IoT Security Assurance Services

WE ARE EXPERTS in
IoT, Cybersecurity & Certifications
solving your cybersecurity problems

Our mission is to **bring trust** to the IoT by providing **IoT Security Assurance & Certification Services** designed to help manufacturers, integrators, service providers, and customers take a more informed decision when buying or selling IoT products.

Security Profile,
Risk Analysis

IoT architecture solutions
for Secured Design &
Integration

1 - Requirements

2 - Design

IoT

3 - Pre-Launch

4 - Post-Launch

Security
Evaluation &
Certification (e.g.
Penetration Testing,
Code Review,
HW/SW Testing)

Vulnerability Management,
Surveillance, Certification
Maintenance

Your Key Benefits

- Regulation & security standards compliance
- Faster time to market
- Accurate security assurance
- Reduce costs
- Increase sales & revenue

CONSULTING

▸ Cybersecurity Governance
▸ Security by Design
▸ SW & HW Security
▸ IoT Framework assurance
▸ Processes Security
▸ Standards Surveillance
▸ Security Architecture

EVALUATION

▸ Pentesting
▸ Regulations
▸ Security Maturity
▸ Standards
▸ Compliance
▸ Certification

INNOVATION

▸ Vulnerability Scanning
▸ Risk Analysis
▸ Certification Platform
▸ Process Automation

TRAINING

▸ Cybersecurity Act
▸ Business Lines and Risk-Owners
▸ Certification Schemes
▸ Common Criteria
▸ IoT Cybersecurity

What we do

Red Alert Labs is an **IoT security provider** helping organizations trust IoT solutions. We created an independent security lab with a disruptive business offer to solve the technical and commercial challenges in IoT.

Our framework covers the whole IoT solution from Chip to Cloud, is business context driven and offers a proper security dimensioning with respect to the customer's maturity.

We provide standard security certifications or dedicated IoT security label based on our in-house security risk analysis, security testing intelligence, automation and security profiles.

Our partners turn to us at any stage of the IoT product/solution life-cycle to benefit from our special expertise in IoT security and full mastering of compliance and regulations.

Our Security Experts are internationally renowned authors, speakers and researchers with certified expertise in cybersecurity and IoT.
