Developing global perspectives

*Nurturing bilingualism
Parent-school collaboration*

WE TEACH THE WHOLE CHILD.

At Hong Kong International School, we teach social-emotional learning from a young age so your child grows up with confidence and resilience.

Developing children to their full potentials

All over the world, parents want nothing but the best for their children. As far as education is concerned, they are looking for an all-rounded development for them, instead of focusing solely on knowledge instillation.

How can schools prepare students to navigate the ever-changing global landscape? They must be able to bring out their unique talents and interests, make a seamless connection between academic and vocational programs, and develop partnerships between schools and the real world, so that young people can familiarize with the working environment and be ready for it.

In this context of a world increasingly dominated by big data and artificial intelligence, a holistic education delivered in a liberal and inquisitive mode is definitely more effective in nurturing children to become intelligent, adaptable whole persons who have the drive and the flexibility to realize their full potentials and tackle challenges unfazed.

A school is a community of learners who can learn with and from one another, so the caliber of the teaching staff as well as the quality of the cohorts are important considerations in molding students' personality and capabilities. There is the added dimension of interdisciplinary learning which calls for a holistic approach that mirrors real life where activities are not segregated into separate subjects.

Schools should also enable students to understand their own cultures and to respect the diversity of others in such areas as values, tradition, behavior and practices. The ultimate goal is develop them to become active and compassionate citizens.

We hope this Guide will provide you with useful reference in choosing the best-fit school for your child.

HONG KONG ACADEMY JOYFUL AND RIGOROUS INTERNATIONAL EDUCATION

 INCLUSIVE EDUCATION	 THREE PROGRAMME IB WORLD SCHOOL	 EXCEPTIONAL LOCATION	 GLOBAL ALUMNI NETWORK
 LOW STUDENT:TEACHER RATIO	 COMMITMENT TO INTERNATIONALISM	 AWARD-WINNING FACILITY	 STRONG HOME-SCHOOL PARTNERSHIP

Hong Kong Academy is a non-profit, international through-train school offering a joyful and rigorous education for children aged 3 to 18 years. HKA students hone the competencies, knowledge and skills they need to be successful today and in the future.

Established in 2000, HKA is one of only eight fully-authorized three-programme International Baccalaureate World Schools in Hong Kong, and the only one offering the Global Citizen Diploma programme.

CAIS Amenities Building Opens a World of Opportunity for Students

Christian Alliance International School (CAIS) takes pride in its spacious, technology-rich facilities, but it is children’s joy in learning and seeing students excited by all the opportunities available that the school truly celebrates.

With “Service” being one of the core school values at CAIS, there are many service opportunities that empower students to fulfill their potential as Christian leaders and global citizens. One such occasion was the grand opening ceremony of the Amenities Building held in March 2023, with guests of honor including Dr. Choi Yuk-lin, JP, Secretary for Education, and representing the Consulate General of Canada in Hong Kong & Macao, Mr. Hugues Alexandre Moniz, Consul, Director, Management and Consular Affairs.

As a student ambassador, Elvis Koo (Grade 11) had the opportunity to meet Dr. Choi at the event. He reflects, “Having the chance to showcase CAIS was an honor, and representing my school to such a distinguished visitor made me feel proud. Although the time spent interacting with Dr. Choi was brief, I felt a sense of accomplishment and excitement.”

The experience also reinforced his commitment to being an advocate for the school.

Dr. Choi had a tour of the Office of Achievement and Special Individual Services (OASIS), where students with individual needs develop skills to become their best selves in purposely designed classrooms including a sensory room. Natalie Lai (Grade 11) also had the chance to introduce Mr. Moniz to CAIS. She says, “Guests showed genuine interest in learning about different aspects of our school, and I found it enjoyable to respond to inquiries and convey my personal experiences and insights about our school.”

At the opening ceremony, the audience was most impressed by the music virtuosity of the school orchestra and choir, as they performed in the Alliance Hall, a world-class

venue with exceptional acoustics designed for orchestral, dance and choral performances. Through music training, CAIS hopes to nurture an appreciation for music, and cultivate attributes that will help students flourish in different aspects throughout their journey in school and beyond.

With the completion of the Amenities Building, the school’s sports program is also greatly enhanced and inter-school tournaments are held in a court built to professional regulations for basketball competitions. The gymnasium includes an indoor rock-climbing wall with an auto-belay system, making this sport easily accessible to students in a safe environment. A roof-top 7-a-side soccer pitch offers crucial outdoor sports facilities to nurture children’s sporting development.

The twelve high school students who served as students ambassadors agree that taking part in the ceremony was rewarding as it allowed them to showcase their leadership and interpersonal skills. Natalie adds, “The biggest takeaway was getting to share my enthusiasm for my school with others

and seeing their positive reactions to our facilities, programs, and numerous opportunities available to students.” Elvis believes that service opportunities at school provide students with valuable experiences that will benefit them throughout their lives, while also instilling in them a sense of compassion and love for others. Through the students’ words, the school’s mission statement is reflected: “To cultivate learners with knowledge, skills, integrity and discernment, growing in love for God and service to humanity.”

Ticket to an artistic future

With the awe-inspiring capabilities of ChatGPT capturing the world's imagination, there are those who believe that now is a critical moment for students to start learning about art.

“Art is the only thing that cannot be replaced by AI now,” said Stephen Lam Lik-hin, artistic director of the Art Appreciation Programme.

Launched by the Greater Bay Area Homeland Youth Community Foundation and Vivere Sky Social Enterprise, the program aims to foster the development of students' understanding and appreciation of art and cultural literacy.

With a focus on performing arts, the program comprises six courses: introduction to art appreciation, contemporary dance, drama, ballet, classical music and musical.

Each course takes about 1.5 to two hours and is aimed at providing the students with a basic understanding of each art genre.

The six courses will be introduced to 300 students from 10 local secondary schools in June and July.

Lam said although the power to select students was left to the schools and teachers, they chose 10 grassroots schools with the intention of benefiting more underprivileged students.

“We want the students who probably don't get much chance to approach art to join the scheme.”

The idea of this program came to Lam when he was still a secondary school student himself.

He noticed that many of his classmates were proficient at playing musical instruments like the piano or violin, but lacked the motivation to attend concerts or plays on their own.

“I realized that's because they learnt instruments only to please their parents, but actually didn't know how to appreciate art as part of daily life.”

To him, the ability and willingness to appreciate art is as

important as STEM studies for today's students.

“People can be very practical in Hong Kong. They think you must study finance or become a lawyer or doctor to ensure your living. But I think there's something in art that's universally pursued by humankind, and it's important to sustain that eagerness to pursue beauty.”

There are also more practical benefits to learning art than people normally assume. “For example, if you're joining a chorus or orchestra, you'll have to learn to communicate and collaborate with a large group of people, which is an important skill in today's workplace.”

Lam hoped that apart from the concrete knowledge and practical skills, students can also learn three things in particular: creativity, imagination and connectivity.

“To me, those three things are the most important in art,” he said. “Especially after Covid, I think we learned how important it is to connect with others and express our emotions effectively. What better way to do it than through creating and appreciating art?”

Lam hopes the Art Appreciation Program would be just the beginning of a long-term scheme aimed at improving students' understanding of art.

“If this program gets good feedback, we hope to establish a six or seven-year plan where the courses gradually get more advanced each year,” he explained.

The ultimate goal is for students to gain a comprehensive and deepened appreciation of art over time.

With the continuation of the pilot program, Lam's vision for the future of art education has been brought one step closer to reality.

WYCOMBE ABBEY SCHOOL
HONG KONG

Every Child Can Excel

Wycombe Abbey School Hong Kong offers a British Prep School education for Year 1 to Year 8 with a high-quality holistic education based on the National Curriculum of England and Wales, complemented by its outstanding Chinese curriculum and award winning extra-curricular activities (ECA) programme every day after school.

- UK National and ISEB Common Entrance Curriculum
- Strong focus on Chinese with 7 lessons per week
- Award winning Extra Curricular Programme

Green ideas set to bloom

When highlighting hong Kong's much-loved topics of green-tech and innovation, the city is always seen actively providing ground for embracing the ideas of the younger generation.

Now young green-tech champions will see their sparks have a stage for shining in the field of the property industry.

Coorganized by YX Community, a network powered by Crystal Group of Companies and Hong Kong PropTech Association, the Green PropTech Innovator Challenge was launched.

The first competition of its kind in Hong Kong, it seeks to discover talented students with proptech solution ideas and their newborn start-ups to provide them with a platform to demonstrate the feasibility of their green technology proposals and entitle them with support from industry pioneers.

"I would say PropTech is one of the most significant enablers to green transition," said Erica Tam, head of YX Community. "We're always looking for new climate-friendly approaches and eager to be the driving force in adopting green technologies for a better future."

Since it opened for entries on March 1, the challenge has already received more than 100 team ideas from young talent.

Those taking part will be required to hand in projects under categories ranging from carbon tech, smart and green building and construction tech to waste reduction and other green solutions.

The theme of the competition will focus on reducing the carbon footprint.

Competitors will go through three stages during the challenge.

Candidates can first look forward to a knowledge-sharing seminar and a tour of Sino Inno Lab to inspire their proposal.

After that, 10 finalists will be shortlisted to be paired with mentors from leading companies to further develop their ideas. The 10 will then see their proposals judged by a panel of professionals and scholars in the proptech field, and a champion is selected.

The first prize for candidates is HK\$50,000, followed by HK\$30,000 for second place and HK\$20,000 for third. All the winners will get in touch with three to five investors and possibly have HK\$1 million in angel investor funding.

The competition touted its most eye-catching feature as the mentorship system and proof-of-concept supporters to

create an end-to-end platform for turning ideas into potential ventures.

The three-stage competition brings together more than 50 partners, including guest speakers, proof-of-concept partners, investors and mentors, such as MTR Corporation, Chinachem Group, Wang On Properties, Lawsgroup, Lan Kwai Fong Group, Gammon Construction and Great Eagle Group.

It offers an opportunity for students to gain first-hand and practical lessons and test their ideas.

Tam gave a few tips for those taking part to have their talent stand out. She said: "Five strengths are appreciated in the competition."

The first is innovation and creativity, followed by ease of use. Functionality is also cherished in the competition and the commercial value of products is a strength.

The social impact of products is also important as the competition "hopes the project is not a one-off or short-term event but a long-term one which will benefit the wider audience of society."

"We strongly believe that our students are our future leaders and change-makers. They should take the initiative to promote sustainability," Tam said.

"We hope to receive innovative tech solutions which help us and our partners to reduce energy consumption, improve operational efficiency and wisely manage building waste.

"We also look forward to seeing the Challenge arouse people's awareness about innovation and sustainability.

"Sustainability demands change in how things are done currently. It can never be achieved without innovation," said Tam. "We hope that our students and startups can think out of the box, and create innovative solutions in Proptech to solve real-life problems."

She said the Green PropTech Innovator Challenge would not be a one-off competition or the last stop.

"We will do similar projects in the near future with Hong Kong PropTech Association but we won't just target Hong Kong. We will identify and nurture talent from the Greater Bay Area as well as Asia. Our scope will be much wider," Tam predicted.

Scientific superhero

Believing that science can be fun and magical, renowned scientist and educator Michelle Dickinson created a show full of explosive effects and science tricks for middle school students.

As part of the face-to-face Science Experience during the Croucher Science Week 2023, the program attracted more than 300 participants, leading them to a magical world of science.

Jointly organized by the Croucher Foundation, the Education Bureau and the Hong Kong Science Museum, Croucher Science Week aims to bring science closer to the everyday lives of young people in Hong Kong. Since its establishment in 2018, it has reached more than 240,000 students.

In this year's live show, Dickinson was on stage as Nanogirl, the superhero avatar she created in 2016.

At that time, she realized there were very few women in science and engineering and wanted to do something to change that.

"I created the superhero Nanogirl who is a female character and solves so many problems using science and engineering," she said. "I hope young people, especially girls, can associate with the character."

In the live show, which was held in the Hong Kong Science Museum on April 22, Nanogirl partnered with her assistant Boris to perform magic tricks using science and engineering.

With the restrictions posed because of the pandemic, this is the first time Croucher Science Week has returned to offline sites in three years.

And that is one of the reasons that made Dickinson take part this year. "I think it's really important for learning to get face-to-face contact," she said.

Another reason for taking part in the show is the bilingual aspect. Born and raised in Hong Kong herself, she loved the language richness in the city and wanted to combine the two languages in her show.

She said the goal of the show was simple: "I want the children to know that science is not only in the school curriculum, it can also be part of your everyday life."

And she wanted to do it by designing magical fun experiments and letting children experience the amazement of science themselves.

One of the experiments she did was to show the students the effects of centrifugal force.

She would ask volunteers to step onto the stage and swing a metal plate hung with two strings, with a glass full of water placed on it. With the centrifugal force acting on the water as it rotates with the plate, not a single drop would spill out during the process.

"It's a great way to learn because it's a very fun experience but also with a sense of danger, which makes it more exciting," she said. "It's also quite simple so the kids can actually go home and show the parents what they learned today."

For kids who aspire to develop a career in the science field, the best advice she can give is to see the multiple career opportunities of being a scientist and not be restricted to school curriculums.

"There are so many things a scientist can do," she said.

"For example, during the Covid-19 pandemic there were scientists who invented vaccines and designed masks. So sometimes you shouldn't just look at the study, but look at the jobs and the differences it can make in the world."

As a female scientist and educator, she especially wanted to offer words of support for the girls who might want to pursue a career in this male-dominated industry.

"Most importantly, I think they should just do it, even if they fail," she said.

"Sometimes I notice girls can be a bit perfectionist and want to do everything perfectly. But it's always the mistakes that make you learn and force you to do better next time."

With the resounding success of her show, she hopes to have instilled a love for science in the hearts of students and motivated them to pursue a career in the field.

Box Hill cultivates confident global citizens

Offering quality education in children's best interest, Box Hill (HK) International Kindergarten and Pre-school cultivates confident and multilingual lifelong learners for a globalised world.

Originating from Australia, Box Hill established its first Hong Kong campus in 2004 to provide a delightful early childhood education to young children aged 0 to 6. Over the years, the school has expanded to include three campuses located in Ma On Shan, Fo Tan and Tseung Kwan O.

In line with its mission of cultivating confident global citizens with abilities and a passion for learning, the school adopts the British National Curriculum Early Years Foundation Stage framework (EYFS). While all classes are conducted in English, there are also ample opportunities for students to learn Cantonese and Mandarin, seamlessly connecting them to international, Direct Subsidy Scheme (DSS) and local primary schools.

A well-balanced British curriculum

In implementing the framework, the school ensures children achieve holistic development in seven learning areas: communication and language; personal, social, emotional and physical developments; literacy development; mathematical development; expressive arts and design; understanding of the world; and Box Hill also nurtures in children a strong foundation in the Chinese language.

"This well-balanced approach is especially important for the result-oriented Hong Kong society, as it helps children develop both soft and hard skills, enhancing their all-round growth," says Brandy Wo, principal of the Tseung Kwan O campus.

Mandy Kaur, principal of the Fo Tan campus, adds that the British curriculum is beneficial for graduates. "The UK curriculum gives our graduates an advantage to adapt better to both local primary schools and other international school systems."

Immersive trilingual environment

Box Hill understands that language proficiency is key for children to thrive and shine in a globalised world. Therefore, the school uses English as the medium of learning and communication, with Cantonese and Mandarin as supplementary languages.

"Everyone at our school speaks English at all times, except during the Cantonese and Mandarin lessons," says Brandy. On the other hand, the school also adopts a progressive learning approach to learning Chinese, based on the learners' abilities and needs.

With both their boys studying at Box Hill, the two principals take pride in the school's Chinese language curriculum. Through a series of theme-related activities, children learn the languages naturally during their time spent in school, even if there is no Chinese support at home. "My son learns a lot at school and is keen to go to school every day," shares Mandy. "He would even ask me what certain things are called in Chinese at home."

Seamless transition to further education

Thoughtfully designed to meet the needs of children's future pathways, Box Hill's curriculum paves the way for any type of school. Brandy points out that students who opt for an international school will graduate at K2, while those preparing for a local primary school will stay until K3.

"Given this arrangement, we would increase the Chinese learning time for K3 students to equip them with adequate Cantonese and Mandarin skills for a local school system," she explains. "This gives parents two years to consider the pathway for their children so that they can make the best decision based on children's interests, needs and strengths," adds Mandy.

To parents, Box Hill also provides useful information in reflection of their children's needs, such as organising primary school info days and arranging mock interviews for young schoolers – so that they can familiarise themselves with the interview setting and be well prepared for the real assessments. According to the school, the ability to handle interviews and adapt to new environments, as well as adapting interpersonal skills, all make a difference as children advance through the grades.

Distinct 'BoxHillian Qualities'

In line with its motto of 'Confidence for a brighter future', the school has identified seven key characteristics that are conducive to children's lifelong learning. Known as 'BoxHillian Qualities', each is represented by an animal character, such as the Confident Lion which refers to belief in oneself, and the Curious Monkey that stands for wonder and discovery. "We use different activities to cultivate these characteristics in children, such as storytelling and an intrinsic reward system," notes Mandy.

As well as essential tools for character education, these activities help develop children's interests and foster lifelong learning. "Through our quality education, we hope our children can develop the curiosity to explore their surroundings, instead of waiting for people to spoon-feed them," adds Brandy. This allows them the opportunity to take risks and chances and learn from mistakes.

Effective home-school collaboration

Parents play a paramount role in their child's education; this is why home-school collaboration is a fundamental part of Box Hill's education programme.

Each campus sets a strong system where parents are given the most up to date information on their children's school lives. From digital to hand written notes, teachers and parents have a multitude of ways to connect and communicate to ensure each child reaches their potential. There are also many planned activities that involve parents' participation from parent-child activities in school and outside, to parents as partners and volunteering to read, assist and help during large school events.

Going forward, Box Hill has increased the headcount of school staff and remains steadfast in enhancing the quality of its curriculum and teachers. With a concentrated effort to bring on experts in the field of early childhood to join the management team, advanced training and professional development is a clear strategy to improve children's educational outcomes and offer parents more support in parenting. As Hong Kong returns to normalcy, the school will continue to strengthen the connection between the school and the community, with even more face-to-face home-school events in the future.

Box Hill's admission interviews place more emphasis on observing the relationship between the child and his or her parents. The school hopes that parents of prospective students concur with its teaching philosophy and share the same goal towards their child's development. Box Hill believes working hand in hand with parents and building a relationship that relies on honest and open communication, fosters the best environment for children's growth and learning. Using positive approaches together to build up a child's confidence and learning through play can provide the building blocks of future success.

Embedding mathematical thinking at Hong Kong Academy

Whether it's managing the family budget, handling a business financial plan or using analytical and creative modeling to address climate issues, mathematics is a key life skill and a crucial part of every school's curriculum. We spoke with Hong Kong Academy's Primary School Assistant Principal and Curriculum Coordinator, Ms Carly Buntin, about the school's approach to teaching maths and how students develop into confident mathematical thinkers.

Hi Ms Carly, let's jump right in! Can you start by describing HKA's approach to teaching maths?

Developing a growth mindset is key to becoming a strong mathematician. Our teachers support learners to keep an open mind and consider different ways to solve the problems they are exploring. This is integral to building mathematical confidence and flexibility. Each time we introduce a new concept, we encourage children to build on what they already know, use their reasoning skills and their intuition to follow their line of thinking, and prove and explain how they found their answer.

Valuable mathematical skills such as questioning, curiosity, inquiry, investigation, problem-solving and pattern seeking are encouraged. We want to hear students asking 'what if...?' 'why didn't that work?' or 'what's going on here?' As students try new strategies, it sometimes leads to mistakes. We spend time cultivating a safe space where students are open to taking risks and know that it's okay to make mistakes because mistakes are the best way to learn!

Sounds great! What curriculum do you use to teach maths?

We are a through-train IB school and offer a resource-based programme. This enables us to draw from best practice based on research and create lessons which are relevant to our students. In addition to our standalone mathematics lessons, we include mathematical elements within units of inquiry so that students can reinforce a mathematical concept by applying it in a new context. We recognise that, in the real world, learning does not happen in boxes, and we seek to replicate this in the classroom by providing learning opportunities that cross between multiple disciplines or subject areas. Further opportunities for students to expand their mathematical abilities include events such as Family Maths Night, house competitions and regional maths tournaments such as Singapore and Asian Schools Math Olympiad (SASMO).

How does your programme ensure that each student develops to the best of their ability?

The Common Core State Standards in mathematics are our anchor. These provide the benchmarks which our teachers use to plan lessons and track student progress over time. Our maths curriculum spirals up in sophistication each year as each student's understanding and fluency grows. This allows students to revisit key mathematical concepts and develop cornerstone skills in increasingly complex settings. We provide differentiated instruction in all subject areas, which means that students are met where they are as learners and stretched based on their individual strengths and areas for growth. Informal assessment happens in every lesson, through observation, hands-on engagements and small group or one-to-one maths conferences between students and teachers. This gives children daily opportunities to explain their thinking, receive feedback and agree on goals to support them in moving forward. More formal assessment happens at the beginning and end of units, which help us to ensure continuity of learning and measure how each student is progressing against grade level expectations.

We also use the Measures of Academic Progress (MAP) test to benchmark student growth against international standards and ensure we continue to deliver a curriculum which is challenging, engaging and relevant. In addition, we offer Advanced Placement (AP) statistics and have an Extended Mathematics pathway which offers greater breadth and depth of content for our talented mathematicians who are performing at an accelerated level and are on track to pursue Higher Level mathematics as part of the IB Diploma Programme.

A 15-year international programme that nurtures innovative lifelong learners

Our School

Invictus School Hong Kong was established in 2019 and takes pride in its high quality and accessible education. Invictus aims to nurture individuals in innovative and inspiring ways to become lifelong learners who contribute to a better tomorrow. The modern Tseung Kwan O campus houses the kindergarten and primary years (Nursery to Y6 and ages 3 to 11) and offers a bilingual programme through English and Mandarin Chinese. The secondary school campus in Chai Wan caters for students from Years 7 to 13 (ages 11 – 18), and offers the world-renowned Cambridge curriculum, including IGCSEs and A-Levels.

Our Mission

“Our mission at Invictus is to nurture our students to be future-ready and enable them to skillfully navigate the Volatile, Uncertain, Complex and Ambiguous (VUCA) world that we live in today,” says Julia Woo, Head of School. “To this end, strong instructional and curriculum leadership and sound assessment is key to empower students to not only thrive in the classroom, but also skillfully navigate an uncertain and changing world today.”

Beyond equipping students with the skills, knowledge and competence to enable them to succeed, Invictus students will also be anchored in values such as discipline, integrity, resilience and kindness, so that they will grow to be fine young men and women of good character.

Outdoor learning at primary school (TKO campus)

Mrs. Julia Woo, Head of School

Outdoor learning at Sai Kung for secondary school

Secondary school's science class

Our Curriculum

Learning at Invictus is structured around a rigorous curriculum which spirals up through the kindergarten, primary and secondary years. The kindergarten follows the International Early Years Curriculum (IEYC), incorporating the Singapore Mathematics programme and bilingual learning approaches in English and Mandarin Chinese. In the primary section these foundations are built upon, with Cambridge's primary curriculum providing an international framework alongside a continuation of Singapore Mathematics and bilingual learning, but where the emphasis on English grows during the primary years. The secondary programme begins with a core foundation of subjects in Years 7 to 9, before the Cambridge IGCSE programme in Years 10 and 11 offers students some flexibility to align subject choices and personal strengths. The final step of the Invictus journey is the AS and A-Level programmes in Years 12 and 13. These Cambridge qualifications are world-renowned, offering entry to tertiary institutions around the world.

Our value-proposition

Invictus School Hong Kong is a through-train school, where a child who joins Invictus at the kindergarten or primary levels, is also guaranteed a place in the primary and secondary sections. The initial application for any year level is made online without charge. The school promotes affordable international school fees, welcoming local and international families, and administrative and teaching staff are familiar with successfully transitioning students into Invictus from a variety of other school systems.

Wycombe Abbey School Hong Kong Expertly Trained to Deliver Microsoft Skills and AI Learning

These days we all see the World progressing technologically at an alarming rate. As such, parents are very aware of the need for their children to be well versed in computer skills from a young age to not only access information, but to participate fully in modern day living and make the most of what life has to offer. No wonder then that well-informed parents are looking for schools that deliver cutting edge teaching and the use of technology to support their children’s learning. Wycombe Abbey School Hong Kong does just this. Not only is it the first private school in Hong Kong to achieve Microsoft Showcase School status, the teaching staff were keen to attend a Microsoft training day at Cyberport 2 to further upskill, enhance their teaching and receive prestigious Microsoft awards.

Indeed, Ivan, the Microsoft Industry Lead for Education, gave huge credit to the staff for their active use of Microsoft technologies, their achievement in becoming the first private school in Hong Kong to achieve Microsoft Showcase School status and their desire to continue to develop.

Not surprisingly, AI featured heavily throughout the training. Programs covered included: Reading Progress, an AI-enabled reading fluency program which provides data insights to inform student progress and make evidence-based decisions to improve students’ reading skills; Reading Coach, a built-in AI tool which provides

reinforcement exercises to help students in their areas of improvement; Minecraft Education a tool to engage students in classroom learning, and Microsoft’s HoloLens 2 which mixes reality hardware and software for a fun and versatile eye-opening experience.

Finally, the integration of AI technology to provide an intelligent response to many email communications was demonstrated by the Microsoft experts.

“The Microsoft training day was an excellent opportunity for our teachers to enhance their knowledge of Microsoft

technologies and explore innovative ways to engage our students in their learning.” Our Headmaster Mr Tuckett said. “Our staff left the training day feeling inspired and ready to apply their new knowledge and skills in the classroom to teach their students.”

Wycombe Abbey School Hong Kong will continue networking with other schools in Hong Kong and internationally to share knowledge of Microsoft technologies and ensure that we provide the best possible education to our students.

Applications for 2023-2024 are now open! Limited spaces available.

Apply Now!

Making the process seamless with Christian Alliance P.C. Lau Memorial International School (CAPCL)

At CAPCL, your child can seamlessly transition into a bilingual English and Chinese learning environment with supportive child-centred expertise provided by the school and its dedicated staff.

Bilingual curriculum with a Co-homeroom System

CAPCL is a bilingual international primary school which adopts the Canadian Alberta curriculum with a Co-homeroom system—two teachers are responsible for the care and education of students in each homeroom. Our program is suitable for children from preparatory (aged 5) to grade 6 (aged 11). Employing a unique combination of 65% English and 35% Mandarin Chinese teaching, CAPCL nurtures future leaders by unlocking every learner’s academic potential.

Play-oriented Learning

CAPCL adopts a play-oriented mode of teaching into its bilingual curriculum to foster a better understanding of both the English and Mandarin Chinese languages, intergroup and interpersonal social skills, and a positive and enjoyable mindset to learning.

Verbal and Non-Verbal Teaching

CAPCL’s bilingual curriculum emphasizes verbal and non-verbal communication with its students. With this engaged approach, your child’s language skills will flourish alongside

their observational and social skills as they learn, play, and communicate through a variety of verbal and non-verbal languages with their classmates and teachers.

Three “R”s Motto

CAPCL’s teachers follow a strict three “R”s motto when it comes to aiding students to transition into a dynamic bilingual environment, eliminating unnecessary difficulties.

1. “Relational” teaching

Your child will be engaged in a network of support starting from day one, within a small classroom learning community of just 22 to 24 students per two teachers.

2. “Relevant” lessons

The curriculum is designed to encourage development from the perspective of children’s interests. In this environment, your child can communicate their thoughts and contribute to class discussions in ways that are meaningful and impactful to their personal growth.

3. “Rigorous” curriculum

Whilst CAPCL reinforces a play-oriented approach in the classroom, teachers also ensure that lessons are engaging and challenging for every single student under their watch.

Parent’s Involvement

Parents’ support in their child’s transition into a bilingual learning environment will greatly improve their performances in class socially and academically—that is why CAPCL also puts emphasis on home-parent collaboration! Ongoing communication between parents, teachers, and students ultimately fosters the desire to participate in various activities in and out of school and, most importantly, the desire to learn.

Christian-Based Education

A Christian establishment, CAPCL believes that every learner is special, unique, and valuable, and encourages each child to develop his or her God-given talent. At CAPCL, children’s dispositions are revealed to us in their play, learning, and daily experiences.

Empowering Students to Ignite Bright Futures

YMCA Christian Academy (YCA) is an international private primary school offering Year 1 to Year 6 for children 5 to 11 years old. It is located in the heart of Hong Kong, just a street below Caine Road, in Sheung Wan. They offer the International Primary Curriculum (IPC) in small class size setting with individualised learning support.

Well-Rounded Curriculum

YCA offers a broad and balanced international curriculum, rooted in a clear Christian ethos and vision of education. It focuses on the development of the whole child, so that every child grows and thrives academically, physically, spiritually, and socially. Our curriculum is delivered through the International Primary Curriculum (IPC), which has a clear process of learning and specific learning goals for every subject, including international mindedness and personal learning. Our Core Curricula comprises of English and Maths, follows the English National Curriculum, which fully supports our students' literacy and numeracy skills. Our Chinese programme is our strength with daily Chinese lessons using Putonghua and Traditional Chinese characters. We offer three language pathways to best accommodate our learners.

To provide our children with a well-rounded education, we offer specialist classes in Innovation/STEM, PE, Music, Art, and Christian Studies. Our after-school programme offers over 20

choices for students to engage and explore, such as hip-hop dance, chess, choir, orchestra, calligraphy, competitive sports, Spanish and more.

Learning Diversity Philosophy

At YCA, we believe in children's unique identities, coupled with our international curriculum, to ensure that our school provides our children with a safe and respectful environment to explore learning and celebrate differences. Our Learning Diversity Team provides learning support for students with diverse academic learning needs and students who are learning English as an additional language. We take a proactive and positive approach in supporting students within the classroom, in collaboration with class and specialist primary teachers, as well as outside the classroom with dedicated coaching classes. We work collectively to co-plan, co-teach, and co-assess so as to enhance differentiated and inclusive practices. These practices build on strengths and provide access to nurturing and engaging learning experiences which celebrate growth.

Sign up for YCA's weekly School Tour to learn more about the school's culture and curriculum, and why it is an excellent choice for your child's education. Sign up here: <https://bit.ly/44e3Smz>

Discovering Developmental Milestones

Early childhood is a time of rapid growth across all developmental domains. It lays the foundation for cognitive and social-emotional behaviour in later life. Giving sufficient nurturing is central to fostering a child's holistic development. It is beneficial for parents to keep track of different developmental milestones to ensure that their children can have the best possible start in life.

Growth is often confused with development. The former refers to an infant's physical increase in size, whereas the latter includes distinctive behavioural changes characteristic of each stage of child development — also known as developmental milestones. As children progress through stages of development, they experience the surrounding environment to their capabilities. They develop innate competencies to understand languages, interact with others with care and respect, tackle unknown problems, and manage their emotions.

These are four different types of developmental milestones in early childhood, and they all vary according to your child's age. These are motor milestones, sensory milestones, language developmental milestones, and social-emotional developmental milestones. Motor milestones involve the development of gross and fine motor skills, which allow children to coordinate whole-body movements and perform precise movements with small muscles, such as buttoning their shirts. Sensory milestones involve the development of perceptual skills and cognitive abilities through the exploration of the environment, memory and attention and how they respond to stimuli. Language developmental milestones begin with babbling and gestures and progress to the acquisition of vocabulary and the ability to understand and respond to conversations as they learn to speak and formulate sentences. Social-emotional developmental milestones involve the development of social skills and the ability to interact with others and understand and express emotions, such as sharing, showing empathy and cooperating with peers.

It is important to understand these development milestones and how they affect children differently, from newborns to infants to toddlers and preschoolers, providing an appropriate environment for your child's growth and development. At Woodland Pre-Schools, our team of experienced teachers gets a solid grasp of child development and designs a unique curriculum to ensure that your child reaches their fullest potential in early childhood. Contact us for more information on admissions, or join our free trial class to get a taste of the Woodland Journey and experience our learn-through-play-based curriculum.

We are excited to announce the return of our summer camp from **3 July to 11 August!** Camp Woodland offers a variety of activities from rugby and yoga to basketball, gymnastics, and dance, designed to inspire and engage children aged 2 to 6 years old. Our experienced teachers and counsellors are dedicated to creating a safe and supportive environment, encouraging children to learn, explore, and make new friends. We also offer classes for infants as young as 6 months old to support early development and transition into pre-school.

In addition, our **Summer Academic Programme** focuses on reading, writing, mathematics, and inquiry-based projects to prepare children for primary school. With weekly themes covering science, maths, art, invention, literacy, and sports, children aged **4.5 to 7 years old** can attend half-day or full-day sessions from Monday to Friday at our Mid-Levels campus.

Join us for a summer of fun, learning, and discovery at Woodland Pre-Schools!

Bus Services are available for all three campuses!

Carmel School Offers the Framework to Becoming Well Rounded Community Leaders

Our School's Jewish ethos and philosophy underpins both the academic excellence and the unique opportunities and breadth provided by the International Baccalaureate (IB) curriculum (PYP, MYP and DP), developing well rounded students who care about contributing to their community.

Carmel School students' achievements include charitable projects and community service both local and international. The IB requires students to partake in community driven actions as part of their study through Creativity, Activity and Service (CAS), which encourages independent learning within a wellbeing focused framework. Their accomplishments and their consistently admirable academic successes are a testament to the value in which students place in both learning and service.

Innovation is ongoing at Carmel School, where we lead in Robotics and Plastic Upcycling, a sophisticated recycling and manufacturing programme. Delivered by passionate, highly skilled faculty, our small class sizes enable us to offer individualized learning strategies and inspire students to strive for excellence. Here, students thrive in an environment of communication, collaboration, and support of others.

Carmel School's academic results demonstrate a consistent track record of offers from top Universities worldwide including Oxford University, University of Cambridge, NYU, Durham University, McGill University, Duke University, HKU, HKUST, Monash University, The Technion (Israel Institute of Technology) and more.

We are proud to have recently celebrated our 30th year in operation and invite you to meet our students, faculty, and tour our facility. To schedule a visit please contact us.

Forward-thinking career-focused studies at Renaissance College

Renaissance College Hong Kong (RCHK) is proud to have pioneered the International Baccalaureate Career-related Programme (IBCP) in Hong Kong. IBCP is more than just an alternative to IB Diploma (IBDP); it offers a variety of pathways for secondary students who choose college education that combines vocational and academic learning.

Taking a specialised pathway

IBCP helps RCHK students get a deeper dive into learning connected to their future career aspirations or personal interest. All components of the IBCP reflect a balance between career-related objectives and academic rigour, intending to cultivate internationally-minded and well-rounded learners.

Who is IBCP for?

Throughout the programme, students are given more options for their differing needs and varied learning styles. The IBCP may be an option for students who:

- want to focus on crafting their specialist skills (music, performing arts, sporting commitments, etc.) in a more hands-on learning environment and approach
- do not want or find it challenging to cope with the demands of the IBDP, or individual elements of this programme
- know what they want to study and wish to have a head start to specialise in this area

Career opportunities

IBCP students have a wide variety of career choices. The Art & Design career studies offer programmes for students aspiring to work as professionals in animation, graphic design or motion media design, to name a few. Students who undertake the Musical Theatre programme can become music therapists, casting directors, lighting and sound designers or

script writers in the future. Sustainability and innovation are strongly integrated into business strategies and thus students who pursue careers in this field, will find opportunities after Business and Sustainability pathway as sustainability manager, supply chain administrator, sustainability analyst, change manager, or carbon impact specialist.

Practical approach with affiliated partners

As a long-term IBCP provider, RCHK established partnerships and is affiliated with various institutes to offer the career-related study component. Each organisation is responsible for providing the most up-to-date content, and students receive grades according to each institute's assessment standards.

- Arts and Design programme with Savannah College of Arts and Design (SCAD) Hong Kong
- Musical Theatre programme with the Hong Kong Academy for Performing Arts (HKAPA)
- Hospitality and Culinary Art programme with Hong Kong International Culinary Institute (ICI) and Hospitality Tourism Institute (HTI)
- Digital Skills programme with Hong Kong BSD Academy
- Business and Sustainability programme with Sustainability Management School (SUMAS)
- International Sports Management programme with Federation University and World Academy of Sport
- Aeronautic Engineering programme with Embry Riddle University
- Musical Instrument with the Australian Guild of Music Education

Career-focused studies at Renaissance College

In 2013, as the first school in Hong Kong, Renaissance College was authorised to offer the IB Career-related Programme (IBCP).

This was a game changer for many students who wanted to pursue their passion in a specific field.

The IBCP can also be a recommended alternative to the International Baccalaureate Diploma Programme (IBDP), and can meet the different needs of a diverse student body: both those who find IBDP challenging and those who are gifted and talented learners in a specialised area.
