

TSEUNG KWAN O EDUCATION GUIDE

Giving your child a headstart at top-tier schools in Tseung Kwan O

Building on the expertise and success of its education fairs organised over the years, The Standard has taken a step further by zeroing in on the myriad of educational offers in the thriving township of Tseung Kwan O and its neighbourhood, to help parents make an informed choice for their children.

the multitude of prestigious schools, each with its own distinctive education philosophies, teaching methods and support facilities.

Today, Tseung Kwan O has blossomed into a dynamic, family-friendly community with a full-fledged infrastructure in terms of both transport and amenities. It also boasts a host of well-established education institutions, from kindergartens to primary and secondary schools.

To facilitate this important selection process, we have assembled professional educators in the district to speak on specific topics of interest, and to provide first-hand, up-to-date information and insightful pointers, as well as individual consultations, for the benefit of parents and their children.

In looking for a school that best fits their children, parents really have to do their homework to get to know

Hong Kong Academy is a non-profit, international through-train school offering a joyful and rigorous education for children aged 3 to 18 years. HKA students hone the competencies, knowledge and skills they need to be successful today and in the future.

Express Application
Limited spaces available for August 2024 start date. Contact admissions today to open your application and receive results 5 days after assessment.

Beyond the textbooks : Why Hands-On Experience Matters for Children?

As I observe my daughter Lily eagerly scooping handfuls of soil and tenderly planting each seedling into the pot, I can't help but marvel at the pure joy radiating from her face. This isn't just another school assignment - it's an opportunity for her to get her hands dirty, to witness the miracle of nature unfolding before her eyes.

In a world that often prioritizes test scores and academic achievement, it's easy to lose sight of the fundamental truth that children don't just need to acquire knowledge - they need to experience it. As both a parent and an educator, I've come to believe that providing these hands-on learning opportunities is perhaps the greatest gift we can give the next generation.

Take Lily's garden project, for instance. Rather than simply reading about the life cycle of plants, she's able to tenderly water the seedlings, observe the first green shoots peeking through the soil, and eventually harvest the vibrant bean sprouts. Through this process, she not only develops practical skills like responsibility and patience, but also fosters a deeper sense of wonder and connection with the natural world.

The benefits of this kind of experiential learning extend far beyond the garden too. When we give children the chance to explore diverse environments and cultures, they emerge with a more expansive worldview, an appreciation for diversity, and a spirit of open-minded curiosity. Whether it's touring a

local farm, participating in a cultural exchange program, or simply venturing out into nature, these firsthand experiences have the power to transform a child's perspective in ways that no textbook can.

And the impact doesn't stop there. Hands-on activities also play a vital role in nurturing children's physical and mental wellbeing. By incorporating regular outdoor play, mindfulness practices, and creative pursuits into the curriculum, we can help kid's minds and bodies thrive. After all, there's something deeply restorative about the feel of cool grass beneath your feet or the focused concentration required to mould clay into your own unique creation.

As I watch Lily carefully tending to her little plants, I'm reminded of the profound truth that children don't just need to know - they need to do. It's in those active engagement of curiosity and exploration, that they discover their passions, develop essential life skills, and expand their full creative potential. And in doing so, they don't just grow - they transform, blossoming into the vibrant, resilient individuals they're meant to become.

So let's step away from the screens and give our children the gift of experience. In a world that moves ever faster, the most valuable lessons often come from slowing down, getting our hands dirty, and fully embracing the wonder that lies all around us.

Spaces to Spark the Imagination and Possibilities

In the timeless Chinese tale of “Moving three evictions”, the ancient Chinese philosopher Mencius’ mother famously relocated her family three times to ensure her son was raised in the most nurturing and inspiring environment possible. This poignant story underscores a universal truth – the profound impact that one’s surroundings can have on personal growth and development.

In the rapidly evolving world today, this message resonates more strongly than ever before. The role of schools in cultivating a conducive learning environment has become increasingly critical, serving as a powerful catalyst for unleashing the boundless potential of young minds.

Designing Spaces for Exploration and Engagement

The physical space of a school can have a profound impact on the mindset and well-being of its students. From colourful, well-equipped learning spaces including digital classrooms and activity rooms to inviting outdoor areas such as sport parks and swimming pools for play and reflection, every component must be thoughtfully crafted to ignite the spark of discovery.

By designing classrooms and campuses that spark imagination and foster a learning incentive, schools can create an environment that inspires students to reach new heights. This goes beyond traditional lecture-style instruction, as children learn best when they are actively engaged, encouraged to ask questions, and empowered to explore their interests.

Embracing Diverse Learning Styles

In the landscape that emphasizes individuality, the most effective learning environments are those that embrace the

diverse needs and learning styles of each student. Truly innovative schools recognize that children learn in various ways, and they must weave together a tapestry of educational experiences to cater to these unique needs.

For instance, by incorporating technology-driven learning tools and offering specialized programs such as STEM and Artistic Programme for students with unique talents or challenges, as well as fostering a culture of inclusive collaboration and peer-to-peer support, school can cultivate an environment where every student feels safe, valued, and inspired to reach their full potential.

Nurturing the Whole Child

In an era where academic performance is often the primary measure of success, forward-thinking schools recognize the importance of nurturing the whole child. By focusing not just on intellectual development but also on social-emotional growth, character building, and physical well-being, they are paving the way for a brighter future.

Through a holistic approach to learning, which might include mentorship programmes, outdoor adventures and classes in the arts and sciences, schools are equipping students with the tools they need to thrive – not just in the classroom, but in every aspect of their lives.

As the world continues to evolve, the role of schools in shaping the next generation has never been more crucial. By championing the creation of conducive learning environments that celebrate the unique gifts of every child, they are poised to unleash a new era of innovation, collaboration, and positive change.

Laying the Foundation for Lifelong Success: the Yew Chung Approach

Pioneering Play-Based Learning and Trailblazing Early Childhood Education in Hong Kong

Yew Chung has been a pioneering force in early childhood education in Hong Kong since the 1930's when the first Yew Chung school was founded. From introducing play-based learning to the local market in the 1970s, to the establishment of the Yew Chung College of Early Childhood Education (YCCECE) in 2018, Yew Chung has been constantly at the forefront of the latest developments of Hong Kong's early childhood education.

Yew Chung International School's Early Childhood Education Programme has established a new benchmark for nurturing confident, caring, and inquisitive young learners and fostering a culture of servant leadership. Rooted in the Yew Chung Approach, the holistic curriculum is Child-Centred and Emergent, empowering children through agency, immersive bilingual environments, and the development of pro-social skills. This transformative model has made YCIS a beacon of excellence in the field of early childhood education.

Emergent Curriculum

The YCIS curriculum is built on a Child-Centred Emergent model, grounded in the 12 Core Values of the Yew Chung Approach. This pedagogy revolves around child-led experiences, multilingual instruction, relationship-building, and gradual academic skill development. Teachers observe, reflect, and respond to each child's unique interests and needs, guiding them through carefully designed emergent learning experiences.

Infant and Toddler Learning Programme (ITLP)

YCIS believes that the period from 6 months to 2 years are golden years of a child's development. In 1986, Yew Chung launched a programme specially designed for children of this age: the Infant and Toddler Learning Programme (ITLP).

Grounded in the Yew Chung approach, ITLP focuses first on preparing children physically, emotionally, and socially, empowering young learners to approach future learning with confidence and resilience.

- **Rich Bilingual Environments:** The Co-Teaching model immerses children in both English and Chinese from two dedicated teachers, laying a strong foundation for developing bilingual fluency.
- **Intentional Play-Based Learning:** Child-initiated activities like sensory play, schematic play, and role play foster holistic development through the power of exploration.
- **Nurturing Physical Growth:** Dedicated Outdoor and Indoor Gym Room time allows for the development of fine and gross motor skills, crucial for overall well-being.

Parent and Family Community Platforms

We have developed a unique Caregiver Connection Programme specifically for ITLP families which supports parents and caregivers in their journey of raising young children. We work together in helping to equip and empower families to understand important aspects of their young child's development and how to further support learning and development at home. Recognizing the value of a collaborative, like-minded community, Yew Chung offers the Caregiver Connection Programme. Through this initiative, they host book clubs and regular workshops led by early childhood experts, including Yew Chung co-principals, occupational therapists, child psychologists, and renowned authors, to share knowledge. These learning opportunities are open to parents, grandparents, and domestic helpers, to focus on topics such as:

- The Importance of Play
- Supporting Your Child's Emotions and Pro-social Skills
- Setting Boundaries and Positive Discipline
- The Self-Aware Parent

By providing access to these informative sessions, Yew Chung empowers caregivers to deepen their understanding of early childhood development and cultivate supportive home environments aligned with the school's holistic approach.

Tseung Kwan O Campus

Today, the Early Childhood Education Programme of YCIS is offered across 5 campuses in Kowloon Tong and Tseung Kwan O. The Tseung Kwan O Campus offers both whole-day and half-day programmes for the Two's, Three's, and Four's, with a 20% Founding Discount on monthly school fees.

An additional service is offered for families in Tseung Kwan O. Children can engage in on-site therapy through a partnership with a reputable therapy service centre, receiving additional support in areas of learning and development that require further attention.

A new Five's programme will be available exclusively at the Tseung Kwan O campus to meet the needs of families considering a local primary education pathway for their children. Should parents decide to transition back to the international pathway after the 5's programme, their children will be prioritized for admission to Year 2 of YCIS-HK's Primary section.

Empowering Future Leaders: Hong Kong Academy's Sustainable Journey Unveiled

As a globally-minded international school, Hong Kong Academy places sustainability at the core of who they are and how they operate. Inspired by the United Nations Sustainable Development Goals and the Hong Kong 2050 Climate Action Plan, they continuously look for practical solutions and partnerships which engage students as agents of change. Students are challenged to identify real-world problems, consider a range of perspectives and collaborate with individuals and organisations to uncover solutions, facilitate community participation and drive purposeful action.

Over the years there have been many projects delivering meaningful and lasting outcomes. From beach clean-ups to the Fix-It club, biodiesel school buses, solar power, Green Mondays, freecycle uniform and waste composting, HKA's curriculum, operating practices and community initiatives are designed to build the mindset of future leaders and drive sustainable change. As this academic year comes to a close we share some of the school's recent endeavours.

Secondary School teachers have been working together to deliver a curriculum which enables students to build broad

knowledge and deep understanding, whilst also making connections between subjects and ideas. An example of this is the Grade 6 students who learned about circular economies in their Individuals & Societies classes whilst in Science they learned about the energy crisis and its effects on our world. This opened a discussion about the environmental and societal impact of the global fashion industry and prompted the Grade 6 students to take the lead in HKA's community action in support of this year's Redress campaign.

Students created educational messaging and visual content which was shared through school newsletters, community Whatsapp groups and social media throughout a month-long campaign. They also stepped up to take responsibility for managing and sorting a large volume of donated clothing and accessories which came in as a result. These items have been diverted from landfill and will be resold or recycled through the Redress programme.

Grade 9 students have been studying a Science Unit called "It's Getting Hot in Here" addressing the theme of climate justice and resilience. The teacher invited HKA's Director of Facilities and Operations to the class to share information about the

school's operational approach to reducing carbon emissions through operating practices and community initiatives. One of the community initiative partners is Carbon Care who invited the students to visit an area of subdivided housing so they could understand some of the day-to-day challenges that residents face. With limited electrical outlets and cramped living conditions residents shared that their biggest concerns were fire safety, humidity and heat.

Returning from the site visit students were challenged to come up with practical, science-based solutions for the residents with climate resilience and justice in mind. Having identified the residents' problems the students made two recommendations which may be of use: one at a micro level - DIY dehumidification, and one at a macro level - using algae as a carbon sink.

If residents were able to dehumidify their spaces they would have a lower reliance on fans and air conditioning therefore reducing energy consumption and the growth of mould. If society developed a more extensive strategy of carbon sinks it would support climate equity by slowing the effects of global heating. In partnership with operations students plan to develop prototyping through HKA's science club and hope to be able to share and test their ideas next semester.

HKA continues to build curricular and operational initiatives which create awareness of sustainable systems and deliver meaningful impact. Learn more about the school's programmes and visit their award-winning, sustainable campus by contacting the Admissions team or booking a personalised tour.

A through-train education journey of Dream! Succeed! Celebrate!

DSC International School (DSC) was founded in 1986 as the first Canadian International School in Hong Kong, the School offers a through-train Canadian curriculum for students aged 4 – 18, and has one of the most diverse student populations with over 50 nationalities.

Canadian Curriculum and Teachers

The Canadian curriculum is well respected globally and Canadian-educated students consistently outperform their peers in other English-speaking countries on international standardized tests. DSC is a Canadian (Ontario) registered school with over 90% of their teachers registered in Canada.

With an average of 8-plus years of teaching experience at DSC, all the teachers are equipped with the skills and knowledge to provide students with a real Canadian learning experience. Students can learn in an authentic English environment, and experience first-hand the Canadian life and school culture.

International Languages and Future-Ready Education

From the beginning of the educational journey, DSC offers 3 international language options (Chinese, French, and Japanese) for their youngest students in Pre-Grade 1 (4 years old), this ensures students are developing literacy skills in both English and another language of their choice. In addition to their strong language programs, future-ready education is embedded from the early years level all the way to high school. DSC's curriculum focuses on the development of transferable skills within the cross-curriculum and integrated learning model. This approach ensures our students are successful and are prepared for essential future skills such as critical thinking, problem-solving, innovation, collaboration, and communication.

Excellent University Pathways Across the World

Canadian (Ontario) curriculum is an internationally recognized curriculum, the Ontario Secondary School Diploma (OSSD) allows students to apply and enter any universities around the world.

Some of the popular destinations among their community are University of Hong Kong, Hong Kong University of Science and Technology in Hong Kong; University of Toronto and University of British Columbia in Canada, Imperial College London, King's College London, and London School of Economics in the UK; as well as world-renowned universities in Asia such as University of Tokyo, Waseda University, and Tsinghua University.

Focus on students' interests and goals

DSC also offers OSSD+ Signature Programs, a great opportunity to maximize the high school experience and allows students to focus on a specialized academic discipline together with valuable real-world experience through work placement. These experiences and academic credits are very beneficial for students when they prepare their application for the program of their choice in different universities.

Another strength of the Canadian education curriculum is that it is similar to that of the university system. In each semester, students need only to focus on four subjects, and there is no

need to spend a year studying multiple subjects at the same time – which means students can effectively allocate time in their studies to choose the subject areas that they are interested in.

In addition, the guidance team at DSC is committed to supporting the students in choosing and applying for the universities and programs of their choice, this personalised guardianship starts as early as grade 7 to begin developing their individual pathway around identified aptitudes, interests, and future plans.

Through-Train Program and International Community

DSC currently accommodates students from over 50 nationalities. The multicultural environment is perfect for students to learn and use English on a daily basis, and it also allows them to learn about different cultures and cultivate them to become a lifelong learner for a bright and prosperous future. With all grades (4 – 18 years) studying on the same campus, DSC offers a truly international environment for all the students to strive for excellence.

Box Hill nurtures confident and respectful children

Box Hill (HK) International Kindergarten and Pre-school cultivates children's character development to nurture them into confident and respectful individuals through a diverse array of hands-on activities, with the goal of providing quality education to children.

Raising respectful children

At Box Hill, the cultivation of respect is a fundamental aspect of the educational journey. Their dedicated educators employ a variety of research-based strategies to help children understand the importance of mutual respect. For example, they teach by role play; children are encouraged to take on different roles and engage in scenarios that promote respect, such as showing kindness to others, listening attentively, and valuing different perspectives. This hands-on approach enables children to effectively develop empathy and perspective-taking skills.

Furthermore, various activities such as workshops as well as parenting seminars are regularly conducted at the Ma

On Shan campus. "Our goal is to encourage the respectful qualities instilled in students at school to extend into their homes and also all aspects of their lives," says Ms Luby Ng, School Principal of the Ma On Shan Campus.

A child-centered curriculum

Box Hill believes in the power of a child-centered curriculum that recognizes the unique qualities and learning styles of each child. The curriculum is designed to foster a love for learning and exploration by incorporating hands-on activities, play-based learning, and interactive lessons. Children are encouraged to ask questions, make discoveries, and express their ideas while teachers encourage them through positive reinforcement. Mrs Holly Gonzales, School

Development Specialist, further explains, "This approach not only enhances their cognitive development but also nurtures their creativity, critical thinking, problem-solving skills, and self-expression, setting them up for being confident leaders in the future."

Box Hill's UK Early Years Foundation Stage (EYFS) based curriculum also emphasizes on cultivating children's language skills from an early age. At the school, English is the primary language of instruction, but children will also be given plenty of opportunities to develop equal language proficiency in Cantonese and Mandarin. Teachers utilize a multitude of strategies that include interesting activities, modeling conversations and various props to engage students and encourage them to express themselves orally. Show-and-tell activities play a crucial role in providing ample opportunities for self-expression and language building. Instead of relying solely on paper-based reading or flashcards, real life objects are utilized to foster greater engagement and enhance language absorption. By fostering an interactive and stimulating learning environment, children can establish a strong connection between the languages they are acquiring.

Home-school collaboration

Box Hill acknowledges the crucial role parents play in their child's education and actively promotes a strong partnership between the home and the school. Open lines of communication give parents a glimpse into their child's behavior at school so that they can gain a better understanding of their child's abilities.

Luby elucidates on how the school actively encourages parents to participate in school activities, workshops, and events, fostering a sense of community and shared

responsibility. "For instance, parents can volunteer to teach students their know-how, such as instruments, dancing, and even sign up as mystery storybook readers. We also have home activities for parents to collaborate with their child and learn in a fun and interactive way at home," she adds. "This collaborative approach ensures a holistic learning experience for the child, with consistent support from both home and school," she explains.

Guidepost Hong Kong | "You Can Have It All" Educational Experience

Guidepost is a growing school network in Hong Kong, with 13 convenient locations across the city, and a global community with more than 100 schools around the world. Joining the Guidepost community provides your family with a smooth transition into school options through pre-nursery, kindergarten, primary, and beyond, wherever your journey takes you.

You can have it all - Expect more from your school

At Guidepost Montessori, we firmly believe that when it comes to your child's education, you can have it all. Why choose between a school where your child is happy and a school where your child is academically challenged? We think your child's education can be both joyful and rigorous. Our authentic Montessori program is tailored to your child's needs and interests, and is supported by dual-language immersion and modern conveniences. As part of our close-knit community, you'll enjoy network-wide benefits without compromising on personalized attention. Come visit a Guidepost location near you and see the difference for yourself.

The Guidepost Advantages

Structured curriculum, customized to your child

Our authentic Montessori program is scientifically structured to nurture children's growing independence at each stage of development, while being uniquely tailored to your individual child's needs and interests. In a Guidepost classroom, your child's activity is driven by her choices, where she'll take pleasure in mastery of different subjects, and her teachers are trained to observe and guide her exploration of the broad curriculum.

True dual-language learning

Guidepost programs offer a full-time dual-language environment in which your child will use both English and Mandarin daily to learn, socialize, and interact with their environment. Your child will have one fluent English-speaking guide and one fluent Mandarin-speaking guide in his classroom at all times, and be surrounded by learning materials in both languages. In addition to teaching the skills to cultivate reading and writing in both languages, we use both English and Mandarin as living languages, so your child can access the entirety of our curriculum in either language.

Exceptional experience for children and parents

At Guidepost, we put children and parents first. We deliver an excellent learning experience for your child while also focusing on your needs as a parent, because we serve your entire family. We make it easy for busy parents like

you to be fully engaged in your child's education, with real-time insight into your child's daily activities and progression through the curriculum, available whenever you want it. And at Guidepost, we don't charge any fees that don't go 100% towards your child's tuition: that means no capital levies, debentures, registration fees, or other extra costs.

Close-knit school community and big network benefits

When you join the Guidepost community, you get the advantages of an intimate school environment where everyone knows you and your child, while also getting the infrastructure and quality standards that come from being part of a larger network. Enjoy the familiarity and personal connections within your campus while accessing network-wide benefits like monthly birthday parties, free events for families, camps across Asia, and smooth transfers if your family ever relocates.

All Through School - UK Curriculum - Academic Excellence Since 1994

facilities. The school's campus is located in the Sai Wan Ho area of Hong Kong, providing a peaceful and conducive environment for learning. We recognize the importance of extracurricular activities in a student's overall development and offer a wide range of extracurricular activities, including sports, music, drama, and community service. The school's diverse student body allows for a rich cultural exchange and provides students with a global perspective.

KIS is committed to providing a safe and inclusive learning environment for all students. The school's policies and practices are designed to promote diversity, respect, and understanding, and to ensure that all students feel valued and supported.

Korean International School (KIS) has been successfully running for 30 years in Hong Kong, providing students with an excellent standard of education and a well-rounded learning experience.

Since its establishment in 1994, KIS has been committed to providing a first-class education to students from diverse backgrounds. The school has a strong reputation for academic excellence, with students consistently achieving outstanding results in external exams such as the International General Certificate of Secondary Education (IGCSE) and Cambridge International AS & A Levels

KIS prides itself on providing a student-focused education that values individuality, creativity, and critical thinking. The school's dedicated faculty is composed of experienced and highly qualified teachers who are committed to providing a supportive and nurturing learning environment for all students.

One of the unique aspects of KIS is its commitment to bilingual education. The school offers a Korean, Chinese and Spanish language program for students, as well as Chinese language classes for those who wish to study Mandarin or Cantonese. This approach allows students to develop their language skills and cultural understanding, which is essential in today's globalized world.

The school's facilities with modern classrooms, science labs, a library, an art studio, a performing arts center, and many port

Thinking beyond traditional education to transform learning

You want the best for your child. So do we. Nord Anglia International School Hong Kong (NAISHK) educates your child for the future, enhancing learning through collaborations with the world's best organisations. We teach the most respected and robust educational programmes through collaborations with MIT and Juilliard, delivered in some of the best facilities in all of Hong Kong. Our individual approach to each child enables them to achieve outstanding academic results whilst developing the skills and mind-set to thrive in an ever-changing world.

NAISHK offers an all-through education for students aged 3-18, with specialist teachers in Music, Art, PE and Mandarin from the very start of a child's educational journey with us. Our sole focus is on the success of each and every child. We want them to be the best they can be and we encourage them to "Be Ambitious", reflecting our school's philosophy. This means we support each student to progress further than they thought possible, achieving more academically, personally and socially – all of which are equally important.

At the heart of the school's success and excellent reputation, is the very high quality of teaching and learning delivered by our exceptional staff. Our teachers create an atmosphere of curiosity, passion and enjoyment for learning in all students. We are proud to attract the best specialist teachers who are committed to nurturing and inspiring every child they care for. We support them to do this through world-class professional development, amplified by the sharing of international best practice. Nord Anglia Education (NAE) offers our staff the opportunity to study for a fully-funded Master's degree from King's College London, underscoring our commitment to the career progression of each teacher. Teachers here teach children, not classes, so the focus is always on the child as an individual. We bring a new approach to the interdisciplinary subjects of STEAM (science, technology, engineering, arts, and mathematics), putting your child at the forefront of developing skills for the 21st century.

With over 40 nationalities represented in our own school, everyone learns to respect others regardless of differences in opinion, religion, race or ethnicity. All major festivals are celebrated and our annual International Day event is a culmination of the recognition that rich diversity is a strength. At NAISHK, every day is an 'international day' as our pupils are part of the greater Nord Anglia Education family, with more than 85 schools in 33 countries, linked by our Global Campus. This allows students to co-operate with each other on projects and learning across the world, making them internationally-minded, effective global citizens of the future.

At NAISHK, we offer the IGCSEs and IB Diploma Programme. This curricula provides the greatest success for the largest number of students. With our individualised approach to each child's learning, outstanding teachers and collaborations, and unique opportunities inside and outside the classroom, we promise to nurture your child to love learning and help them to achieve more than they ever thought possible.

We would love to welcome your family to become a valued member of our vibrant and growing global community. Join Nord Anglia International School Hong Kong today and give your child the very best education.

Premium British Primary School

SHREWSBURY
HONG KONG

TOGETHER WE FLOURISH

AN OUTSTANDING GRADUATING CLASS

TOP 10% GLOBAL SCORES
120 AVERAGE

Inspired by over 470 years of Shrewsbury heritage, Shrewsbury International School Hong Kong was set up in recognition of the profound influence childhood experiences have upon adult lives. The only premium provider of primary education in the region, we offer a unique and uncompromised range of opportunities for children between the ages of 3 and 11, because we only have one chance to get it right.

"We are a Primary School and the vast majority of benefits our students enjoy stem from this critical distinction: they are the sole occupants of our beautiful campus and the most significant consideration of school leaders and governors." Ben Keeling, Principal

Learning at Shrewsbury is founded upon a thematic programme that encourages subject interconnection and runs in close alignment with the English National Curriculum. As a result, students develop their ability to think both creatively and critically within a safe, nurturing and inspiring space, designed for and exclusively used by young learners.

Weekly aquatics lessons supplement an ambitious physical education and performing arts programme facilitated by the availability of an incredible range of exceptional spaces, while a three-tiered Chinese language programme ensures that children of all ages and abilities develop confidence and practical fluency.

Home to a broad and diverse community of international families, the majority of students join Shrewsbury at the age of 3 or 5 and enter into a Nursery or Year 1 class, respectively.

A play centred framework defines the experiences of the youngest students. Children in Nursery classes learn through a process of personalised investigation guided by a highly skilled academic team who act to inspire purposeful, considered and conscious engagement - graduated access to a full specialist programme of study and a carefully managed series of interactions with older students provides a bedrock for further interconnection and the steady development of a supporting network.

"Nursery students love school - they engage boldly and with confidence, empowered by their continually developing linguistic skills. The close and trusting relationships we share act to guide personalised exploration and stir deep fascination." Aileen Doyle, Early Years Leader

On entry to the Primary section, students are encouraged to develop an interconnected network of meaningful relationships, a passion for learning and an informed view of the world around them. The simultaneous introduction of a House system and the widening of an already expansive Co-Curricular programme broadens social and intellectual contact during a critical phase of childhood development.

"Students in Year 1 are required to interconnect, both formally and incidentally - they rehearse and refine their social skills and in doing so develop the positive learning habits required for critical analysis and creative solution." Ellie Woods, Key Stage 1 Leader

Parents keen to learn more about what makes Shrewsbury sparkle are encouraged to reach out direct via their admissions team.

'You only get one childhood and the experiences on offer at Shrewsbury have a life-defining influence. We provide each of our students with the attributes to thrive both within their primary years and beyond.' Ben Keeling, Principal

Salesian School Future Education : OECD 2030 Learning Compass & U.F.O. Curriculum

Salesian Highlights:

Salesian School "Future Education" pioneers an unprecedented school-centric educational framework to:

- 1) Equip learners with Future-oriented Transformative Competencies
- 2) Unleash students' potential through Experiential Learning & Multiple Intelligences
- 3) Nurture children's all-round Well-being

Salesian Background & Achievements

With 70+ years of foundation, Salesian School is a well-known local subsidized primary school. Featuring as one of St. Don Bosco Schools, our school adopts "Preventive System" i.e. Reason, Religion and Loving-Kindness. Our outstanding alumni: Prof. Tony Chan (former President of HKUST), Arron Kwok (All-around artist) and Walter Kwok JP (former CEO of Sun Hung Kai Properties).

Salesian U.F.O. Curriculum

70th U.F.O. Curriculum, i.e. Unique (U) , Friendly (F) , Optimistic (O), is tailor-made for Salesian students. We believe : Every child is Unique (U) and exceptional in their own way. Our school strives to unleash their potential. Learning in a nurturing and loving environment, students blossom into Friendly (F) and appreciative individuals. Salesian learners, equipped with a future-oriented mindset, demonstrate an Optimistic (O) outlook towards the future.

Salesian Future Education

Adopting OECD 2030 Learning Compass Education Framework, Salesian School "Future Education" visualizes students' future needs and prepares children with knowledge, skills, values and attitudes via three aspects: Future Learning, Future Experience and Future Well-being.

Future Learning : Project-based Learning (PBL) , Theme-based Learning , Authentic assessment for learning and Multifaceted U.F.O. student portfolio

Future Experience : Multiple Intelligences (MI) , Potential Realization Program (PRP), Experiential Learning and Life Planning

Future Well-being : 1.) Physical health (Morning workout, Featured P.E. lessons, Various school teams), 2.) Mental health (Positive thinking, U.F.O. award scheme) , 3.) Cognitive health (Bridging course, Small-class teaching, Assistant Teacher in P.1) , 4.) Social health (Buddy scheme) and 5.) Spiritual health (School-wide daily prayers, class-based intercession bottle)

Lou Pichoun École Maternelle Française Internationale Hong Kong

French International Preschool Hong Kong

Founded in Hong Kong with over 27 years, Lou Pichoun is a French International Preschool with two campuses located in Stanley and Tseung Kwan O. We welcome children from the Très Petite Section (2-3 years old) to the Grande Section (5-6 years old).

Art-infused trilingual program

Our trilingual preschool curriculum - French, English and Mandarin thoroughly follows the French National Education Official Bulletin and relevant guidelines in terms of programs and objectives. Students can choose between French Stream and International Stream. Our diversified theme-based preschool activities are curated to encourage students to discover, to achieve and to build self-confidence, with a great deal of arts!

“At Lou Pichoun, we pride ourselves on providing a happy and harmonious environment. Our small class size allows more personalized interaction between teachers and children, which helps encourage them to discover, to achieve and build up better self-confidence, with a great deal of arts!” says Mr Pierre Colliot, school supervisor of Lou Pichoun.

Immersive language environment

“We welcome children with and without a French family background and we help those who need additional language support with various after school immersive activities.”

We organise Mini Pichoun playgroup in French, English and Mandarin in small classes for toddlers between 13-24 months with fun and interactive activities designed to develop your child's emotional, cognitive, physical development and social skills to prepare them for preschool.

Club Pichoun is an after-school program French, English and Mandarin popular for the children between 2 to 6 years old. These language immersion classes are designed to give

opportunities for children with or without a French-speaking, English-speaking or Mandarin-speaking family background to perfect their languages through playing, by means of diverse pedagogical tools aimed at putting what they have learned into practice.

Certificated French curriculum

Lou Pichoun Tseung Kwan O campus is an EDB registered kindergarten and certificated AEFÉ for its French program. AEFÉ (Agency for French Education Abroad) is the government institution supervised by the French Ministry of Foreign Affairs. It is responsible for monitoring the quality of 500 accredited French schools abroad. Students of this program gain priority to enrol in other AEFÉ schools worldwide.

Application for PN-K3 for school year 2024/2025 is now open.

Maple Bear Canadian International Kindergarten Hong Kong

Maple Bear Canadian International Kindergarten brings the best of Canadian bilingual education to prepare students holistically to succeed. With over 600 Maple Bear schools in over 40 countries around the world, we operate in conformity by offering an international experience to every school, while still providing educational experiences personalised to each community's unique needs. Do have a chance to visit our beautiful Maple Bear Hong Kong campuses, located in Tseung Kwan O.

Canadian Quality and Standard

The Maple Bear Curriculum is continually updated by our Maple Bear Faculty, a team of early childhood experts from Canada. Teachers at Maple Bear are all trained, qualified and receive continuous professional development training on the latest pedagogies and instructional strategies to make sure students are receiving the best education at their rapid development stages.

Immersive Play-based Bilingual Environment

Play is a crucial part of development of the whole child. At Maple Bear, we put an emphasis on how valuable play is for young children. Play promotes interacting with people, manipulating objects, problem-solving and making discoveries that help make sense of the world and learning happens authentically.

Maple Bear is more than learning a language through our bilingual language immersion experience, the model aims to provide a complete education of the child physically, intellectually, emotionally, and socially, in which three components are fundamental: Creativity, Collaboration and Critical Thinking. Based on a themed project, lessons are fully child led, activity-driven and play-based, students learn English and Mandarin using a student-focused language immersion learning system based on Canadian educational pedagogies and best practices.

"Students are encouraged to take risks and explore in a safe environment for learning. Every staff member is acquainted with every Maple Bear student and finally we are able to achieve because of the love and care from our team and the full support and sharing of best practices from Maple Bear Global Schools!" said Ms Julie Chu, Principal at Maple Bear Hong Kong.

Maple Bear organises Bear Care English playgroups for toddlers aged from 12 to 24 months, students will bridge directly into our Kindergarten classes to building up toddler confidence and making sure for a smooth transition.

Applications for PN-K3 for school year 2024/2025 is now open.

Garden House Waldorf School

At Garden House, we understand that education is a journey and not a race, each child is unique in their own quality. The children have their own ability to explore, to discover, to serve the world.

Garden House Waldorf School was established in 2008 and has developed to offer a warm, spacious and natural environment for children to embark on a comprehensive educational journey from playgroups to primary school education for children aged 1-12 years old. Committed to remaining an urban/countryside school to better serve the needs of the greater community and to attract a diverse student body, our school has put great effort into the design of a school that supports the needs of the students, emphasizing holistic development across physical, emotional, intellectual, and spiritual dimensions. This means ample space for play, gardening and a beautiful environment in keeping with our educational philosophy.

We welcome families who wish to have a sustainable living community where learning is relevant to the challenges of the present and future, and where children can develop into capable, confident adults who want to contribute positively to society. Our dedicated teachers and faculty respond to the needs of each individual in a thoughtful and creative way.

Why Waldorf Education?

Modern education tends to focus so intensely on acquiring information that it overlooks what a child needs in order to build a meaningful life. In addition to thoughtfully-presented academics, Waldorf teachers help children develop a positive emotional life (emotional health, aesthetics, and social skills), a healthy will (confidence and the ability to get things done), and a strong inner compass that discerns right from wrong.

In addition to providing children with information, critical thinking, and skills that traditional schools provide, Waldorf

education helps children to become well-rounded, imaginative and confident problem-solvers, with a deep sense of empathy and social responsibility.

Because it is so strongly child-centred, it treats the curriculum not as a suit of clothes into which the child must be made to fit but instead as a midwife to the emerging individuality - as a tool to help the children develop.

This leads to graduates who are - out of themselves - able to impart direction and purpose to their lives, to meet problems creatively, flexibly and practically. Well-adjusted and adaptable, they are ready to meet the challenges of the future that stands before them.

MULTILINGUAL EDUCATION – A MAJOR ASSET FOR A BRIGHT FUTURE

Founded in 2006, Les Petits Lascars is a multilingual international nursery and kindergarten education provider for children aged 9 months to 6 years.

Located on 2 campuses in Central and Tseung Kwan O, we offer the choice between French and International streams.

Our French stream follows the French National Curriculum, with classes in French only, or bilingual French and English or trilingual with an introduction to Mandarin.

Our International stream follows the International Early Years Curriculum, with a choice of English only, or bilingual English and Mandarin, or trilingual with French as well.

Both programmes are designed to equip your child with the foundation skills necessary for primary education.

Our school is committed to a personalised and innovative teaching approach that allows each child to develop their potential at their own pace and to thrive in a caring and stimulating environment. Our classes are limited to 12-15 children (7 for baby classes), enabling each child to benefit from the interaction necessary to develop their social and interpersonal skills as well as receive the personal care and attention that they need at this key stage of their development.

Our core philosophy is to provide a family atmosphere nurturing and supporting each child's first steps into school life.

For the youngest (9 to 24 months), we offer playgroups in French, English or Mandarin. Classes are designed to allow your child to discover the language and explore the world around them through fun and interactive activities. Using a playful approach

that stimulates senses, we guide your child through language exploration, emotional awareness, early knowledge acquisition and psychomotor skills development. It is the ideal programme to prepare your child for a smooth transition to Preschool.

For after school, we offer extracurricular activities and clubs with various options ranging from artistic and cultural to science/STEM, as well as language and sports activities, in French, English or Mandarin. A great opportunity for your child to be creative, try something new, explore self-expression, and gain confidence while having fun.

For French-speaking families looking to boost their child's French language skills, we provide FLAM French Support classes. The perfect option to practise and develop French language skills, discover French culture and make new friends. Our FLAM programme is the only one in Hong Kong to be officially recognised by the French educational authorities.

Les Petits Lascars is accredited by the AEFÉ – Agency For French Education Abroad, a government institution responsible for monitoring and managing the network of French schools abroad, supervised by the French Ministry of Foreign Affairs.

CENTRAL · TSEUNG KWAN O

Bonjour, Hong Kong: Join us to learn French!

Alliance Française Hong Kong (AFHK) is the Official and largest language institution for French in Hong Kong and in Asia with over 6,000 students annually. AFHK is the only accredited and official examination centre to conduct all the diplomas issued by the French Ministry of Education such as DELF and DALF, TCF and TCF Canada (operated by France Education International). From 2025 onwards, Diplôme d'Études de Langue Française (DELF) becomes the new stipulated official language examinations for Category C subjects of 2025 Hong Kong Diploma of Secondary Education (HKDSE).

With our team of 60 qualified native French-speaking teachers, we offer a large range of courses from beginners to advanced levels, including specialized courses,

private tuition, workshops, and immersion programmes. In addition to adults courses, there are designated courses for preschoolers from 3-5 years old, kids from 6, 7-11 years old and teenagers from 11-16 years old. For those who would like to learn French at your own pace, private courses are designated for your specific needs. Outside the classroom, students are encouraged to participate in our wide range of cultural events where they can immerse themselves in a French-speaking environment.

This summer, join us for engaging workshops and activities that move beyond the basics of the French language, so students can immerse themselves in an engaging way. All summer camps start at \$4,000 where students can learn French while discovering Cinema, Comics and Olympics DIY Themed workshops. Regular French courses registration opens on May 24 and a 5% early bird offer is valid until June 23!
