

FedRAMP Authorized services for smart, streamlined government operations

The stakes for delivering digital services have increased dramatically in today's government. Data use, protection, and control is at its core of all its initiatives and agencies see the need to accelerate digital transformation projects to deliver a better citizen experience. But how can they do this in a secure manner?

With Xerox® Capture and Content Services, government agencies can integrate legacy paper systems with digital processes, to work more efficiently and improve citizen engagement at each touchpoint — while reducing operational costs and security risks.

HOW IT WORKS

DRIVING DATA SECURITY AND RESILIENCY TO A HIGHER LEVEL: FEDRAMP AUTHORIZATION

The Federal Risk and Authorization Management Program (FedRAMP) is a government-wide program that promotes the adoption of secure cloud services across the federal government by providing a standardized approach to security assessment, authorization, and continuous monitoring for cloud products and services.

Xerox® Capture and Content Services has achieved an Authority To Operate (P-ATO) from the U.S. government FedRAMP's Joint Authorization Board (JAB).

In developing Xerox® Capture and Content Services, we analyzed how best to improve data accuracy and accessibility while ensuring the highest security standards.

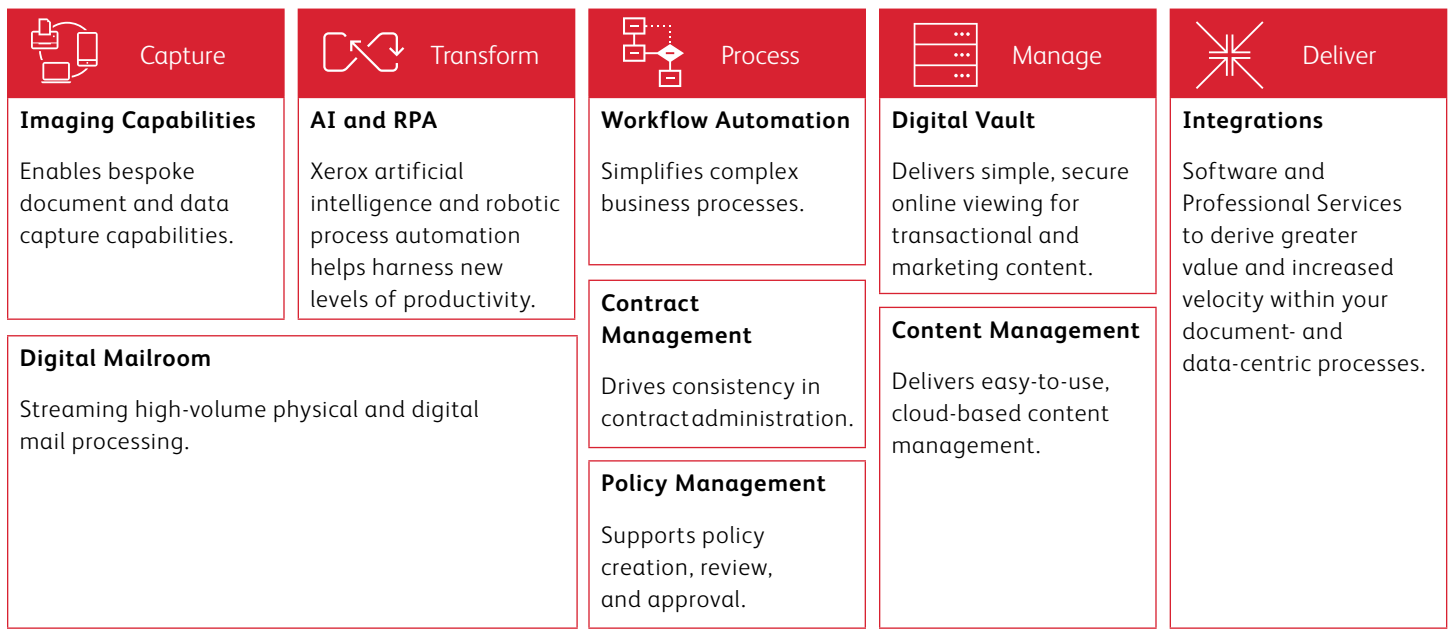

Our FedRAMP-compliant package of capabilities is designed to help any government organization use information more effectively. Leveraging powerful analytics, we're able to identify challenges and help government agencies tame the massive influx of physical and digital documents they deal with every day.

FedRAMP authorization follows the National Institute of Standards and Technology (NIST) guidelines on standardized security requirements.

The NIST controls ensure continuous monitoring and improvement in processes, and establish a risk management framework, which continually protects all government data in a government-only community cloud, reducing the time and staff required to conduct redundant agency security assessments.

INTELLIGENT DOCUMENT PROCESSING WITH LESS FRICTION AND MORE FLOW:

With Xerox® Capture and Content Services, establishing a comprehensive security framework is as straightforward as possible. We can help you map out every step of a smooth document journey. These are some of our capabilities:

Digitalization and security work better together

Governments can better serve citizens while protecting critical citizen information.
