative issues. The board may hold an executive session before the public session begins on May 6. If the board completes its agenda on May 6, it may not convene on May 7, the second of the scheduled two days of the meeting. The board may elect to hold a dinner Wednesday evening, May 5, at a location and time to be determined.

Contact: Phil Smith, Policy Analyst, Department of Game and Inland Fisheries, 4010 W. Broad St., Richmond, VA 23230, telephone (804) 367-1000 or FAX (804) 367-2311.

HAMMOND COMMISSION

April 29, 1999 - 10 a.m. – Open Meeting

Crystal Towers Building, 145 West Campbell Avenue, Roanoke, Virginia.  (Interpreter for the deaf provided upon request)

A meeting on substance abuse and addiction services. Public comment will be received at 10 a.m. Following the meeting commission members will visit some of the programs operating in Roanoke.

Contact: Fran M. Sadler, Administrative Assistant, Department of Social Services, 730 E. Broad St., Richmond, VA 23219, telephone (804) 692-1108 or FAX (804) 692-1123.

A public hearing to receive comments on the Virginia Waste Management Board's Notice of Intended Regulatory Action for Amendment 15 to the Virginia Hazardous Waste Management Regulations, 9 VAC 20-60-12 et seq. Amendment 15 will update the Commonwealth's regulations to coordinate with recent changes to federal regulations, replace existing text with incorporation of federal regulations, correct errors, and improve clarity.

Contact: Robert G. Wickline, Department of Environmental Quality, P.O. Box 10009, Richmond, VA 23240, telephone (804) 698-4213 or FAX (804) 698-4327.

† May 4, 1999 - 9 a.m. – Open Meeting
† May 17, 1999 - 9 a.m. – Open Meeting
Department of Environmental Quality, Piedmont Regional Office, 4949-A Cox Road, Glen Allen, Virginia. ♿ (Interpreter for the deaf provided upon request)

A meeting of the Technical Advisory Committee to discuss the development of the proposed Regulation for Transportation of Solid and Medical Wastes on State Waters, 9 VAC 20-170-10 et seq.

Contact: Lily Choi, Environmental Engineer Senior, Department of Environmental Quality, P.O. Box 10009, Richmond, VA 23240, telephone (804) 698-4054 or FAX (804) 698-4032.

BOARD FOR WASTE MANAGEMENT FACILITY OPERATORS

May 20, 1999 - 10 a.m. – Open Meeting
Department of Professional and Occupational Regulation, 3600 West Broad Street, Conference Room 5 West, Richmond, Virginia. ♿

A meeting to conduct routine board business. A public comment period will be held at the beginning of the meeting.

Contact: David E. Dick, Assistant Director, Department of Professional and Occupational Regulation, 3600 W. Broad St., Richmond, VA 23230-4917, telephone (804) 367-8595, FAX (804) 367-2475 or (804) 367-9753/TTY ☎

STATE WATER CONTROL BOARD

April 27, 1999 - 7 p.m. – Public Hearing
Weyers Cave Community Center, 1.5 miles east of I-81, 683 Weyers Cave Road (SR 256), Weyers Cave, Virginia.

A public hearing to receive comments on the proposed issuance of the Virginia Pollution Abatement Permit for Houff's Feed Fertilizer Company, Inc., land application of both municipal and industrial sludge to agricultural fields in both Augusta and Rockingham counties.

Contact: Kemper Loyd, Department of Environmental Quality, Valley Regional Office, 4411 Early Rd., Harrisonburg, VA 22801, telephone (540) 574-7800.

* * * * *

May 5, 1999 - 3 p.m. – Public Hearing
Alleghany County Administration Building, 110 Rosedale Avenue, Covington, Virginia.

May 28, 1999 - Public comments may be submitted until this date.

Notice is hereby given in accordance with § 9-6.14:7.1 of the Code of Virginia that the State Water Control Board intends to amend regulations entitled: **9 VAC 25-260-5 et seq. Water Quality Standards.** The purpose of the proposed

amendments is to correct the downstream limits of a stocked trout stream classification for the Jackson River in Covington, Virginia. If adopted as proposed, the amendment would change 1.7 miles of stream from a stocked trout designation to mountainous zone waters.

Question and Answer Period: A question and answer period will be held one-half hour prior to the beginning of the public hearing at the same location. Department of Environmental Quality staff will be present to answer questions regarding the proposed action.

Accessibility to Persons with Disabilities: The meeting will be held at a public facility believed to be accessible to persons with disabilities. Any person with questions on the accessibility of the facilities should contact Eleanore Daub, Department of Environmental Quality, P.O. Box 10009, Richmond, VA 23240-0009, or by telephone at (804) 698-4111 or 1-800-592-5482 or TTY (804) 698-4261. Persons needing interpreter services for the deaf must notify Ms. Daub no later than April 28, 1999.

The agency requests comments on any aspect of the proposal and also on the costs and benefits of the proposal.

Other Pertinent Information: The department has conducted analyses on the proposed action related to basis, purpose, substance, issues, need, estimated impacts, applicable federal requirements and alternative approaches and schedule for reevaluation. These analyses as well as copies of the amendments may be viewed at the Department of Environmental Quality, West Central Regional Office, 3019 Peters Creek Road, Roanoke, VA 24019, or obtained from Eleanore Daub, Department of Environmental Quality, P.O. Box 10009, Richmond, VA 23240-0009, or by telephone at (804) 698-4111 or toll free at 1-800-592-5482 or TTY (804) 698-4261.

Statutory Authority: § 62.1-44.15 of the Code of Virginia.

Contact: Eleanore Daub, Environmental Program Planner, Department of Environmental Quality, P.O. Box 10009, Richmond, VA 23240-0009, telephone (804) 698-4111, FAX (804) 698-4522 or toll-free 1-800-592-5482.

May 6, 1999 - 7 p.m. – Public Hearing
Department of Environmental Quality, Valley Regional Office, 4411 Early Road, Harrisonburg, Virginia.

A public hearing to receive comments on the proposed reissuance of a VPDES permit for Vesper View Sewage Treatment Plant located in Crimora.

Contact: Jay Roberts, Department of Environmental Quality, Valley Regional Office, 4411 Early Rd., Harrisonburg, VA 22801, telephone (540) 574-7800.

† May 19, 1999 - 7 p.m. – Public Hearing
Louisa County High School, 757 Davis Highway, Auditorium, Mineral, Virginia.

A public hearing to receive comments on the proposed issuance of a Virginia Pollutant Discharge Elimination System permit for a sanitary discharge to Lake Anna

from the Stonewall Hillside Villas Sewage Treatment Plant.

Contact: Beverly Carver, Valley Regional Office, Department of Environmental Quality, P.O. Box 1129, Harrisonburg, VA 22801, telephone (540) 574-7805.

† June 15, 1999 - 9:30 a.m. – Open Meeting
General Assembly Building, 9th and Broad Streets, House Room C, Richmond, Virginia. 

A regular meeting.

Contact: Cindy Berndt, Department of Environmental Quality, P.O. Box 10009, Richmond, VA 23240, telephone (804) 698-4378.

COLLEGE OF WILLIAM AND MARY

April 29, 1999 - Noon – Open Meeting

April 30, 1999 - 8 a.m. – Open Meeting
Blow Memorial Hall, Richmond Road, Williamsburg, Virginia.  (Interpreter for the deaf provided upon request)

A regularly scheduled meeting of the Board of Visitors to approve the budgets and fees of the College of William and Mary and Richard Bland College, to receive reports from several committees of the board, and to act on those resolutions that are presented by the administrations of the College of William and Mary and Richard Bland College. An informational release will be available four days prior to the board meeting for those individuals and organizations who request it.

Contact: William T. Walker, Jr., Director, Office of University Relations, College of William and Mary, 312 Jamestown Rd., P.O. Box 8795, Williamsburg, VA 23187-8795, telephone (757) 221-2624.
