

Slido for Virtual Events and Conferences

slido

10 Tips For Running Virtual Events

- 1.** Leave more time for interaction due to a delay
- 2.** Pull out questions from the attendees (“Take 30s to formulate your Qs.”)
- 3.** Share the access with online speakers so they can monitor incoming questions
- 4.** Share the screen with questions and polls so online participants can follow
- 5.** Use polls more frequently than in live events to have feedback from online participants
(often the only way to hear from them)
- 6.** Have a dedicated host who can ask questions, run polls and communicate with online audience
- 7.** Address online people repeatedly and encourage them to participate
- 8.** In larger meetings, have a person dedicated to troubleshooting and addressing tech requests
- 9.** Think of sharing a special content during breaks (e.g. sport studio)
- 10.** Use quizzes to deliver stats, report or survey results

How to use Slido with video conferencing tools

1. [Embed Slido into your website](#) (next to your live stream)
2. [Integrate live video with Slido event](#)
3. [Participants join Slido](#) via their devices (as if in live events)

* the links are clickable

1. Embed Slido into your website

The screenshot shows a Safari browser window at the URL `blog.slido`. The page features the Slido logo and navigation links for Blog, Conferences, Meetings, Presentations, Education, Remote, and Product. A prominent green button labeled "Try Slido" is visible. The main content area is split into two sections. On the left, a video player shows a woman speaking at a podium, with a play button and a 1:09 duration indicator. To the left of the video are social media icons for Facebook, Twitter, LinkedIn, and WhatsApp. On the right, a Q&A interface is displayed, showing a "Main stage" header with a "Q&A" tab and a "Polls" tab. Below this is a text input field for asking questions. A list of questions is shown, including one from Filip asking about skills learned in 5 minutes, one from Rachel about Elon Musk's meetings, and one from Hannah about business development efforts. Each question has a "0" vote and an "Ask" button. A "Lucy" profile is visible at the bottom of the list. A "Need help?" button is located in the bottom right corner of the page.

If you're live-streaming your event from your website or a dedicated landing page, you can embed Slido **participant mode** into your website. Slido will then be displayed in a separate window on your website.

Your online participants will be able to type and send their questions, or vote in polls, surveys and quizzes, directly from this website.

2. Integrate live video with Slido event

The screenshot displays the Slido event interface. At the top, a blue navigation bar contains a menu icon, the text "Video Embed", and tabs for "Q&A" and "Polls". On the left, a sidebar includes "Video Embed" (Feb 20 - 23, 2020, #VideoEmbed), "Live interaction", "Switch event", and "About Slido". The main content area features a "Livestream" player with a video titled "What is Slido?". The video shows a woman in a pink sweater sitting in a yellow chair. A green overlay on the left of the video contains the text "What is Slido?" and a play button. Above the video are "Watch later" and "Share" icons. To the right of the video is a "Q&A" section titled "Ask the speaker" with a text input field containing "Type your question". Below this is a question icon and the text "There are no questions asked yet. Ask the first one!". At the bottom, the Slido logo is centered, and the footer contains "Login as admin - Present mode", "Acceptable Use - Privacy Policy", and "© 2012-2020 slido - 4.69.0".

3. Share Slido on screen + participants join via their devices

How to seamlessly display content
and Slido when sharing screen

slido

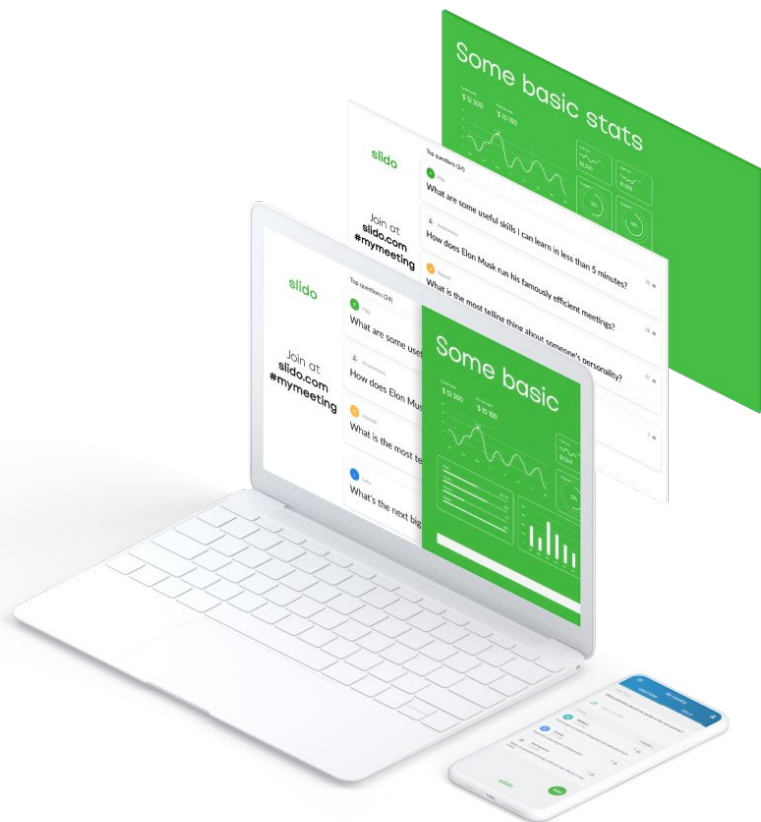

How to seamlessly display content and Slido when sharing screen

1. [Switcher](#)
2. [Google Slides integration](#)
3. [PowerPoint integration](#)

* the links are clickable

1. Switcher

Use our free Switcher app to seamlessly switch between Slido and your presentation.

[Learn more here](#)

slido

2. Google Slides integration

Engage your audience with live polling and Q&A without ever leaving Google Slides.

The screenshot shows a Google Slides presentation titled "Training session" with the Slido integration. The main slide content is as follows:

Join at
slido.com
#mymeeting

Which topic would you like to focus on most today?

The Slido sidebar on the right displays the following information:

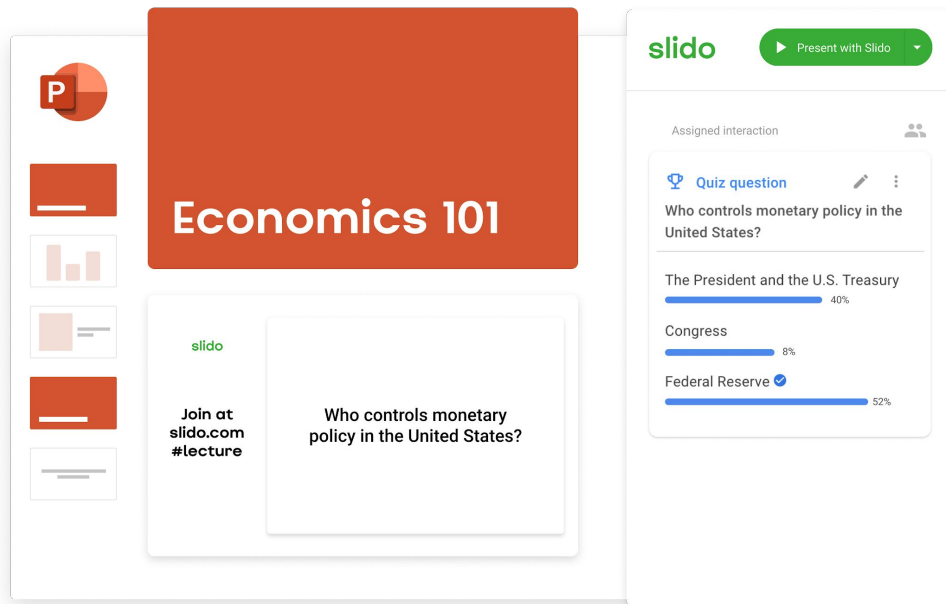

- Assigned interaction: Multiple choice
- Question: Which topic would you like to focus on most today?
- Results:
 - Giving and receiving feedback: 41%
 - Time management: 29%
 - How to prepare good meetings: 29%
